# SonicHub™ Marine Audio Server

***Marine audio server for HDS® with waterproof dock. Full iPod, iPhone, and MP3 compatibility, all controlled from your Lowrance display.*** Connected either directly to a single Lowrance HDS® display or to multiple HDS® displays via a NMEA 2000® network, SonicHub™ allows the boater to control their onboard music components from any high-resolution display in the boat. A separate, fully waterproof dock connects an iPod, iPhone, or MP3 audio player to the SonicHub™ while keeping it protected and secure. Input lines allow for the control of an iPod, iPhone, Lowrance LWX-1 SIRIUS® radio (US only), integrated AM/FM radio tuner*, and plays MP3s on a USB stick. Convenient and versatile, Lowrance SonicHub™ adds a new world of enjoyment and functionality to Lowrance HDS® systems.

- High quality design and build, specifically developed by Lowrance for the marine environment.
- Full integration with Lowrance HDS multifunction displays using NMEA 2000® network. The result is simple, menu-driven controls on the HDS's waterproof, high-resolution color screen and no need for a separate stereo head unit. SonicHub status is displayed at bottom of display screen when active.
- Includes a four channel x 50 watt speaker amplifier and AM/FM stereo tuner. Line-out to subwoofer for added bass. Excellent sound quality.
- Supplied with 2 marine-grade 6.5" speakers 200W output.
- Numerous audio source inputs including Apple products, other MP3 sources via USB port and flash drive.
- Stereo AUX line input for audio
- Mono line input for intercom, alarm and emergency override
- Music control for up to two individual zones
- Compatible with LWX-1 SIRIUS® satellite radio/marine weather module (USA only)- service subscription needed.

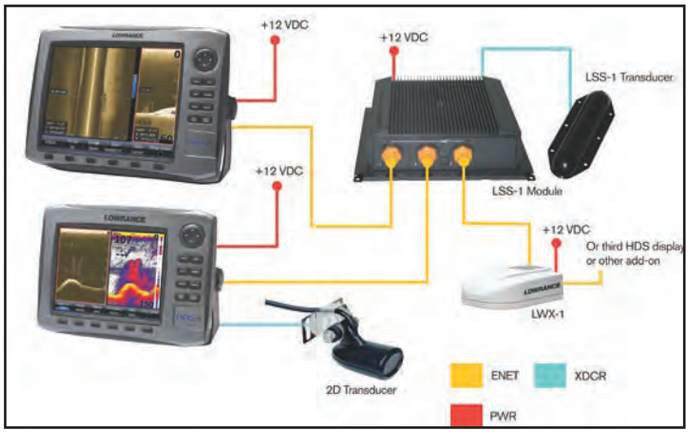
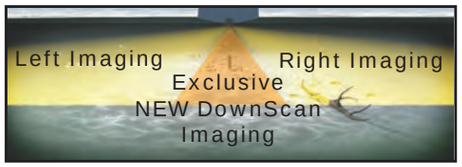
# Panoramic LSS-2 StructureScan™ Sonar Imager w/ Exclusive DownScan Imaging™

**Order# 10800-001** (DMI# 140518) **$599.95** **6455012**





- Get the Whole Picture – first and only solution with crystal-clear, dedicated side- and down-looking views.
- Pick Your Color – Select from a wide array of HDS and StructureScan display color choices for the best viewing for water conditions and personal preference.
- SideScan Imaging – Crisp side-viewing detail, up to 500 ft./152 m port to starboard, allows scanning more water in less time for productive locations. Reveals targets and their scan shadows – structure, game fish and baitfish alike.
- Detailed Navigation Guidance – HDS with built-in Insight or any high-detail mapping option, plus StructureScan™ imaging presents the best total on-the-water picture to enhance discovery success, above and below the surface.
- DownScan Imaging™ – The Lowrance innovation of dedicated sounding focused vertically beneath your boat removes all guesswork in structure identification, like this submerged bridge at Virginia's Smith Mountain Lake.
- Broadband Sounder™ – Advanced, award-winning HDS digital sonar technology unites with StructureScan soundings for an all-new, combined view of structure and fish detail that's easier to interpret.

# S.I.S Program by Lowrance

The Sonar Installation Subsidy (S.I.S.) Program is effective October 1, 2013 through December 31, 2014 sand is Navico's way of acknowledging the vital role Dealers have in the proper selection and installation of Lowrance Sonar and/or Global Positioning System (GPS) products, units, transducers, and accessories. To help Dealers provide this valuable service to Lowrance Consumers, the S.I.S. Program gives a substantial subsidy to the Dealer when they perform the initial installation for the Consumer or arrange for it to be performed by an authorized third-party on select models of Lowrance products. Lowrance products must be installed for a Consumer by the Dealer or an authorized third-party to qualify for the subsidy.

To qualify for the S.I.S. Program, you must satisfy either A or B below:
a) A regular part of your business must include installation of Sonar or GPS products, as well as the sale of boats; or

b) You must have demonstrated sufficient expertise in Sonar or GPS installation (with sufficient knowledge of boat construction to ensure correct installation of Lowrance products), and installation of Sonar or GPS products must be a regular part of your business.

If you are unable to meet A or B above, you must have a written contractual arrangement with an installer who does meet one of these two qualifications and who will install Lowrance Sonar or GPS products on a timely basis.

***To apply for the S.I.S. Program, Call 800-324-4737 to get your application:***

S.I.S. Coordinator
Navico
12000 East Skelly Drive
Tulsa, OK 74128-2486

Navico will review the S.I.S. Application to make a determination of approval. After the S.I.S. Application has been approved new Dealers will be given an S.I.S. Dealer number and an information packet including guidelines and procedures to claim an S.I.S. subsidy, as well as a supply of S.I.S. Claim Forms (sample shown in Schedule C). S.I.S. Applications are valid only for the current year. A new S.I.S. Application must be completed and approved each year in order to continue to participate and receive reimbursement for claims.

## ICE-55 Flasher

The ICE 55 ice fishing flasher has a 6-color, industry-best fiber-optic flasher display that offers unmatched performance and gives greater distinction between targets in the beam. It also features an extreme temperature LCD with digital depth and automatic depth scale. Its unique purple target line allows fishermen to set a visual indicator at a specific depth to know exactly how far to lower their jig. Professional-grade carrying case included. Rely on mminbird ice flashers to find your spots and keep your cooler full.

## 360 Imaging Trolling Motor System

Humminbird's 360 Imaging™ provides a complete around-the-boat, underwater image with the same sharp detail anglers have come to know with Side Imaging® technology. With a single sweep, 360 Imaging has the ability to cover a 300-foot diameter circle (70,685 square feet). Maximum depth is 150 feet. This optional accessory DOES NOT replace your standard Side Imaging transducer, it enhances your product. You must use standard transducer in order to have a digital depth reading. This product includes the AS GPS HS (GPS Receiver with Heading Sensor), 8' power cable, addition 3' foot cable for quick disconnect, bow mounting bracket and a 20' Ethernet Cable. Trolling Motor, not included.

# > WHERE THERE'S A HULL THERE'S A WAY.

Want to put Humminbird Sonar technology on your boat? If it floats, we've probably got the right transducer for it. Using the chart, find your Humminbird head unit. Then find your preferred transducer or transducer accessories. It's that simple.

## TRANSDUCERS

### TRANSOM

Mount on the transom (back of the boat).

Available on many models, the impact release feature pivots transducer out of the way if struck by an object.

### TROLLING MOTOR

Mount on most trolling motors.

Low-profile shape reduces drag and hang-ups on weeds.

### IN-HULL

Mount to inside of most single-layer fiberglass hulls using slow-cure epoxy.

(Cored fiberglass, metal or wood hulls not acceptable. Hull must be free of trapped air and voids.)

### PORTABLE

Mount on transom or side of most smooth-surface wood, aluminum or fiberglass boats.

Heavy-duty suction cup holds transducer at trolling speeds only.

### BRONZE

Ideal for large boats and boats with in-board motors.

Not recommended for trailered boats. Professional installation recommended.

### PLASTIC

Economic alternative to bronze transducer. Mounts on thinner hulls such as aluminum.

Not recommended for trailered boats. Professional installation recommended.

### ICE

This DualBeam transducer can be used as replacement or to convert any portable unit into an ice-ready fishfinder.

## TRANSDUCER MOUNTING

### TRANSOM

Mounting hardware for transom-mount transducers. Kits include all mounting brackets, hardware and cable clamps required for installation.

### TROLLING MOTOR

Mounting hardware kit adapts our standard transom-mount transducers for use on the trolling motor. Kits include all mounting brackets, hardware and wire ties required for installation.

Includes all hardware and suction cup. | Transducer mounting hardware and float for XI 9 19 and XI 9 20 ice transducers. | Transducer mounting hardware for installation in a kayak. Kit includes surface preparation products in addition to a transducer cradle and adhesive products. | Connect two transducers to one fishfinder. Ideal for switching between the standard transducer and accessory transducer such as WideSide™. | Connect two fishfinders to one transducer. Ideal for directing output from one transducer to a bow station or a second helm. | Add extra length to standard transducer cable. Available in two lengths, cable plugs into existing transducer and your fishfinder. | Continuously splits the Side Imaging signal and the Dual Beam signal. For use with a second transducer without a switch. | Splits Side Imaging source signal into left and right output for two Side Imaging transducers. | Allows older model transducers or fishfinders to connect to newer model Humminbird units or transducers. |

## NETWORKING AND ADVANCED ACCESSORY MODULE COMPATIBILITY

### VIDEO OUTPUT CABLES

AD VIDEO

VC 1

Output video from your Humminbird to another device. Cable is approximately six-feet long with two standard male RCA connectors on the output side and one connector that is standard to select ONIX, 1100, 900 and 800 Series products for hook up.

### AS EC CHART

Link your fishing system to your laptop. One end connects to your boat's Ethernet network, the opposite connects to your PC's Ethernet port. This is for use with AutoChart.

### AS SYSLINK

Connects two units to one GPS receiver. Does not share waypoints, routes or tracks.

## SERIAL PORT SPLITTER CABLES

Add two serial accessories, such as an AIS transceiver and a supported third-party GPS.

## HANDHELD GPS CONNECTION KITS

Kit includes: NMEA connection cable, Y cable and detailed instructions. This connection kit requires the handheld GPS manufacturer's NMEA data cable to complete the connection to your handheld GPS.

## TEMPERATURE ADAPTER CABLE

Allows Ethernet connection of Temperature Sensor (TG W) and Speed Sensor (SW) to your Humminbird fishfinder.

## RADAR MODULES

Choose from 12-inch or 21-inch enclosed radomes, or 40-inch or 55-inch open array configurations. See page 26 for a model-by-model comparison of transmit power, transmit frequency, beamwidths, sideloabs and rotation. Or go to humminbird.com for full specifications.

Some models require an additional adapter listed below.

## EXTERNAL GPS MODULES

Choose from three external GPS solutions. The AS GRP provides fast and precise position fixes accurate within 2.5 meters, even in lower signal areas. With an integrated heading sensor, the AS GPS HS lets you see compass information and your boat's orientation while moving or sitting still. Opt for the AS GR 16 to unlock the GPS capability of select 700 Series™ models. Some models require an additional adapter listed below.

## WEATHERSENSE®

Adapt your tactics to changing weather that impacts fish behavior. Provides increasing or decreasing pressure trends on a fullscreen view or as a readout on your sonar display. You always start fishing with up-to-the-minute barometric pressure trends.

RAM-108

## RAM Trolling Motor Stabilizer Mount

The RAM-108 consists of a double socket arm, 2.5 diameter round base that contains the universal AMPs hole pattern and single strap base. The strap will accommodate rails from 0.5 to 2 in diameter. The trolling motor stabilizer will take every bit of the vibration out of your trolling motor while all the time protecting the head, shaft and mount from damage. A must for any angler with a bow mount trolling motor. The maximum allowable distance between the mounting surface on the boat and the lowest point of the trolling motor shaft is 8.75". Distances shorter than this are compatible.

