Time to get your feet wet

Single Actuator Per Tab System
Lenco 15500-101 DM Order# 251908

Dual Actuator Per Tab System
Lenco 15501-101 DM Order# 252910

Features & Benefits

- Automatic pitch & roll corrections
- Automatically trims boat to the most fuel efficient position
- Takes the trim tab operation out of the hands of the operator
- Significantly reduces time to plane
- Does not adjust during turns, allowing boat to roll naturally
- Produces substantial fuel savings
- Can be installed on any boat equipped with Lenco electric actuators
- Hydraulic trim tab owners see our conversion upgrade kit to the right

Testimonials

Read what these Lenco trim tab customers had to say:

"The combination of the High Performance Trim Tabs and the Auto Glide System makes my SeaVee perform like a sports car. I wouldn't have a boat with out it."

Adam Meyerson
2010 SeaVee 29'

"I can't believe the difference, this thing is amazing!!! I cannot express how happy and content I am with this system. Only regret is it took me so long to purchase it."

Frank Nayor
2000 Contender 31'

"All of the system adjustments achieve two very important objectives. One of course is fuel economy but the more important one to us is a more stable and comfortable ride particularly in rough seas."

Bill Hayward
2013 Cruisers Yacht 48'

Important Information

Sales of items in this catalog are subject to the following policies of Donovan Marine, Inc.

Freight Policy: Shipments not delivered on our own company trucks will be made F.O.B. Donovan warehouse unless other freight arrangements are made.

Special Orders: Non Donovan stock items ordered by C.O.D. accounts must be paid for in advance before the order will be placed to the factory and are not subject to cancellation. All factory charges and freight charges will be paid by the dealers. A $5.00 handling charge will be applied to all special orders.

Drop Shipments: When it is to our mutual advantage, we will try to arrange for drop shipments from the manufacturer.

Open Accounts: We are always happy to set up open accounts for qualified customers. We try to cooperate with our accounts in all ways; we expect them to treat us equally well. Please ask for a credit application if you would like an "Open Account."

Customer agrees that all sales on credit shall be on the following terms: (a) Donovan reserves the right to accept or reject any order, and previously quoted prices may be changed without notice; (b) full payment is due within thirty (30) days following date of invoice; (c) a service charge of 1% per month (12% per annum) will be added to any outstanding balance due by customer which is unpaid thirty (30) days from date of invoice; (d) payment methods accepted for open accounts are cash, check, money order, cashier's check, or wire transfer; (e) if account is referred for collection, all costs thereof are to be paid by customer, including, but not limited to, attorney's fees of 25% of all amounts and service charges due, but not less than $50.00; and (f) applicable sales tax will be added to all invoices unless current exemption certificates are provided timely in according with the jurisdiction of customer's domicile.

Claims for Shortages: Upon checking your shipped or delivered merchandise, should you discover a shortage, please contact Donovan within 10 Working Days, so the shortage may be traced and properly delivered to you.

Damaged Deliveries: If you receive a shipment that appears to be damaged, Notify the Carrier Immediately in order that they may inspect the package. Any damaged item must be inspected and returned by the Carrier. Damaged shipments which are returned without going through this process will void all claims.

Returned Merchandise: Stock merchandise is returnable only when permission has been granted by Donovan. Full credit will be allowed on mistakes that are our fault. No Merchandise Will Be Accepted for Credit Unless Returned In the Original Package and is in Resalable Condition. All returned items are subject to a handling charge. Shipping charges must be prepaid. Invoice number and date as well as your customer number must be included with all returns.

Waiver of Warranties: Donovan Marine, Inc. does not manufacture any of the items offered or shown in this catalog. Any warranties provided to Donovan Marine, Inc. by the respective manufacturers of such items will be passed on to the purchaser to the extent that such transfer is permitted by the manufacturer. **All other warranties, whether express or implied, including any implied warranties of merchantability, fitness for a particular purpose and/or any implied warranty against latent or unknown or redhibitory defects or vices of any kind, whether arising by law, custom, conduct or usage of trade are expressly waived and renounced by Donovan Marine, Inc.** Donovan Marine, Inc. shall not be liable for any injury to person or property arising out of any defects or failures in any products shown, offered or sold pursuant to this catalog and shall not be liable for any incidental, consequential or indirect damages or losses resulting from defects or failures of any products sold by Donovan Marine, Inc. Agents or employees of Donovan Marine, Inc. are not authorized to amend, modify or extend this waiver of warranty in any manner. Any oral statement or printed advertising regarding any product shown or listed in this catalog regarding any characteristic, component or quality of such product shall be considered an estimate only and shall not be relied upon as creating any type of express warranty or as forming a basis of the bargain for such product.

Back Orders: We normally back order items that are temporarily out of stock and are expected to reach us within two weeks. If you do not wish to back order items, please specify at the time of your order.

Ordering: When ordering Please Give Your Customer Identification Number and the Six Digit Item Number as Shown with Each Item. This number is highlighted in bold type and in most instances (for your reference) is followed by the manufacturer's part number and list price.

We are looking forward to a pleasant business relationship with you. If you feel you have an idea that would help us serve you better, please let us hear from you.

Donovan Marine, Inc. has made every effort to produce this catalog with current prices and up-to-date information. We hope you will forgive any omissions or clerical and typographical errors. All prices are subject to change without notice, and you will be charged the current prices in effect at the time of shipment. We will try to advise you at the placing of an order of the current pricing. We sell only to stocking marine dealers, not the consumer. Possession of this catalog does not authorize purchases.

Airhead NA PALI Stand Up Paddleboard and Stand Up Paddleboard Paddle

AIRHEAD

- Airhead's inflatable SUP measures 10 ft. 6 in.
- The extra rugged drop stitch construction allows a much higher air pressure than other inflatable technologies.
- Thousands of tiny threads connect the top and bottom layers.
- Consequently, it can hold 15 pounds of air pressure, more than double the working pressure of other technologies.
- When you're out on the water, Na Pali is rigid and will perform like a fiberglass board.
- A large anti-skid EVA pad provides secure footing.
- Strap your gear to the 4 D-rings up front.
- Three removable fins ensure straight tracking and precise maneuvering.
- Feel like sitting down? Install the seat in seconds and paddle kayak style.
- For convenience and portability, a backpack with mesh panels is included for stowing and carrying the SUP and all accessories.
- Accessories included: Backpack with mesh panels, adjustable seat, high pressure hand pump, anemometer, valve wrench.
- Airhead Adjustable SUP Paddle sold separately.

- Airhead's lightweight 3-section SUP paddle is the perfect companion to our Na Pali stand up paddleboard.
- This is truly a one-size-fits-all paddle.
- The length is easily adjustable from 160 to 210 cm.
- The paddle weighs less than 2 lbs. 3 oz.
- The shaft is 100% fiberglass, the "duck foot" shape blade is designed for maximum paddling efficiency and is fiberglass reinforced ABS.

Mustang Survival M.I.T. 22 Inflatable PFD

- Proving good designs never go out of style, we're bringing back a tried-and-true favorite - the first inflatable PFD ever designed by Mustang.
- Lighter, simpler and all-around better, this little PFD packs a lot of benefits into its stylish figure.
- Using M.I.T. Membrane Inflatable Technology - this inflatable PFD is 20% lighter than competitors' products.
- Utilizing an innovative membrane, the inflation cell takes up very little space when uninflated, but quickly stretches to fit the CO2 when activated to provide more flotation than most foam vests.

Hull Hugr Contour Fenders

- Traditional round fenders tend to roll up, leaving your boat unprotected.
- They're also bulky to stow.
- Boats with step-down gunwales are especially vulnerable to damage from docks.
- HULL HUGR Contour Fenders stay put and stow conveniently under boat seats.
- They hinge to wrap around the gunwale and hull, following the contours of the boat.
- All HULL HUGRs are constructed of a durable marine grade tri-laminate cover, with closed cell foam inside.
- There's a tough polycarbonate grommet at each end for hanging from cleats.