## Powerdrive Series V2 Combo - (i-Pilot Preinstalled) - Freshwater Bow-Mount

i-Pilot® changed the game again...An ergonomically redesigned remote. Double the memory for Spot-Lock (now with 6 spots) and Record A Track (now with 6 tracks). It's simple: the less time you spend steering and positioning your boat, the more you can focus on fishing. i-Pilot automatically controls and steers your boat using GPS technology. Lock onto a fishing spot – and stay there. Record a successful path and retrace it later. Set cruise control for perfect bait presentation. All wireless, all with GPS accuracy, all with the sole purpose of making you a better angler at the push of a button.

THEY COMMUNICATE. YOU DOMINATE.

i-Pilot® Link™ brings the power of Minn Kota®, Humminbird® and LakeMaster® together – allowing them to communicate with each other to automatically navigate your boat. Follow depth contours, store and return to waypoints and paths, electronically anchor onto a spot, follow bearings, and more. This is GPS precision with total integration. This is i-Pilot Link.

## X3 Edition - Foot Control
### Freshwater Bow-Mount

MotorGuide NEVER STOP.

Motorguide is excited to introduce the new X3 trolling motor designed to deliver better performance and durability for anglers looking for the best value in the 40- to 70-pound thrust range. The X3 offers best-in-class steering performance. A dual cable pull-pull steering system eliminates slack, while the innovative patent-pending Variable Ratio Technology reduces torque steer feedback and improves responsiveness. The X3 mounting bracket is also built tough with aircraft-grade extruded aluminum to minimize flex and provide precision control under high-thrust. The new larger diameter shafts are rugged and corrosion resistant, paired with a durable stainless steel outer shaft. Special composite construction provides greater impact protection and is backed by a lifetime factory warranty. The X3 offers best-in-class steering performance. A dual cable pull-pull steering system eliminates slack, while the innovative patent-pending Variable Ratio Technology reduces torque steer feedback and improves responsiveness. A newly designed and reinforced foot pedal also provides better feeland control.

## X3 Edition - Hand Control
### Freshwater Bow-Mount

MotorGuide NEVER STOP.

The new X3 bow mount is a great addition to the MotorGuide lineup. It offers a classic hand-operated control with 5 speeds forward and 2 reverse – with a choice of 45 and 55 pound thrust for the versatility you need. The aluminum shaft and aluminum and steel lower unit construction combine to make the X3 a strong, durable and dependable motor. The new X3 is paired with the revolutionary Gator® Flex 360 mount for a winning combination of durability and value. Our is created from exclusive XK360 die-cast aluminum for optimum strength-to-weight ratio that resets itself to run position upon impact. Twist tiller operation - 5 speeds forward and 2 reverse. Powerful and reversible lower unit runs cooler and lasts longer. Quiet, smooth operation lets you get closer to the fish

# Xi5 Edition - Wireless
## Freshwater Bow-Mount

MotorGuide NEVER STOP.

Motorguide is excited to introduce the new Xi5 wireless trolling motor. The Xi5 marks a key milestone in our history. It is the culmination of a renewed focus and significant R&D investment to design, engineer and manufacture best-in class trolling motors.

The Xi5 is designed to exceed the expectations of today's discriminating customer. It's engineered to be reliable every day– and durable over the long haul. Unlike the competition the new Xi5 includes wireless capability "right out of the box", anglers can command precise motor and steering control from anywhere on the boat. A wireless foot pedal is standard with freshwater models and a hand-held remote is standard with saltwater models. Plus, we've made it stealthy quiet and silky smooth. And you'll also see thoughtful details that make it safe and easy to use. New Composite Shaft - The new composite shaft can take on any and all obstructions that get in its way. It'll bend, but won't break. That's why it's backed with a lifetime warranty. Safari 2-Blade Weedless Propeller.

## Varimax Edition -
### Freshwater Pontoon-Mount

MotorGuide NEVER STOP.

With the longest run-time of any motor in its class and the advantage of precise variable speed adjustment, VariMAX gives you the freedom to fish all day with unmatched control of your boat – and the guts to get it done, day in and day out.

You'll get over 3x the battery life of traditional 5-speed motors and never have to settle for a little too fast or a bit too slow. Dial it way down and whisper through the shallows, or crank it up and cut through the wind with less amp draw. Fish longer, fish exactly the speed you want, and fish quieter...all with the extreme durability of MotorGuide and our Digital advantage. BluVis integrated speed and battery indicator.

# Tour Edition -
## Freshwater Bow-Mount

MotorGuide NEVER STOP.

Is the trolling motor really one of the most important pieces of equipment on your boat? It is when your livelihood depends on it. At MotorGuide, we understand what's most important to our users. It comes down to whether or not your trolling motor performs. It's that simple. Touring professionals are always looking for an edge, and with MotorGuide's Tour Edition, they've found it. Every Tour model combines the Digital advantage with our stainless steel shafts, metal pedals and heads. What is Digital? MotorGuide Digital monitors your motor's amp-draw, heat dissipation, output, and other vital parameters, resulting in a cooler-running, more durable motor with an extended service life. Digital is a self-contained, sealed module in the lower unit that brings all vital motor components together in one protected location, while eliminating outdated analog circuit boards and their related components. Digital allows you to dial into the precise speed you are searching for, and in turn results in longer lasting battery life.

# Great White Edition-
## Saltwater Bow-Mount

MotorGuide NEVER STOP.

There's no trolling motors on the planet more prepared for the extreme test of saltwater than Great White. Heat? Corrosion? Big-water pounding? All in a day's work for these predators. Our Great White edition is the choice of guides, competitive anglers, and die-hards around the world. From the specially formulated coating, to the epoxy-sealed lower unit, to the stainless steel shaft - the durability starts on the outside and goes all the way to the core. Shallow-water saltwater guides and anglers on the Saltwater Redfish circuits choose Great White Digital for a simple reason - they're the most dependable trolling motors out there. Long days on the flats are the ultimate test of your equipment, and these motors don't just pass it, they eat it up and come back for more. MotorGuide invented the saltwater-specific trolling motor, and we continue the leadership today as the choice of guides and avid saltwater anglers around the world. Great White. The only motor ready to go the distance with you in one of the most caustic environments on earth.

## CoPilot System for Minn Kota PowerDrive

Control speed, steering and on/off with the wireless CoPilot™ remote accessory. It installs easily with plug-n-play design and a receiver that attaches to the right side plate of the trolling motor mount. A plug is also included, allowing a corded foot pedal to be used in conjunction with CoPilot.

| | | | |
|---|---|---|---|
| 1866100 (DMI#) | Legacy PowerDrive | $149.99 | 3112467 |
| 1866150 (DMI#4740051) | PowerDrive V2 | $149.99 | 7212467 |

## CoPilot System for Minn Kota Terrova

In addition to the speed, steering and on/off controls of the standard CoPilot™ remote, Terrova's CoPilot lets you activate AutoPilot (on AutoPilot-equipped models) or reach maximum speed at the touch of a button. Free yourself from the pedal and fish from anywhere on the boat.

| | | | |
|---|---|---|---|
| 1866160 (DMI#4740052) | Terrova | $199.99 | 7116625 |

## i-Pilot

How can this remote change the way you fish? By actually letting you fish. i-Pilot® uses GPS technology to lock onto a fishing spot, record and retrace paths, set cruise control, and more. Redesigned with an ergonomic new remote, bigger LCD screen, and double the Spot-Lock and Record A Track memory, i-Pilot lets you spend less time positioning your boat and more time setting the hook. All wireless. All with GPS accuracy. Altogether revolutionary.

| | | | |
|---|---|---|---|

## Bounce Buster II

MotorGuide NEVER STOP.

Featuring a high-impact plastic tube with a rubber foot. It attaches using the mount's existing hardware. The tube is cut to the required length for proper spacing between mount and front deck of the boat. The Bounce Buster pivots off the head of the mount in the stow position to prevent downward momentum caused by rough water impact, keeping the mount and motor rock solid on the boat. In the fishing position, the Bounce Buster cleanly folds out of the way. Perfect for bass boat applications where the front deck of the boat is less than 12 inches of the head of the mount.

# Tournament Saver Pro

It is a push button jumper system. In these days of high tech fishing, many of the electronics, stereos and accessories used by anglers create a large draw on the battery power. Long days of fishing can result in a dead battery when you try to start your boat to head to the weigh in or head to the boat ramp. Tournament Saver Pro can give you the peace of mind to know that you will always be able to start your main engine in less time than it takes to dig out your jump box or jumper cables. You don't even have to leave the driver's seat! It also weighs less than a jump box and can save weight in the boat, which any avid angler knows results in more top end speed across the water.

## VHF Marine Transceiver

The IC-M36 automatically adjusts the outgoing voice and the incoming audio to compensate for the ambient noise level. When you need an instant “boost” in the volume, a simple push of the “LOUD” button gives you full volume immediately. In addition, holding the “LOUD” button mutes the audio output. The sub-microphone on the rear panel inverts phase and cancels out ambient noise from the main microphone. As a result, the IC-M36 reduces the affect of background noise (particularly trebly noise) from the transmitted signal and makes it easier to catch voice communication. Auto volume adjust. Low power consumption. Large buttons and slim dimensions. Other features: Waterproof construction; Dual/Tri-watch functions; 4-step battery life indicator; Weather channel with weather alert; Auto scan function; Instant access to Ch 16 or Ch 9.

## VHF Marine Transceiver

ICOM

The IC-M504 withstands submersion in up to 1.5m depth of water for 30 minutes. It is equivalent to the IPX8 standard. All products are rigorously checked to pass the quality test at the factory. The IC-M504 has a 168-charactor, full-dot matrix display that allows you to easily view a variety of information, such as GPS data, DSC emergency data, etc. The large buttons and knobs provide user friendly operation. The IC-M504 has built-in class D DSC, which enables you to constantly monitor channel 70. Over and above the DSC, your own and other ships’ position data can be exchanged with the position request or position report functions. The received position information can be transferred to external navigation equipment*. In addition, the polling (request/ reply) function checks whether a specific ship is within the communications range. The IC-M504 has excellent receive specifications of 80dB (typical) for intermodulation rejection, adjacent channel selectivity, and 0.22µV (typical) high sensitivity. 25W hailer/RX speaker and auto foghorn. Other features: Dual/tri-watch function for monitoring Ch.16 and/or call channel; Instant access to Ch. 16 and call channel; 7 levels adjustable backlit display and keypad; Convenient “TAG” scanning function with simple add/delete; Optional Voice Scrambler, UT-112 for private communication; Weather channels with weather alert function; Black or gray color versions.

## AIS Reciever

ICOM

Icom’s MXA-5000 AIS (Automatic Identification System) receiver will pick up real-time transmissions from vessels that use an AIS transporter. Such transponders are now required for SOLAS vessels by SOLAS regulations.The AIS transponder sends accurate navigation information such as:* Static information — vessel call sign, name MMSI number, dimensions and type* Voyage-related information — draft, cargo type, destination and estimated time of arrival* Dynamic information — time in universal time, coordinated, latitude/longitude position, course over ground, speed over ground, heading, rate of turn and navigational status

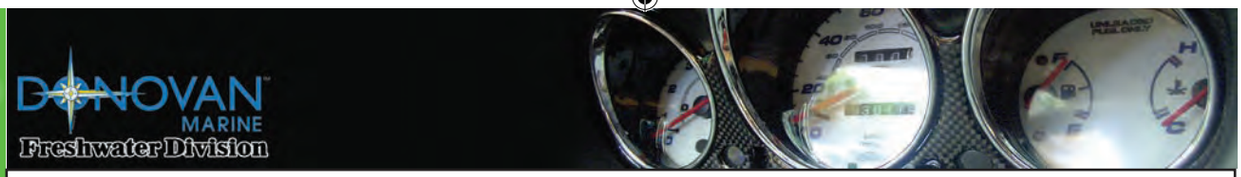
## AIS Stand Alone Transponder w/ Display



ICOM

The MA-500TR is a Class B AIS transponder for Non-SOLAS vessels such as pleasure craft, work-boat and small vessels. Your vessels information will automatically be transmitted at fixed intervals or under base station control. The MA-500TR receives dual AIS channels (Ch. 87B and Ch. 88B) simultaneously and receives both Class A and Class B AIS information. Transmitted information by MA-500TR is:* MMSI code* Vessel name* Call sign* Type of ship* GPS antenna position* Ship’s position* SOG (Speed over ground)* COG (Course over ground)* UTC date and time* GPS antenna type* PA (Position Accuracy)

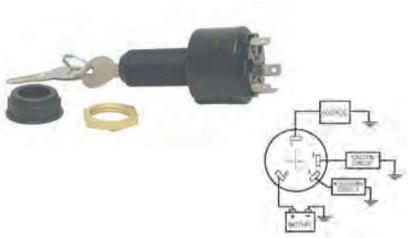
# IGNITION SWITCHES

Sierra offers the most complete selection of high quality polyester and brass ignition switches for the marine industry.

Marine grade glass-filled polyester switches
- Maximum corrosion protection – eliminates oxidation
- Inner seal between cylinder lock and contact plate
- Non-conductive housing eliminates potential shorts
- 20 Amp rating
- 2, 3 and 4 position switches
- Switches for magneto and conventional ignitions



Brass ignition switches
- Corrosion resistant construction
- Up to 15 Amp rating
- 2, 3 and 4 position switches
- Switches for magneto and conventional ignitions

## Heat Shrink Connectors

*These connectors provide a rugged connection that will insulate, seal and protect joints from abrasion, water, salt and other corrosive compounds. *No special tools are required.* Simply heat the insulation and the adhesive will melt and flow, filling any existing voids and creating an all-weather seal.

## Mini Clamp Multimeter

Clamp allows measurement of AC and DC current in wires without disturbing the circuits or contacting live terminals. Auto range simplifies operation: 0.001-400 Amps, 0.001-600 Volts. Auto power-off selection. True RMS - required for accurate measurement of inverter output. Data hold. Test leads included with meter.

# RIGID INDUSTRIES LED LIGHTING

For Marine and ATV use.

## E-Series Forward Projectin LED Lights

First developed in 2004, the E-Series lineup of products by Rigid Industries set the standard in forward projecting LED lights. The original patented “Hybrid” optical system continues to lead the field in efficiency and projection. Highest Lumen Output per Watt - Each 10” section produces approx. 3950 lumens - equivalent to 150 watts of halogen light. 50,000+ hour lifespan.

## Gunwale/Deck Mount Rod Straps

“Rod Tamer Rod Straps” are the best design and highest quality of any rod holding device on the market. These straps are molded of black polyurethane material that will retain its stretch and remain unaffected by sunlight and most chemicals. Unlike the old hook-and-loop straps, they will not get hung up in fish hooks, they will not lose their hold when wet, and they will not fade out. The Gunwale mounts into a 3/4” hole with 2 countersunk screws, strap can retract into the gunwale when not in use, perfect for fiberglass boats. The Deck mount attaches with one counter-sunk screw. Perfect for aluminum or foam-filled fiberglass boats.

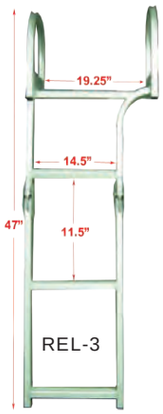
## Cooler Chock Corners / Hold Down



Kit comes with four corner brackets and two hold down straps. Keeps your cooler from sliding around on the deck. The molded, UV resistant corner brackets have interior screw mounting holes to allow a flush mount against surfaces and to take up less deck space. The nylon bungee straps feature molded hooks and a stain-less center hook for totally corrosion-proof mounting. Fits virtually all sizes and makes of coolers. Easily removed straps.

# Hydraulic Steering

UFLEX USA

SilverSteer™ hydraulic steering system kit consists of three main components: a ball bearing piston race helm pump UP28 F-SVS complete with 45° stainless steel adjustable fittings & a front mount outboard cylinder UC128-F featuring adjustable fittings. The SilverSteer™ system stands a higher maximum pressure then the standard ones: relief valve setting at 105 bar (1500 psi) instead of 70 bar (1000 psi). The prompt reaction of the pump at these pressures is assured by a patented lock valve. UC128-SVS cylinder presents technical features that make the system particularly fast and stress resistant.

3. Steering hook Yamaha Part # 63D-48511-004D must be installed.
4. Cylinder HC4645 may be used in these applications. The pivot plate will need to be flipped before installation. Instructions provided with Owner's Manual.

This engine application is current though the revision date of March 10, 2006. For up-to-date engine applications go to: www.seastarsteering.com

Notice: HC4645H compact cylinder is included in the BayStar Steering Kits. If your engine requires the use of a cylinder other than HC4645H or HC4658H then please refer to the figure below for additional replacement pivot plate.

### NOTES

1. HC5345 is optional for SINGLE Engine ONLY applications. DO NOT use HC5345 for Twin engine applications as operational interference may occur.
2. Requires kit HO5090.
3. Minimum engine center = 27".
4. May require extensive cowling modifications.
5. HO5030 and HO5064 comes without tie-bar.
5. One cylinder per engine. Must use Mercury supplied tiller bolt for installation.
5. Interference will occur when using a single HC5345 cylinder and HO6003 tiebar when installed in the aft hole on the steering arm. Options include, a) install tiebar into most forward hole (this will limit steering articulation), b) purchase K-6 Cylinder, and tiebar kit part # HO5009. There will no be no interference when using twin HC5345 cylinders.

## SeaStar, BayStar Power Purge Jr.

SeaStar and BayStar Power Purge Jr. is the quickest way to bleed a SeaStar and BayStar system in the field and assure a rock-solid steering feel every time! The Power Purge Jr. reduces installation and warranty costs while enhancing the quality of the boat to the end user. A typical manual fill and purge takes the average experienced installer or service technician about 30 minutes per boat - by using the Power Purge Jr. this can be reduced to 10 minutes or less. Advantages: Steering feel is solid every time. Complete fill & purge in 10 minutes or less. Fast and efficient. Easy to operate. Screens contaminants from oil. Quick connect fittings. Convenient portable size. Convenient electrical hook-up utilizing your 12 volt boat battery. Optional Dual Cylinder Purging Kit HA 5461 available. Ideal for installation and routine maintenance of SeaStar & BayStar hydraulic steering systems by Servicing Dealers and Ship Yards. Accessory: HA 5461 Dual Cylinder Purge Kit.

## Teleflex Safe-T "QC"

Safe-TQC is ideal for power steered boats in which No FeedBack is not required. Safe-T QC replaces all Teleflex Safe-T Helms made since 1968 with little or no dash modifications.
For single station use only. Components are available for dual cable systems, but we recommend No-FeedBack steering for all dual steered outboards.

**Tech Tip:** When measuring a cable for replacement, simply push in the engine end of cable and measure from the jacket housing, starting at the helm and going to the tip end of the cable where the engine connection rod hole exists. This should give you the correct length of cable for ordering. Always round **UP** if your cable ends in a half-foot length.

# Stick Steering

## Ezy-Stik II Steering

The EzyGlide Ezy-Stik II is model 840, rated for outboard engines not to exceed 70 H.P. It is designed so the operator may be positioned in the front of the boat for improved visibility. The lever movement is 202 degrees or 56.45 inches lock to lock. 3.5 degrees per inch of lever travel. The interlocking handle to steering shaft relieves the possibility of the handle slipping from its position.
One year factory warranty.

Port Mount

Comes complete with helm, lever, dress cover, cable & mounting hardware.

## Ezy-Stik III Steering

The **EZY STIK III** model 870 is a mechanical steering system designed so the operator may be positioned in the front for better visibility and convenience. This system carries a manufactures **recommended maximum 70 horsepower** for outboard engines and a 90 horsepower maximum for jet drives. Remote trim on outboards is recommended for engines in excess of 40 hp. This eases torque feedback to the operator. Lever movement is 161 degrees from lock to lock or 44.80 inches, 3.5 per inch of lever travel. The stainless steel rotating drum assembly is encased in a tough molded housing. This system is self lubricating and needs no additional lubrications within the helm. The EZY STIK III carries a one year factory warranty. Standard cables are not recommended for salt water environment.

## HULL HUGR Contour Fender

Traditional round fenders protect hulls fairly well, but not gunwales. Ski boats, bass boats and runabouts with step-down gunwales are especially vulnerable to damage from docks. The HULL HUGR Contour Fender hinges to wrap around the gunwale and hull, following the contours of the boat. It can be used as a flat fender too. Size: 24" long x 6" wide x 2 1/2" thick. It is constructed of incredibly durable tri-laminate material with polycarbonate grommets. It stows conveniently under seats or inside storage compartments.

## PWC Fender HULL HUGR

Docking a PWC has never been safer with the introduction of the HULL HUGR PWC Fender. Engineered specifically for PWCs, it hinges in the center to better protect PWC bodies from docks designed for bigger boats. It hooks under the rub rail with a molded acetyl hook integrated into the back of the fender. If your PWC has them, you’ll want to connect the top of the fender to a cleat or ski eye with the adjustable strap and vinyl dipped steel hook provided. If not, simply thread the strap though the rubber block provided and place it inside the PWC’s storage compartment, then shut it. The block anchors the fender strap perfectly and will not damage the body. We recommend 2 fenders per PWC. Fits all PWCs.

| | | | |

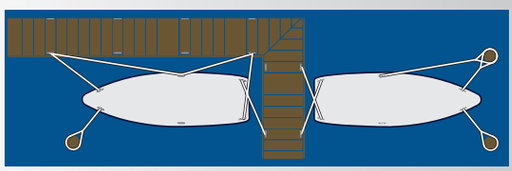
## Double Braided Dock Lines



BoaterSports Pre-Spliced Double Braid Nylon Dock Lines are manufactured from premium quality marine-stabilized high tenacity nylon. Nylon's high resistance to abrasion, chafing, oil, rot, and mildew, and its superior UV resistance make it an excellent choice for dock lines. Using only the highest quality nylon ensures that the rope will remain soft and reduce stretching even after getting wet. Lines are finished with professional yacht whippings at the 12" eye splice and bitter end. Clam pack.

## Braided Nylon Rope

1/4" x 50'. For general tying and all purpose use. It is flexible, yet strong and can be easily knotted

| | | | |
|---|---|---|---|
| 7-6218 | Braided Nylon Rope | $11.98 | 4382799 |

## Hollow Braid Anchor Line

Because of its light weight, polypropylene is the only rope which floats. Because poly is less expensive than other fibers, it is the most popular all-purpose rope for the average consumer. Hollow braided poly can be easily spliced.

| | | | | | | |
|---|---|---|---|---|---|---|
| 52995 (DMI#1-52995) | Polypropylene | 1/4" | 50' | Yellow | $ 6.98 | 5246419 |

## 3-Strand Anchor Line

Nylon is the strongest of all ropes in common use. When stretched it has a "memory" for returning to its original length. For this reason it is best for absorbing shock loads. Nylon lasts 4-5 times longer than natural fibers because it has good abrasion resistance and is not damaged by oil or most chemicals. Nylon also has good resistance to ultraviolet deterioration from sunlight, referred to as "U.V. stability".

## Watertite Epoxy Compound

A two-part, easy to use, fast drying epoxy compound for filling holes and repairing scratches in gelcoat and fiberglass. It is especially recommended to fill gelcoat blisters below the waterline. It is recommended for use with the Interprotect Epoxy Barrier System or VC Tar2. It is an excellent fairing compound due to its unique two-phase cure, which gives a long easy-to-sand window. It can be applied to a thickness of 3/4 without sagging and its superior spreadability makes it an ideal glazing compound for filling small nicks and scratches.