Boater Sports 3-Strand Anchor Lines - Nylon

- Nylon is the strongest of all ropes in common use.
- When stretched it has a "memory" for returning to its original length.
- For this reason it is best for absorbing shock loads.
- Nylon lasts 4-5 times longer than natural fibers.
- Has good abrasion resistance and is not damaged by oil or most chemicals.
- Nylon also has good resistance to ultraviolet deterioration from sunlight.

Attwood L.E.D. Docking Lights

- Compared to its 55-watt halogen competition, the Attwood Surface Mount LED Docking Light draws a fraction of the power while producing a brighter output.
- The Attwood product also transmits light in a much broader pattern as opposed to a narrow beam generated by today's competitors.
- Simply put, Attwood's docking light performs like a true "docking light" instead of a narrow-beam headlight.
- Power draw and performance are important, but what about assembly? At 1.2" thick, the lights are designed to be mounted directly to the surface of the hull.
- With only a small hole for wiring and three (3) screws for attachment, Attwood's surface mount design makes installation quick and uncomplicated.
- This new LED Docking Light allows for fewer hull cuts and minimal intrusion while producing results that are reliable and attractive.
- Backed by a 10-year warranty, Attwood's LED Docking Light is designed and tested for extreme conditions.
- Attwood used only the highest grade Stainless Steel and aluminum components to ensure the product is resistant to corrosion.
- The rubber gasket provided creates a barrier that protects your hull from water entry, ensures the light is watertight and keeps all electrical

Imperial Immersion Suits

- Donovan offers a full service station.
  To pressure test and inspect suits. Suits must be in serviceable condition at all times. The pressure test can reveal leaks that can not be seen with the naked eye. A well maintained suit increases your chance of survival, lasts longer and saves you time and money. An experienced service technician can find seemingly minor defects that can cause major problems.
- The High Rider Ring.
  It is made of neoprene and attached by zippers making it easy for you to replace yourself. Most other suits have air bladders (high rider rings) that must be brought into a certified station to be replaced.
- Features:
  - Three fingered mitt to keep your fingers warmer
  - Two zipper tab pulls on zipper
  - Wide legs to allow quick donning
  - Toe valves that purge water very fast
  - Face seal is soft and flexible
  - Back straps keep the ring in place
  - Suits are true to size
  - Sturdy carrying bag with two handles

JBL Black Box Technology

- The black box system reduces the potential problem of water intrusion in a marine stereo by including a waterproof faceplate as well as a separate box that functions as the "brain" of the unit that can be placed anywhere.
- This box allows the user to put it in an area that is protected from water.
- The black box chassis is a corrosion proof, molded poly chassis.
- Rather than including a CD player as standard equipment with these units, they feature media options so that users can bring along an MP3 player or a variety of other types of portable media such as USB, cell phones and iPods.

JBL Bluetooth® Black Box System

- Bluetooth Audio Streaming.
- 4 x 50 watts.
- AM/FM tuner/Aux-in/E-prom.
- 3 pair RCA outputs including subwoofer.
- U.S. and European tuning.

Bulb & Socket Information for Perko 800 Series Solar-Ray® Searchlights

- Bulbs are not included in lights.
- To give good results, the bulb and reflector must be perfectly compatible; therefore be sure to specify the stock number of the bulb desired.
- Peak candlepower is exceedingly sensitive to many factors, (i.e. a light source out of focus by 1/32 inch, under-voltage of only 4% or differences between bulb manufactures) which can cause reduction of range of up to 20%.