# ABLATIVE BOTTOM PAINT

## SUPER-B GOLD™
### Slime Control Xtra™
### Multi-Season Protection - 67% Copper
### BOOSTED COPPER ABLATIVE

■ **SUPER-B GOLD™** is the highest performance ablative copolymer on the market today. The highest copper content (67%) in our line, and in addition our performance booster SCX™ (Slime Control Xtra™) provides outstanding protection against slime, grass and weed. Continual release of biocide makes this self polishing copolymer most effective for anti-fouling protection, with only minimal paint buildup. Tough, multi-season paint for superior protection against hard and soft growth in extreme fouling conditions, and can re-launch after extended haul-out while retaining original antifouling properties. Perfect for powerboats and sailboats, and can be applied directly over properly prepared ablatives, epoxies and vinyl's, and most any other hard or ablative bottom paints.

## SUPER-B XTRA™
### 45% Copper Boosted Ablative Copolymer
### Professional Boatyard Coating

■ **SUPER-B XTRA™** provides extended antifouling protection against barnacles, algae and hydroids in salt and fresh water on boat bottoms only. SCX™ - SLIME CONTROL XTRA™ - acts like a sunscreen to prevent slime and algae. Its ablative copolymer base renders a smooth finish with durability and abrasion resistance. SUPER-B XTRA™ releases biocide by the constant exposure of new paint film to the water. SUPER-B XTRA™ has universal application over all types of properly prepared bottom paints (except aluminum). For use on fast fiberglass boats, as well as wood and steel hulls, extended protection is possible, since performance is directly proportional to the amount of paint applied.

## IT'S TIME FOR A POWERFUL, NEW ANTIFOULING THAT IS TRULY CLEAN, GREEN AND COPPER-FREE.

Turning over a new leaf has never been easier, or more satisfying. With Pettit's Ultima ECO, boaters can indulge their environmentally friendly side while still enjoying the benefits of aggressive, multi-season protection against fouling and slime. With 50% more Econea biocide than its closest competitor, Ultima ECO is the only multi-season bottom paint to offer a true alternative to copper. Unbeatable protection. A smaller environmental footprint. Isn't it time you turned over a new leaf?

# PETTIT MARINE PAINT

## PRODUCT GUIDE

EZ Poxy 2

2-PART POLYURETHANE

With 150 years of experience in marine coatings, Pettit has earned a reputation for high quality marine enamels that hold up to the rigors and challenges of even the toughest environments. Our new EZ-Poxy2 provides truly superior gloss retention and scratch resistance in a two-part polyurethane enamel that is so easy to use, we couldn't have named it anything else.

**EZ-Poxy2** is a high-performance, two-part polyurethane marine paint without all of the costs and hassles associated with two-part enamels. EZ-Poxy2 combines the added gloss, wear resistance, and durability boaters are looking for in a two-part polyurethane enamel with the ease of application of a single part product. This revolutionary formula reduces the effects of brush strokes and is so forgiving; it's practically fool-proof. In fact, EZ-Poxy2 is so innovative that it makes exact mixing ratios a thing of the past.

requires less effort, and is more forgiving than the competition.

SPLASH ZONE

Pettit Marine Paint has expanded our lineup of Splash-Zone products. These tough, specialty epoxy products are made to withstand the tortures of marine environments. In fact, the Splash-Zone line is so resilient, it can safely be used above or below the waterline. Each Splash-Zone epoxy product offers unique advantages and benefits that do not exist anywhere else in the marketplace.

**A-788 Splash Zone** is an extremely hard, abrasion and impact resistant, two-part epoxy patching compound. It applies like putty to seal, fill, patch, or re-build aluminum, wood, concrete, fiberglass, and steel. It can be applied in or out of water to repair boat hulls, buoys, seawalls, docks, bridge abutments, and more. Splash Zone provides excellent protection against corrosion of metals and erosion and deterioration of concrete or wood. Recommended for patching and repairing damaged underwater surfaces. Not for use in potable water.

**EZ-Fair 7050 Epoxy Fairing Compound** is a lightweight, two-part epoxy putty designed for filling and smoothing surface imperfections above and below the waterline. The special resins used in EZ-Fair impart a high degree of water and chemical resistance to the product, making it an integral part of the Pettit Gelcoat Blister Repair System. In addition, EZ-Fair is the product of choice for fairing metal keels or any underwater surface. Use it for leveling uneven surfaces, filling gouges, scratches, or other damage on fiberglass, wood or metal surfaces. Its excellent chemical and water resistance makes it the ideal choice for repairing blistered gelcoat in an osmotic blister repair system. EZ-Fair is non-sagging and non-shrinking and sands to a smooth finish. The quick-cure formula allows for multiple coats to be applied and sanded in a single day.

**Flexpoxy 7076** is a two-part epoxy resin that does not sag, run, or shrink. Its thick formula allows it to fill large cavities in a single application. When cured, it remains flexible making it ideal for environments that require flex such as keel

polyester resins, metals and wood. It can be sanded, machined, cut, filed, planed, drilled, tapped, or nailed making it perfect

odor formula is resistant to chemicals and is safe to use above and below the waterline. Flexpoxy can be molded and shaped

Flexpoxy can be over coated by most paints and stains.

## HARD ANTIFOULING

**Trinidad® SR** is the standard by which all bottom paints are paint available. Utilizing the dual biocide combination of a high copper load and slime resistant Irgarol, Trinidad® SR provides unprecedented resistance to all fouling. Its hard protective coating has excellent adhesion, and withstands the toughest abuse. Left in the water, it will provide years of dependable service. So effective it earned Practical Sailor's "Gear of the Year" honors twice.

CLEAN-CORE

BLUE - 1277 | GREEN - 1377 | RED - 1677 | BLACK - 1877

**Trinidad®** is the top-of-the-line in conventional antifouling paints. **It has earned its reputation as one of the most respected names in** the industry. Trinidad® delivers an extremely high load of cuprous **oxide (up to 75%), to combat even the most extreme fouling** adhesion, and is highly abrasion resistant. When left in the water, Trinidad® will provide years of dependable service. The perfect choice for competitive racing or blue water cruising.

BLUE - 1275 | GREEN - 1375 | RED - 1675 | BLACK - 1875

**Unepoxy®** has long been the standard bottom paint for many formulated to provide outstanding protection at a very affordable price. Its durable, hard modified epoxy finish is able to withstand beaching, trailering, and season long abuse. It provides excellent coverage and adhesion, and can be applied over most bottom paints in good condition. Suitable for all non-aluminum trailered boats.

## FRESHWATER ANTIFOULING

**SR-21** is an ultra-thin, super slick, low friction film for boat bottoms. It is an **ideal racing finish for fresh water or cold saltwater boats. Its dual biocides combine the power of copper and Irgarol to produce an effective, thin film antifouling. It contains the slicking agents PTFE and Molybdenum Disulfide to reduce surface friction, allowing the hull to slide through the water.** SR-21 **is easy to apply and dries in 15 minutes. Color changes upon immersion.**

BLUE - 1221 | ORIGINAL - 1921

## CLEAN-CORE TECHNOLOGY

Pettit's new **CLEAN CORE TECHNOLOGY** is an enhanced paint film that contains fewer heavy metals, and allows a more consistent release of biocides. The result is more effective antifoulants that release up to 50% less heavy metals into the environment.

**APPLY THE FUTURE**

**Unepoxy® Plus** is a durable, hard modified epoxy antifoulant that **offers more protection for your dollar.** It dries to a hard finish that Unepoxy® Plus has excellent adhesion and can be applied over most copper load, Unepoxy® Plus offers more protection than standard hard epoxy paints.

CLEAN-CORE

BLUE - 1218 | GREEN - 1318 | RED - 1618 | BLACK - 1818

**The Protector®** has earned its solid reputation by providing **excellent long lasting protection. A very high copper load makes it a** good choice for tropical and other warm waters where extreme fouling exists. When left in the water, it provides dependable protection for up to two years of service. Its hard modified epoxy base provides a durable, abrasion resistant finish ideal for powerboat or sailboat use. Compatible with most finishes. (Available on the West Coast Only)

## ABLATIVE ANTIFOULING

**Ultima® SR 60** delivers exceptional, multi-season, dual-biocide with slime resistant Irgarol. Contains 50% more copper than Micron® Extra, to provide stronger protection in even the toughest conditions. Its ablative surface wears away over time, reducing build up. Utilizes the same proven formula as Ultima® Pro from our Pro Coatings line. Note: Due to extremely high copper load, some variations in color and finish may occur.

BLUE - 1032 | GREEN - 1033 | **RED - 1036** | BLACK - 1038

**Ultima® SR 40** utilizes a high copper load (40%) combined with **Irgarol to offer outstanding dual biocide, multi-season control in all** types of fouling. Its ablative surface minimizes coating build-up to keep underwater surfaces smooth, while providing a continuous supply of fresh biocides. Can be hauled and re-launched without repainting. Formerly sold as Ultima® SR and Horizons® Pro, this formula has a proven track record as one of America's premium ablative bottom paints.

BLUE - 1092 | GREEN - 1093 | **RED - 1096** | BLACK - 1098

**Ultima® Eco combines the breakthrough, metal-free Econea™** biocide with a powerful slime fighting agent for dual-biocide, multi-season protection. This copper-free formula can be safely used on all substrates, including aluminum. It provides excellent antifouling protection, with an ablative surface that makes it the perfect choice for both power and sailboats. Ultima Eco's surface wears away over time, eliminating paint film build up and the need for sanding. It can be used on almost all previously painted surfaces in good condition.

IVORY - 1108 | BLUE - 1208 | **RED - 1608** | BLACK - 1808

**Ultima® SSA** is an economical, yet extremely effective ablative bottom paint. Utilizing the proven formula of Premium® SSA, Ultima® SSA provides excellent antifouling protection with an ablative surface that makes it an excellent choice for both power and sailboats. Ultima® SSA's surface wears away over time, eliminating build up or the need for sanding. It can be used on most previously painted surfaces in good condition. One or two coats per season are recommended for optimal performance.

BLUE - 1281 | DK BLUE - 1282 | **GREEN - 1381** | RED - 1681 | BLACK - 1881

**Hydrocoat® SR** is the world's first dual-biocide, water-based, season protection. Hydrocoat SR uses Composite Copper Technology combined with an organic algaecide to offer outstanding protection against hard and soft fouling, for better antifouling protection and a greener earth. Ablative technology eliminates sanding and paint build-up. It is easy to apply and cleans up with soap & water.

BLUE - 1247 | **RED - 1647** | BLACK - 1847

**Hydrocoat®** offers excellent multi-season protection against all **types of fouling. Its innovative technology replaces the harsh solvents** found in most bottom paints with water, resulting in an easier application and clean up, with no heavy solvent smell. Hydrocoat's ablative surface wears away with use, exposing fresh biocides while eliminating paint build up and the need for sanding. Its unlimited dry time to launch allows for painting in the fall.

BLUE - 1240 | **GREEN - 1340** | RED - 1640 | BLACK - 1840

**Horizons®** offers excellent protection from fouling along with all of the benefits of ablative paints. Economically priced, it performs well in all conditions, including severe fouling waters. A heavy load of copper provides dependable, multi-season performance. Horizons® ablative surface wears away with use, exposing fresh biocides while eliminating paint build up and the need for sanding. Can be launched and re-launched without repainting making it an excellent choice for trailered boats.

## ALUMINUM ANTIFOULING

**Alumacoat® SR** provides worry-free, non-corrosive, ablative antifouling protection for underwater metals including aluminum. Slime resistant, copper-free formula wears away with use, exposing fresh biocides while eliminating paint build up and the need for sanding. Contains PTFE to reduce friction and keep underwater surfaces smooth and clean. Alumacoat® SR can safely be used on all aluminum hulls, outdrives and outboard motors, and can be hauled and re-launched without recoating.

BLACK - 1860

**Alumaspray® Plus** is an aerosol antifouling paint specifically designed for use on aluminum outdrives and outboard motors without the need for a barrier coat. Contains no TBT or copper compounds, and will not cause galvanic corrosion. Its self cleaning, copolymer finish washes away at a controlled rate when in contact with water. This process constantly exposes fresh biocides and eliminates paint build up. Alumaspray® Plus' offers superior resistance to all types of fouling.

## How Much Bottom Paint Do I Need?

1. Calculate the square footage of the hull to be painted – multiply the length of the hull by the beam then multiply that total by .85

**Length x Beam x .85 = Square Feet of Hull**

2. Divide that number (your square foot total) by the amount of coverage the selected bottom paint offers. This will give you a one-coat total.

## UNDERWATER METALS

**Metal Primer 6455/044** is a two-part, self-etching wash primer for use **above or below the waterline on all bare** metals. Offers excellent adhesion to metal hulls, keels, centerboards, and underwater running gear. Overcoat with epoxy primer, tie-coat primer, topside enamels, or antifouling paint.

**Underwater Metal Kit 6456** combines convenient sized containers of both our Metal Primer and **Tie Coat Primer in one easy pack**-age. This kit is specifically designed for the painting of underwater metal running gear including shafts, struts, props, thru-hulls, and trim tabs.

**Zinc Coat Barnacle Barrier 1792** provides aerosol spray protection to bare metals above or below the waterline. Its smooth, hard surface will self-clean in service and inhibits corrosion on steel, stainless, cast iron, copper, bronze, galvanized and lead.

**Tie Coat Primer 6627** is a general purpose chlorinated rubber primer for use above and below the waterline on metal surfaces or as a tie coat between different types of coatings. When used over Pettit 6455/044 Metal Primer it forms an excellent, easy-to-use system **for use on all underwater running gear.**

**AlumaProtect 4400/4401** is a two-part epoxy primer for use on sand-blasted aluminum where maximum corrosion resistance to fresh and salt water is required. Usually over coated with PettitProtect High Build Epoxy 4700/4701 when used on bare aluminum, pontoon hulls and outdrives.

**Transducer Paint 1793** provides aerosol spray protection to plastic transducer housings and bare metals above or below the waterline including steel, stainless steel, cast iron, copper, bronze, galvanized steel and lead. Its smooth, hard surface will self-clean in **service and inhibit corrosion.**

## CLEANERS / DEWAXERS

**Bio-Blue Hull Surface Prep 92** de-waxes, cleans, and prepares bare fiber-glass for painting. Easily removes unwanted contaminants and mold release agents prior to painting. When used with 6998 Skip Sand or 6999 Sandless Primer and antifouling paint, it is part of an easy 1-2-3 system.

**Bottom Prep D-95 Fiberglass Dewaxer** is a special blend of solvents, formulated specifically to cut through and remove mold release, grease, and previously applied wax from the gelcoat.

## FIBERGLASS PRIMERS

**Skip Sand Primer 6998** eliminates the need to sand before applying antifouling paint providing a system of excellent over-all adhesion. It may also be used between two-part epoxy primers and antifouling paints. 6998 has an extended overcoating window of a few hours up to 7 days to apply bottom paint.

**Sandless Primer 6999** eliminates the need to sand before applying antifouling paint providing a system of excellent overall adhesion. It may also be used **between two part epoxy primers and** antifouling paints. 6999 has a short over coating window and should be used when fast overcoat times are needed.

## STEEL PRIMERS

**Rustlok Steel Primer 6980** is an easy to apply, moisture and corrosion proof primer for use on all cast iron and steel surfaces, including galvanized andstainless. Its water impervious barrier offers excellent adhesion and corrosion protection even over rusted surfaces.

**Trailercoat 6981** is an easy to apply, bright silver, moisture and corrosion proof top coat for use on all cast iron and steel surfaces, including galvanized and stainless. Its water **impervious barrier offers excellent adhesion** and corrosion protection even over rusted surfaces.

## EPOXY PRIMERS

**Pettit Protect® High-Build Epoxy Primers**

GRAY 4700/4701 is a heavy duty, **two component, epoxy coating for use where maximum resistance to fresh or salt water is required. It reduces water absorption making it an excellent choice for osmotic blister** prevention and repair. **Its high-solids formula allows for quicker and easier application with fewer coats necessary for effective protection. It also offers dependable corrosion protection on all underwater metals.** Pettit Protect® White 4100/4101 offers all the benefits of Gray Pettit Protect® High Build Epoxy Primer in **a white color that will not bleed into other primers, enamels or antifouling paints. Specifically designed** for use below white and light colored Vivid® **bottom paints. Its use reduces the number of finish coats** needed to achieve full color. Pettit Protect® like most epoxies, it will chalk if not top coated.

Note: **All swatch colors shown in this brochure are approximations of the actual paint color in the can or mixes.**

# Interlux Wood Solutions

## Cetol® Marine

Cetol Marine with Next Wave™ UV-absorbing technology is a durable translucent protective wood finish for use above the waterline on interior and exterior woods. Next Wave technology is a unique UV package of advanced Ultra Violet absorbers that provide greater protection, durability and longevity. Cetol Marine has excellent weathering properties and allows for the natural expansion and contraction of wood which prevents Cetol Marine from cracking. Cetol Marine is also micro-porous, allowing moisture to escape from the wood which will prevent blistering and flaking of the finish. Cetol Marine is an easy to apply, low maintenance alternative to wood oils and other wood treatments.

- **Cetol Marine** produces an attractive dark amber appearance on wood.
- **Cetol Marine Light** produces a lighter amber appearance on wood.
- **Cetol Marine Natural Teak** has a rich golden color on wood.
- **Cetol Marine Gloss** provides a high-gloss, hard-wearing, UV protection and is developed as a topcoat for Cetol Marine, Cetol Marine Light and Cetol Marine Natural Teak.

## Perfection® Plus

A high performance, two-part clear polyurethane, Perfection Plus delivers the ultimate in performance longevity resistance. The chemical cure urethane formulation combines with a best-in-class UV and HALS package to offer outstanding chemical and abrasion resistance and superb gloss and gloss retention that lasts four times longer than conventional one-part varnishes.

## Schooner® Gold

This product offers a higher film build per coat that allows both professional applicator and boat owners to achieve great results faster and in fewer coats. This 'thicker' varnish will require thinning, in most conditions, to achieve optimum flow. Schooner Gold has shown to out-perform other leading brands and will offer superb longevity and durability.

## Schooner® 96

Combines the very best of classic varnish craftsmanship with the newest technology. Schooner Varnish contains ultra-violet filters to screen the sun's damaging rays for remarkable durability, excellent water resistance and silky application. Superior self-leveling property and a bright, clear, high-gloss finish with the traditional golden color.

## Compass® Clear

NEW

Compass Clear is a highly durable one-part polyurethane gloss varnish that contains a unique combination of ultra-violet additives, HALS, surface stabilizers and antioxidants to ensure long-term gloss and clarity. Polyurethane resin adds incredible abrasion, chemical and water resistance. Superior leveling properties along with silky application allows you to achieve a professional, long lasting finish. Compass Clear is suitable for all internal and external woods, and can be applied directly to oily timber, such as teak.

## Goldspar® Satin 60

A modified polyurethane, low luster varnish designed for application to interior wood surfaces. It produces a warm, rich satin sheen finish that resists scratches and stains and applies easily enough to yield truly professional results by either brush or spray. Goldspar Satin Varnish 60 is ideal anywhere a low luster finish is desired, such as cabin soles, cabinets, counters and tables.

## Premium Teak Restorer

Cleans, restores and brings back the natural color of teak and other hardwoods. Gentle formula, does not bleach or damage surrounding fiberglass, wood, metals and painted surfaces. Contains Tenside cleaners, which are excellent at removing oil and dirt.

## Premium Teak Oil

Traditional Scandinavian formula providing ultimate protection against the elements. Formulated with a rust inhibitors, protecting metal from rusting. Easy to apply, fast drying, warm golden color for exterior and interior use. Can be applied to damp or dry wood, for best results apply to dry wood.

# Premium Yacht Paint Solutions That Add Value

## Topside Finishes

### Perfection®

A high-gloss, high-performance two-part polyurethane that combines a long lasting abrasion and chemical resistant finish with superb protection from the detrimental effects of UV rays. Its abrasion resistance makes it ideal for application to decks and gunwales. Perfection can be used anywhere above the true waterline on properly prepared fiberglass, wood, aluminum, steel and epoxy. The superb high-gloss characteristics, long-lasting color retention and durability makes Perfection the finest coating available. **Professional quality results are made easy with Perfection.**

# Interlux® Antifouling Range – Premium Protection

## Micron® Technology

### Micron® 66®

**Top of the Micron range – Award-winning, self-polishing copolymer technology with Biolux® SPC.** Micron 66 is a unique long lasting Self Polishing Copolymer with Biolux formulated to provide a level of antifouling protection not previously available in any paint. Micron 66 provides maximum protection even during stationary periods at the dock or mooring. Not for use in fresh water or on aluminum.

Red YBA472 | Black YBA473 | Blue YBA470 | Green YBA471

### Micron® Extra

**Along with Micron 66, Micron Extra is also in the 'Best Performance' classification from Interlux. Superior protection, long lasting and minimum maintenance during haul-outs.** All of our Micron range is multi-seasonal. Biolux Technology blocks slime and improves antifouling performance. Not for use on aluminum.

Red Y5692 | Black Y5693 | Dark Blue Y5696 | Blue Y5690 | Green Y5691 | Gray White 5694 | Brown 5695

### Micron® CSC

**The 'Classic Micron' in the Micron Family.** 25 years later and counting, Micron CSC continues to be the reliable choice, with premium performance & great longevity. Haul & re-launch without repainting. Not for use on aluminum.

Red Y5582 | Black Y5583 | Blue Y5580 | Green Y5581 | Shark White Y5584

### Micron® CSC High Solids

**A higher solids version of Micron CSC, Micron CSC HS offers a reduction in Volatile Organic Compound (V.O.C) & overall solvent emissions.** Yields a thicker paint film which will optimize performance longevity. Bright colors. Not for use on aluminum.

Red YBC582 | Black YBC583 | Blue YBC580 | Green YBC581

### Micron® CF

NEW

**Micron CF is a copper free multi-season antifouling that uses Biolux® Slime Blocking Technology to combat slime and Econea™ to ward off hard growth like barnacles and zebra mussels.** Like all Micron technology paints Micron CF is a polishing paint that reduces paint build-up and smoothens overtime reducing friction and improving fuel efficiency. Micron CF furthermore is a high solids formulation, meaning it is V.O.C. compliant which signifies reduced solvent emissions into the atmosphere. Micron CF has bright crisp color and will not patina at the waterline. Micron CF can be used on all substrates including aluminium.

Blue YBD100 | Green YBD101 | Red YBD102 | Black YBD103 | Shell White YBD104

### ACT

**Best value Ablative Antifouling protection.** Uses Ablative Technology to provide excellent season-to-season protection. Ablative Technology enables it to erode away with use and eliminates the build-up of old spent coatings and the heavy sanding needed to remove them. ACT provides excellent protection in waters with moderate to heavy fouling. Not for use on aluminum.

# Gelcoat Blister Prevention System

APPLICATION PROCEDURE FOR NEW OR PREVIOUSLY UNPAINTED FIBERGLASS HULLS

**Note: If hull has previously been painted, the antifouling paint will need to be removed back down to gelcoat. Once all paint has been removed follow application procedures below.**

**Ensure you are using the proper personal protective equipment (PPE).**

## PREPARATION

1. **Mask off waterline and other areas** with 3M™ blue masking tape.

2. **There are two methods for de-waxing/cleaning the hull:**

### Option 1

- **Apply Fiberglass Surface Prep YMA601 with 3/8" nap roller** on entire surface to be de-waxed. Work in small areas, in order to ensure product is removed before drying.
- **Scrub with Fiberglass Surface Prep YMA601 with a 3M™ Doodlebug™** and a maroon or brown Scotch-Brite™ abrasive pad. Ensure that all areas have been thoroughly scrubbed with the Doodlebug™ and pad. Near waterline or hard to reach areas, use extra care to thoroughly scrub these areas.
- **Use wet rags OR spray down with a fresh water hose.** Wipe off all trace of Fiberglass Surface Prep YMA601. Ensure that rags are changed frequently and not reused.

### Option 2

- **Remove all surface contaminants by wiping down the surface** with Fiberglass Solvent Wash 202, using the 'Two-Rag' method. Ensure that rags are changed frequently and not reused.
- **Repeat wiping with Fiberglass Solvent Wash 202,** using the 'Two-Rag' method until surface is de-waxed/cleaned.

3. **Verify that all wax was removed from the surface** by using a spray bottle of water and checking for water beading. Repeat step 2 if any areas have been found to bead up again.

4. **Once the surface is clean, sand the gelcoat thoroughly** using 80-grit sandpaper. Ensure that sandpaper is changed frequently.

5. **Remove sanding residue by wiping down the surface** with Fiberglass Solvent Wash 202, using the 'Two-Rag' method. Ensure that rags are changed frequently and not reused.

## 3M Accuspray™ Spray Gun Model HG18

- The HG09 Accuspray primer gun has been reworked, improved, and renamed - it is now the HG18.
- The HG18 trigger is wider so it is more comfortable.
- We have shortened the reach to make the pull easier.
- An improved air valve gives users more precise control. Plus, we've added a reinforcing washer to the air fitting to prevent over tightening from damaging the gun body. And speaking of the gun body, there is now more internal reinforcement — so it can survive accidental abuse. We've even added a gray body panel, so technicians can easily spot their primer gun.

## Roloc™ Green Corps™ Grinding Discs

3M™ Roloc™ Grinding Discs are a handy, quick-change system for disc grinding that fits any standard 1/4" drill. Utilizing a quick 1/2 turn on and off the 3M Roloc disc assembly (05539, 05540 & 05541), this system speeds up disc changing and cuts down time. 3M Roloc discs are color-coded. The grit of any disc can be determined by the color of the plastic holding button: 50 grit - Green; 36 grit - Brown; 24 grit - Black. The 3M Roloc Disc Assembly has a hard rubber backup pad that comes complete with a 2" x 1/4" shaft.

# DRY PAK®

## Talk, Listen and Shoot Pictures Through the Case!

If the thought of being without your cell phone, PDA, camera or other valuables when you're out on the water makes you shudder, you need an award winning DRY PAK! DRY PAKs hermetically seal out water, sand and dust. Simply twist the knobs to open; twist back down to seal. It's that simple. If you drop it in water, it will float and your belongings are protected, period! Although we identify only a few popular uses and activities for each case, it's highly likely that you'll find other applications for your DRY PAK. If you have a specific item that you want to protect, measure it first and check the maximum circumference dimensions that we provide.

## Multiple Port Shower Sump

This compact shower sump system is designed to meet the higher demands from today's boating industry where more and more equipment is used. This also includes the fresh water system onboard and involves showers, dish-washing machines, galley sinks, etc. The shower sump turns on/off automatically using our Ultima switch technology and has multiple inlet ports for handling waste water from more than one tapping point. The check valve on the outlet stops water from flowing back into the tank. The tank has a tight-fitting lid to minimize splashing and odors. To further aid in cleaning, the system includes an easily removable mesh filter.

## Remote Drain Control

This Remote Drain Control System for livewells eliminates the problem of plugging and unplugging drain while fishing. The remote drain control system is designed with the fisherman in mind, opening or closing of drain is accomplished from the driver's seat. This system features a totally unique valve that fits 3/4" tubing. The control cable has a stainless steel slide wire, plastic outer jacket, molded plastic threaded barrel with brass nut, 8 1/2 feet long, with black matte finished knob in push-pull version. The molded black plastic flush control is a single round hole mount that has no knobs or lever sticking out to bend or corrode.

### The Pro-Air System Air Pump

has advanced design features that are engineered under rigid quality control conditions to insure long lasting dependable oxygen-rich air source to your livewell or baitwell. The pro-air system is capable of aerating both front and rear livewells at the same time. The pump is constructed with a rubber base for quiet operation. Pro-air system air stone mounts, which are included, provide a trouble-free installation in livewells so that there are no loose or floating parts inside with the fish. The air stone provides small air bubbles that are most efficient for leaching oxygen into the water. The pro-air system comes complete with pump, two air stone mounts, two air stones, an attractive switch panel for controlling the pump and twenty feet of air line tubing. The entire system is attractively packaged for display in your store!

## Max-Air Livewell Venturi

Independent marine biologist testing shows that this type venturi livewell fitting is the most efficient aeration system available. The venturi system draws fresh air outside the livewell and injects tiny air bubbles into the water flowing into the livewell. With the aerated water entering the well at a lower level than with traditional spray heads, the entire well is more thoroughly aerated. The reduced restriction of this fitting allows more water to flow from the pump than traditional spray heads. This fitting works well on fresh water intake or recirculation systems. The faceplate inlet can be mounted anywhere above the waterline (exposed or concealed). Max-air venturi packaged with face plate and six feet of tubing (1/8 " tubing required-speedo tubing recommended).

## In-line Bilge Blowers

Attwood's new and improved Turbo 4000 Series II sets the standard for in-line blower performance. Utilizing advanced fan blade design techniques, Attwood has developed a blower system that matches air flow of existing in-line blowers at a significantly reduced noise level. For added durability, Attwood incorporates an engineered plastic housing that resists deformation during installation and prevents blade to housing interference.

## Permanent Below Deck Fuel Tanks

Our tanks are your single source for the ultimate in below-deck technology. Unlike aluminum tanks, this comprehensive line of cross-linked polyethylene models is a distinctive Moeller innovation: featuring corrosion/pit resistance and exclusive Moeller Tite™ pioneering. Each tank is complete with Hose Tite™, machined aluminum fill spouts, withdraw, and vent fittings molded directly into the shell.

• Utilizes rotationally molded, cross-linked polyethylene plastic, allowing for complex shape designs beyond conventional and restricted aluminum tanks.
• Our fittings hold the highest O.D. and I.D. tolerances in the industry, ensuring you the highest level of input flow available during tank refueling.
• Machined aluminum 3/8" withdraw fitting has 360° rotational capability for hook-up convenience.
• Ideally suited for gasoline and diesel use with appropriate return kit (Part No. 35724-10).
• Conforms to all ABYC, NMMA and U.S. Coast Guard regulations.
• Helping you properly secure your tank, convenient hold down grooves molded directly into tank shell work great with Moeller's Permanent Fuel Tank Hold Down Kit (Part No. 35710, sold seperate)

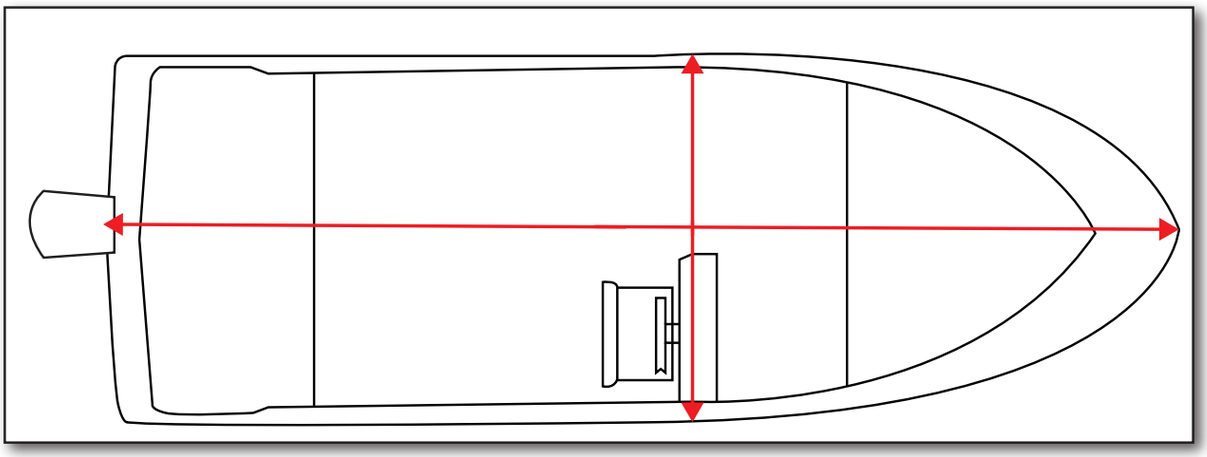
- Motor Hood where applicable



BOATER SPORTS MARINE PRODUCTS

***Increase The Life Of Your Boat Cover:***

Avoid letting water, snow or other materials like leaves and sticks to stand on the cover - Use support poles, straps, or bows. Always tie boat cover down securely. Take precautions with padding the windshield, trolling motors, depth finders, etc. before installing boat cover. Allow boat cover to dry thoroughly before folding for storage.

***How to Size Your Boat***

- When purchasing your boat cover, you'll need to have accurate measurements.
- To find the centerline length, ***measure from the tip of the bow to the center of the stern***.
- To find the beam width, ***measure the widest point of your boat***.

## "Taper-Lock"™ Seat Accessories

**The Taper-Lock** has a bushing on the end of the post that is molded from DuPont Delrin, and each one is slightly tapered. The taper matches to a corresponding taper in the socket of the pedestal base. This allows the pedestal to fit snugly and disengage as needed. An additional feature is the locking "tab" which helps prevent the pedestal from turning and also helps keep the post firmly secured.

## Drum Brakes

# Free-Backing Brake Components

- Aluminum Wheel Cylinder
- Stainless Steel Springs
- Brake Pads are bonded and riveted with bronze rivets to backing plate.
- Superior Saltwater performance over standard drum brakes.
- Free Backing!
- Absolutely, positively the most corrosion resistant drum brake period!

The Galv-X system is composed of inorganic polymers which bond metallic zinc flakes to the metal surface.

When mounted, the wheel cylinder piston points forward

## Vented Disc Brakes

New all aluminum caliper, (380 series), Sheds heat five times faster than traditional cast iron calipers, pulling heat away from the rotors. New Bi-metal piston combines a stainless steel outer piston with an aluminum inner sleeve to shed braking heat fast. The stainless steel outer piston greatly enhances piston withdrawal after braking. Oversize rubber boot is 50% thicker by design and provides a more positive and faster piston withdrawal. This feature, along with the special coating actually reduces brake heating even after repeated stops. 2 Required per axle.

## Reverse Lock Out Solenoid

Unlike drum brakes, disc brakes generate full braking power in reverse. If your actuator does not have a reverse lock out lever or switch, a reverse lockout solenoid should be installed at the actuator before installation of disc brakes.

| | | | |
|---|---|---|---|
| **81103** (DMI#657203) | Reverse Lock Out Solenoid | $ 83.75 | 2975025 |

## Brake Actuators

The unique all aluminum master cylinder incorporates the shock absorber into the master cylinder assembly. This exclusive product feature was designed into our master cylinder in order to provide the tow vehicle operator with a warning signal when the brake fluid is at a low level. Our oversized master cylinder provides the higher pressures required to run disc brakes and the added brake fluid volume to run both tandem and tri-axle configurations. Positively provides for quicker stops! Model 66 provides for 6,600 lbs capacity.

| **82405** (DMI#5765122) | Disc Brake Kit | $611.00 | 5739756 |

## Flexible Hydraulic Brake Line Kits

• Designed to be used on trailers using either surge brake actuators or power brake actuators (vacuum/hydraulic, air/hydraulic, electric/hydraulic).
• Brake lines provided are DOT/Flexible hoses approved for use on all trailer brakes including disc brakes with floating calipers. • All fittings are brass for the ultimate in corrosion resistance.

## Single Axle Brake Line Kit

This brake line kit is designed to be used to replace existing brake lines or installed on a trailer that has not had brakes before.
**Kit includes**: 2- 18" DOT flex hose, 1- 76" DOT flex hose, 1 - 240" PSI hose, 5-cable ties, 2-Union "T" connectors, 2 "T" clamps, 8-self taping screws & 4 cable clamps.

## Bearing Buddy w/Auto Check - S.S. - 1980A-SS

**• Works like the regular Bearing Buddy, but has new exclusive Auto Check visual lubricant level and pressure indicator. When the hub is full of grease, the blue Auto Check ring rests about 1/8" outward from the steel retaining ring. A spring loaded piston behind the Auto Check ring pushes against the grease which generates pressure inside the hub to keep water out, thus offering the bearing protection. Fits 1.980 bore hole diameter.**

## I/O Trailering Clips

These trailering clips provide an inexpensive way to protect stern drive units while trailering or storing. They relieve the stress on the tilt/trim system by transferring sterndrive weight from the hydraulic cylinders to the transom bracket. Clips prevent damage from weight surges during trailering. These clips will increase the life of the o-rings, internal seals, and the valve in the hydraulic system. May be trimmed to fit shorter rams.

## BoatBuckle Retractable Transom Tie-Down Sys.

Mount permanently to your trailer! Made of a high-impact boot that can withstand a wide range of temperatures. This tie-down system is submersible and water-resistant. Tie-downs extend up to 48" and retract automatically. No more lost or knotted tie-downs! Display packaged in pairs.

| | | | |
|---|---|---|---|
| **F08893** (DMI#2000939) | Set | $112.40 | 5936745 |
| **F14254** (DMI#2000942) | Mounting Bracket | $ 13.85 | 5936828 |

## Retractable Transom Tie-Down

A newly designed Transom Tie-Down, the Retractable Transom Tie-Down compares to any on the market. Our Retractable Transom Tie-Down mounts to the trailer permanently. The top hook retracts from the tie-down housing and attaches to the transom eye or anchor position on the boat. The Retractable Transom Tie-Down is then tightened with the ratchet handle until taut, and the best part, it's all done with one-hand operation! It's that simple!

***The Bucket Seat is an exciting new inflatable concept from WOW. Designed with an ergonomic shape, this item can be used as a tow tube behind the boat as well as a relaxing lounge in your favorite body of water. As a towable tube for boating the rider can sit in it like a seat for an easy ride or they can kneel on the backrest for a more challenging one. Once the ride is over, sit back and relax in one of the most comfortable lounges you will find for the water. The Bucket Seat is a one of a kind design. Get the most for your money with the 2 in 1 Bucket Seat towable and lounge.***

**14-1070** (DMI# Bingo 3 Cockpit Towable **$399.99** **4829914**

***The Bingo Series was specifically designed with family fun in mind. Another original design from WOW, this action packed towable gives your family 2 rides for the price of 1. The Bingo tubes are the only cockpit tubes on the market with front and back tow points. Ride in the seated position from the front tow point or connect the rope to the back tow point and ride chariot style. The Bingo comes with a free 11" 4K EZ tow connector which makes it simple to switch tow points even while on the water. The deep cockpit seating with high backrest makes the riders feel more secure while the new drop speed bottom glides smoothly over the water creating less drag on the boat and therefore better gas mileage.***

You'll be the envy of the lake with SPORTSSTUFF's ROCKIN' MABLE or ROCKIN' SUPER MABLE! The MABLE series has been one of the world's most popular towables since its inception. We've raised the bar with ROCKIN' MABLE and ROCKIN' SUPER MABLE. They have all of the same popular features as the MABLES, but with a convex bottom surface that provides super fun rockin' action! ROCKIN' MABLES slide effortlessly side-to-side, so the kids will have more fun, even at slow speeds. They're 2 tubes in 1, ride them sitting down or kneeling! The big wrap around backrest, soft knee/seat pads and a magnitude of strategically placed handles keep you on the tube, no matter how wild the action! The front & rear Dual Tow Points are equipped with SPORTSSTUFF's patented aluminum Quick Connects for easy hook-ups. This tube is built to last, with a double-stitched 840 denier nylon cover and 30 gauge vinyl bladder. Inflating and deflating is a snap with the 2 patented Speed Safety Valves.

*Wrap Around Backrests • Unique Convex Bottom Surface • Dual Tow Points • Seating Pads • Double Webbing Foam Handles with Knuckle Guards • Patented Speed Safety Valve • Self Bailing Drain Vents • Double-Stitched Heavy-Duty Full Nylon Cover with Zipper • Heavy-Duty K80 PVC Bladders*

Get wacky on SPORTSSTUFF's WACKY WHOPPER! Its dual wave shape provides incredible excitement for 1, 2 or 3 riders. Be sure to switch positions often, as the ride in the center, suspended high above the water is a completely different sensation than riding on the sides. Take turns riding Wacky Whopper lying down or sitting up, there are plenty of handles to hold onto. Soft and comfortable knee and elbow pads are strategically positioned for peak performance. Wacky Whopper is equipped with a patented Speed Safety Valve for convenient inflating and deflating and a heavy-duty aluminum Quick Connect for easy hook-ups. The rugged double-stitched 840 denier nylon cover and 30 gauge vinyl bladder ensure long service. WACKY WHOPPER's dual wave shape and extra large size, 94 x 70in. (deflated size), make it a super comfortable lounge, that is if you can get the kids off it!

**AHRE-2**
**AIRHEAD REVOLUTION** | $319.00 | 7920999
**Deluxe 2 Rider Spinning Towable**

Feel the G-forces on REVOLUTION! It provides unparalleled spinning fun for 2 riders. Lie down or sit up, either way, you're going to spin like there's no tomorrow! The strategically placed inflatable topside center fin and 2 leg holding fins keep you from getting thrown by centrifugal force. If you prefer not to spin, just thread the tow rope through the No Spin Strap. At the center of the bottom you'll find the tow point, a super strong stainless steel swivel. It's held in place with Kevlar strapping sewn to multiple layers of heavy gage tarpaulin material. REVOLUTION is built to last; a rugged 840 denier nylon cover fully covers the high impact 30g K80 PVC bladder inside. Two neoprene panels and 8 handles with neoprene knuckle guards contribute to a comfortable ride. A Boston valve provides quick inflation and deflation. 80 in. (deflated).

**AHTF-2**
**AIRHEAD TRANSFORMER™** | $279.00 | 3817999

AIRHEAD TRANSFORMER is 2 tubes in one! It transforms from a deck tube to a cockpit tube in seconds! Young children will especially enjoy it in cockpit mode. The inflated floors and deluxe handles with neoprene knuckle guards will help them feel safe and secure. Teens and adults normally prefer a wilder deck tube ride. To transform this 2 rider towable from mild to wild, simply insert the 2 inflatable bladders to fill the cockpit and roll the neoprene pads into place. If you have 1 small child and a teen or adult, you can mix it up and ride one side cockpit, the other deck! Transformer is built to last from rugged 840 denier nylon and 30 gauge vinyl. The heavy duty Kwik-Connect and Boston valve provide quick and easy rope hook-ups, inflating and deflating. 70 in. x 75 in. (deflated size).

$399.00 | 9925900

**AHTF-3 AIRHEAD TRANSFORMER™ 3**

AIRHEAD TRANSFORMER is 3 tubes in one! Designed for 1 to 3, ride it deck-deck-deck, cockpit-deck-cockpit or cockpit-deck-deck! The center rider lies down, deck tube style. The outside riders can choose to also ride lying on the soft comfortable pads. Simply remove the inflatable inserts and roll up the deck pads in seconds and transform it into a recumbent cockpit! Young children will especially enjoy the safety and security of cockpit mode. The inflated floors and deluxe handles with neoprene knuckle guards will help them feel safe and secure. Teens and adults normally prefer a wilder deck tube ride. Transformer 3 is built to last, with rugged double-stitched 840 denier nylon and 30 gauge vinyl bladders. The heavy duty Kwik-Connect and patented Speed Safety Valve provide quick and easy rope hook-ups, inflating and deflating. 112 x 92 in. (deflated size).

## AHSSL-4 AIRHEAD® MEGA-SLICE™

DMI#596517

| $289.00 | 4318950 |
|---|---|

MAP

MEGA-SLICE is the colossal 100 inch diameter (deflated) member of AIRHEAD's SLICE-series, the industry standard in deck tubes. The exclusive tapered profile, thick at the front and thin at the back, enhances your tubing experience. The thicker front allows a more natural and comfortable rider position and prevents "submarining". It's super easy to climb onto MEGA-SLICE from the water because it's thin at the back and has 3 boarding straps to grab onto. The 8 deluxe handles with neoprene knuckle guards provide a great grip for 1, 2, 3 or 4 riders. An Indy Cap covers the Boston valve. Connect MEGA-SLICE to an AIRHEAD Tube Anchor and you have an instant 100 inch swim platform!

**AIRHEAD® TUBE ANCHOR™**

Turn your towable into a portable swim platform with AIRHEAD's TUBE ANCHOR. While the kids are lounging or playing on the tube, adults get to enjoy a little quiet time on the boat, dock or beach! AIRHEAD's Tube Anchor bag is constructed of durable reinforced PVC/polyester tri-laminate. Simply fill it with rocks or sand and drop it into the water. The buoy has a convenient mesh compartment for stowing slack from the 20 foot long rope. A giant acetyl snap hook allows for easy hook ups to your tube's handle or tow strap.

| $15.95 (DMI#586466) | 5190959 |
|---|---|

**TB-101 TUBE KEEPER™** ***Secure Towables to Your Boat for Safety!*** **DMI#586466**

Tired of lying on top of your tubes to keep them from flying out of your boat? No place to sit? TUBE KEEPER to the rescue! It saves essential passenger space and prevents serious injuries by securing towables to your boat's stern. Simply attach the straps around the tube's handles. Then attach with either the giant 3-1/4 in. suction cups or loop the stretch cords around a cleat or rail. The 2 in. wide adjustable straps are easy to tighten for a secure hold.

# PUMPS & ACCESSORIES

## 3.0 PSI PUMP
57-1508

| $65.95 (DMI#601026) | 5504139 |
|---|---|

SPORTSSTUFF®

The monster 3.0 PSI PUMP is a 110-volt inflator that's ideal for inflating and deflating large items and filling towable tubes quickly. It's fully loaded with assorted nozzles to adapt to different valves and has high-volume output for fast inflation. The folding carry handles makes it portable, and the rubberized padded feet will keep it stable on any surface. Includes a 10ft. heavy gauge cord and 120v AC grounded plug.

*Folding Carry Handle • 42in. Flexible Hose • 3.0 PSI • Assorted Size Locking Nozzles • 10ft. Heavy Gauge Cord*

## COMPRESSOR ADAPTER
10-1010

| $5.99 (DMI#5960012) | 3670359 |
|---|---|

COMPRESSOR ADAPTER allows you to inflate or top off your tube using a standard bicycle tire pump or air compressor. This handy adapter only fits on the screw-on type valves like the "boston valve" (aka "speed valve") or multi-valve. Not for use on push-in style valves like the Speed Safety Valve, over-sized safety valve, or safety valve. Review your manual to see what type of valve your product uses.

*Pocket Size Fast & Convenient Adapter • Great For Trips • Works with Boston Valve (Speed Valve) & Multi Valve*

## LP1 DOUBLE ACTION HAND PUMP
57-1004

| $19.95 (DMI#601018) | 3671125 |
|---|---|

This lightweight plastic pump is designed to inflate and deflate inflatables with less effort due to its continuous stream of output on both the up and down strokes. It easily doubles as a handy bilge too! We also recommend using this pump to top off your products after inflating them with a 12v electric pump. It's the perfect size to keep on your boat for topping off tubes.

*2.0 Liters Per Stroke • Inflates & Deflates • Assorted Nozzles • Bilge Capability • Comfy Handle • Small Size & Lightweight*

## PVC REPAIR ADHESIVE & SEALANT
10-1001

| $5.99 (DMI#601006) | 3670359 |
|---|---|

Repair your favorite PVC products that you thought could no longer be used with Sportsstuff PVC REPAIR ADHESIVE & SEALANT. This amazing product has the ability to fix those pesky leaks saving you money so you can get back out on the water again. It's extremely affordable and easy to use (not for fabric or nylon covers.) Simply follow the basic instructions that come with the product and you'll be off and tubing again.

*Repairs & Seals PVC Products (Not for Nylon Covers or Fabric) • Compact for Easy Storage & Transportation • Fix Your Tube Fast!*

## WATERSPORTS GLOVES
60-3000

| $20.95 (DMI#5960075) | 3671259 |
|---|---|

Take your watersports activities to the next level with WATERSPORTS GLOVES. These fingerless towable gloves with padded palm patches allow riders to achieve a secure grip, while helping to alleviate muscle fatigue, blisters, and callouses. The lightweight neoprene construction is soft and flexible. WATERSPORTS GLOVES are stylin' and comfortable, with bright red piping. One size fits most.

*Padded Palm Patch for Maximum Grip • Lightweight & Flexible • Strong Comfortable Neoprene Construction • One Size Fits Most*

## AHP-120S
## AIRHEAD® SUPER PUMP™

| $69.95 (DMI#596306) | 1134495 |
|---|---|

This is the best performing 120 volt air pump available, inflating and deflating at unprecedented speed. Peak pressure is nearly 3.0 psi, plenty of pressure to get boats, dinghies, rafts and reinforced backyard items nice and firm. Four universal adapters to fit all valves commonly used on boats, kayaks, towables and other inflatables. A Pressure Release Valve is included to limit pressure to 1.4 psi for preventing over-inflating. The accordion-style hose locks onto the pump, eliminating annoying disconnections. For added convenience, there's a carry handle and a 10 ft. long power cord. It draws 7.1 amps / 917 watts. Volume is 480 liters/minute.

| $55.95 (DMI#5960121) | 3873359 |
|---|---|

## AHP-120HP
## AIRHEAD® Hi-Pressure Air Pump

Enjoy the performance of this 120 volt air pump. It inflates and deflates quickly and effectively. Peak pressure is 2.5 psi, plenty of pressure to get high end inflatable boats, rafts and reinforced backyard items nice and firm. A Pressure Release Valve is included to limit pressure to 1.4 psi for preventing over-inflating. The accordion-style hose locks onto the pump, eliminating annoying disconnections. Four universal valve fittings fit all popular valves and lock onto the hose. For added convenience, there's a carry handle and a 10 ft. long power cord. Draws 6.1 amps / 730 watts. Volume is 460 liters/minute.

## AHP-12HP
| $59.95 (DMI#596318) | 5693850 |
|---|---|

## AIRHEAD® 12 Volt High Pressure Pump

AIRHEAD's 12 Volt Hi Pressure Air Pump w/ Pressure Release Valve produces 3 times the pressure of other 12 volt air pumps. Great for getting towables, boats and rafts nice and firm for peak performance. Five universal valve fittings fit all popular valves and lock onto the hose. A removable pressure release valve limits the output to 1.4 psi, the perfect inflation pressure for towables. Hooks it up to your car, truck or boat battery with the alligator clips connected to a 10 foot power cord. Volume is 410 liters/min. Maximum pressure is 2.5 psi. It draws 28 amps / 340 watts.

| $17.95 (DMI#5960127) | 5931025 |
|---|---|

## AHP-F1
## AIRHEAD® Hi-Volume Bellows Action Foot Pump

Use your foot to inflate or deflate towables, boats and other inflatables with AIRHEAD's HI-Volume Bellows Action Foot Pump. This durable air pump has a 54" long hose and 3 adapters to fit many valves including Boston and stem. The air displacement per stroke is 2 liters. Since the pump achieves a maximum air pressure of 2.9 psi, you can get your inflatable boats and towables nice and firm. It conveniently collapses to fit under kayak decks or boat seats, so it's a good choice for "topping off" large towables in your boat.

## AHP-1
| $19.95 (DMI#5960119) | 5981250 |
|---|---|

## AIRHEAD® Double Action Pump

This double action pump inflates and deflates towables, kayaks, boats, airbeds, and other inflatables. It delivers a continuous stream of air on both the up and down strokes. Simply turn the release valve counter-clockwise and you're pumping air only on the down-stroke. This is a great option when your inflatable is almost full and there's back pressure. Four universal valve fittings are included to fit Boston valves and stem valves. The accordion-style hose stretches to 5 ft. long and interlocks to the pump, so that it doesn't fall off while you're pumping. Volume is 2 liters / stroke. Very effective for "topping off" large towables in the boat, since peak pressure is an impressive 14 psi.

## AHP-12R
## AIRHEAD® Rechargeable 12 V Air Pump

| $35.95 (DMI#596324) | 6972150 |
|---|---|

This convenient and versatile 12 volt air pump comes equipped with a 120 volt AC charger and a 12 volt charger that plugs into cigarette lighters. When charged, there are no cords to deal with. It's equipped with 3 adapters to fit valves on towables, pool toys, airbeds and other inflatables. It will inflate or deflate continuously for 15 minutes on a charge. Peak air pressure is .64 psi, volume is 260 liters/minute. It draws 11.3 amps / 75 watts. We recommend "topping off" large towables inflated with this pump with a few strokes of AIRHEAD's Double Action Hand Pump or Foot Bellows Pump.

| $19.95 (DMI#596316) | 3751195 |
|---|---|

## AHP-12H
## AIRHEAD® 12V Air Pump

This high-volume 12 volt portable air pump inflates and deflates towables, boats, pools, mattresses and beach toys quickly. Most pumps on the market don't put out this kind of air volume and pressure. The universal valve fittings fit many popular valves including Boston valves and stem valves. For added convenience, the accessory power plug is equipped with a 10 ft. long power cord. Volume is 380 liters/minute. Maximum pressure: 1.2 psi. Draws 11.8 amps / 145 watts. We recommend "topping off" large towables inflated with this pump with a few strokes of AIRHEAD's Double Action Hand Pump or Foot Bellows Pump.

## AHP-120
| $32.95 (DMI#596304) | 5272025 |
|---|---|

## AIRHEAD® Air Pump

This 120 volt canister style air pump inflates and deflates towables, pools, air mattresses and beach toys. The accordion-style hose locks onto the pump and valve fittings, eliminating annoying disconnections. Three universal valve fittings fit all popular valves. For added convenience, there's a carry handle and a 10 ft. long power cord. Volume is 300 liters/minute, maximum pressure is .92 psi. It draws 1.6 amps / 170 watts.

EZ SKI TRAINER

## AHEZ-100 AIRHEAD® EZ SKI
## AHEZ-200 AIRHEAD® BIG EZ SKI

***EZ SKI TRAINER PUTS THE FUN BACK INTO TEACHING YOUNG SKIERS!***

Heading for the lake but dreading the task of teaching another young skier? AIRHEAD EZ SKI to the rescue! EZ Ski is a revolutionary inflatable water ski hybrid with integrated wooden water ski trainers and ski bindings. EZ SKI is engineered for stability while towing (10 mph maximum), so your child will feel very secure. EZ SKI is the ultimate confidence builder, taking the tears, fear and frustration out of teaching new young skiers and replacing it with safety and fun! Your child will enjoy immediate success on the EZ SKI. No more fighting with diving water skis, ski skimmers, bindings, boat wakes or ropes! Children board the EZ SKI right from the swim step or stern of your boat, no swimming required. Children sit comfortably on the inflated seat for start-ups until they're ready to stand up and ski at their own pace. While your children have the time of their lives on EZ SKI, they'll actually be learning to be comfortable with the speed and sensation of water skiing and watersports in general. This awesome trainer teaches basic skiing fundamentals including proper stance, handle position, balance and weight transfer for turning. Patented.

## Paws Aboard Doggy Life Jackets & Designer Doggy Life Jackets

Paws Aboard Doggy Life Jacket and Designer Doggy Life Jackets keep pets safe on the water. The Paws Aboard Doggy Life Jackets provide ultimate buoyancy and high visibility to keep pets safe on the water.
Constructed to provide buoyancy, along with a cozy secure fit, the Paws Aboard Doggy Life Jackets features an advanced breathable mesh underbelly for proper draining and drying, which provides your dog more comfort and healthier conditions than traditional pet life jackets made with neoprene, which can cause heat exhaustion and chafing.
Safety features include the new reflective strips for maximum visibility, the new bright neon-yellow color and the handle on top for quick and easy grabbing.
Other features include adjustable nylon straps, quick-release buckles, along with a heavy-duty yet more comfortable Velcro fastening system around the belly and neck to keep securely fastened.

## Paws Aboard Doggy Boat Ladder

The Doggy Boat Ladder by Paws Aboard is great for any dog you want to take out in the water. This unique dog ladder is also an excellent choice as a boat ramp for use with arthritic, older, or overweight pets. It provides an easy exit, so your pet reduces the risk of seriously straining or injuring joints.

Your pet will find it easy for him to get out of the water and back aboard with this unique boat ramp. You will find it easy to carry, install and store The Doggy Boat Ladder. No more struggling with a wet pet and running the risk of back injury.

- Portable, lightweight and durable
- Easy to attach and remove from any boat ladder with three or more steps
- Reduces pain and strain for pets and owners
- Measures 16 by 64 inches, and it folds in half for easy storage

The ladder/ramp is designed to provide a ramp approach to your watercraft by being securely attached to almost any boat ladder with three or more steps.

The ladder features a slip-resistant ribbed design that's safe for all pets. The conveniently designed ramp will detach and float next to the watercraft when the boat ladder is needed for human use. This unique dog boat ramp can be attached and removed in seconds and includes a universal grip that fits almost all boat ladders with three or more steps. The Doggy Boat Ladder is rust and corrosion-proof. The highly-durable ramp washes easily with soap and water and is UV resistant.

The Doggy Boat Ladder fits almost all boat ladder designs! All Doggy Boat Ladders are of the highest quality and workmanship and built to last in all types of weather conditions. *The Doggy Boat Ladder does float in water but should never be used as a floatation device. Paws Aboard ladders/ramps are not designed for human use.*

## Sting Ray "XRIII" Hydrofoil Stabilizer

Speed-XP™ is a clear hydrophilic (water-absorbing) material that is thermally, bonded to the base polymer material of the hydrofoil. The surface of this material is hard when dry and looks like a new wax job-however the "magic" of its performance is released when the surface becomes wet…Speed-XP™ acts like a microscopic sponge when wet and will bind a very thin layer of water to the surface of the hydrofoil. The result is running water on water- a dramatic reduction in hydrodynamic drag and improved performance.

# The Ultimate in Skeg Protection

- Guards from reefs,coral head, lake bed rocks,boat ramps and submerged floating debris.
- Protects as well as repairs the damaged skeg and helps save your prop.
- Made from high quality 316 Marine Grade Polished stainless steel.
- No welding required, no epoxies an easy do-it-yourself 10 minute application.
- Zero effect on performance.
- The only skeg guard with a drainage hole at the lower backside for when motor is not tilted (storage/boat dock) and will drain from front/top when motor is tilted, protecting from water retention.
- Superior endcap design with a reinforced lower edge for protection from ramp damage or riverbed,lakebed dragging, and better water/hydro streamlining.
- Custom engineered low profile stainless steel Allen head machine bolt system for easy installation/removal/reuse. All bolts are knurled, enabling locking attributes for high vibration motors. Also included are two high tensile strength 5/32” allen wrenches.
- Custom manufactured to the appropriate size for your specific drive. We obtain exact measurements from the OEM manufacturer models and build to those specifications.
- Made in the USA with a 3 year warranty for the original purchaser.
- Remember, any damage at all to your skeg causes performance degredation, significantly reduced protection for your gear case, and exposes your propeller to higher risk of damage. All of these situations can be very expensive to remedy.
- Skeg damage used to mean expensive repairs, such as welding on a new skeg... and that meant putting your boat out of commission for days, or even weeks.