How to Order Searchlights

- Specify size searchlight, type control, type base, type drum, type finish, type lampholder, and give code word or catalog number.
- Give ordering code and volts of lamp.
- Specify length of control (measured from bottom of base to centerline of lever or upper wheel) if other than the standard dimensions shown on the dimension drawings.
- Specify pedestal height (measured from bottom of base to centerline of drum) if different from the standard 48 inches.
- Example: 12" searchlights, lever control, standard base, vented drum, enamel finish, medium prefocus lampholder, code RECITE-E2. Special length control 22" base to centerline lever. Two lamps code 54889-0 120 volts.
- To designate the specific lampholder desired add one of the following suffixes to the code word or catalog number:
- Medium Screw Lampholder –1
- Medium Prefocus Lampholder –2
- Mogul Screw Lampholder –3
- Mogul Bipost Lampholder –4
- 2-Pin Prefocus Lampholder –5

The Carlisle & Finch Co. 12" Searchlights - Distant Electric Control (DEC)

Special Handling May Apply

- Rugged drive unit is housed in watertight corrosion resistant marine aluminum or brass base as specified.
- Slip clutches allow manual override at all times, a convenience when relamping.
- A small heater on drive unit keeps temperature in base housing above ambient to minimize condensation on and in motors.
- Powerful motors in weatherproof base direct the penetrating beam with finger-tip ease from any distance.
- Automatic brakes provide instant start and instant stop with no overtravel.
- Complete flexibility in mounting.
- Searchlight can be controlled from many separate locations.
- Motors operate on 110-125 volts, 50-60 hz (cycles).
- Drum, door, and yoke, etc., constructed of solid brass.
- Base is brass.
- Drum/door and yoke is white enamel.
- Rugged joystick switch controls both motions.
- No limit to distance between searchlight and joystick.
- Second, third, fourth, or more joysticks can be added at any time.
- Just five control conductors and a ground conductor required between searchlight and joystick.
- Either way, one standard unit is used.
- No interlocks required.
- Corrosion resistant and oiltight, the joystick can be mounted almost anywhere.
- Uses medium prefocus lampholder.
- Vented.

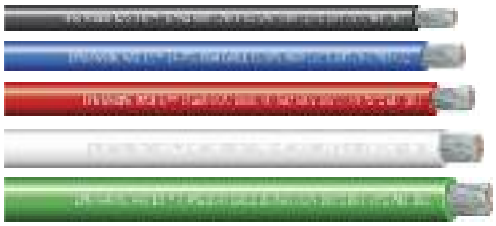
Wire & Cable

Donovan Marine offers a complete line of marine wire and cable products. All wire and cable is RoHS compliant and built to meet SAE, UL, and/or CSA specifications. All wire is made in the USA

105° C Tinned Wire

UL-Listed, tinned wire is ideal for use in the highly corrosive environment of marine applications. Special electro-tinned, copper strands also increase protection against corrosion for recreational vehicles, automotive, trucks, and trailers. Tinned copper stranding is extremely flexible for easy routing through marine applications and easier to solder than bare copper. Flame retardant, PVC insulation is highly resistant to water, oil, grease, gasoline and other damaging solvents. High voltage tolerance of up to 600 volts adds versatility to its use in multiple marine and other sustainable applications.



- Voltage: Rated at 600 volts.
- Temperature: Rated at 105° C (221° F) dry and 75° C (167° F) wet.
- Specifications: Meets DOT and Coast Guard specs for electrical systems.

80° C Bonded Parallel Wire

Multiple primary wire parallel bonded with color-coding for identification purposes. Especially ideal for use in RVs, marine, and utility trailer applications. Built to stay together under the toughest operating conditions yet easy to separate at the end of a run for final terminal connection. All-copper stranded core is highly conductive maximizing current transfer while remaining flexible for easy installation.

- Voltage: Rated at 600 volts or less.
- Temperature: Rated at –30° C (–22° F) to 80° C (176° F).
- Specifications: SAE J1128.

105° C Tinned Single-Conductor UL Listed 1426 Wire

105° C Tinned Single-Conductor UL Listed 1426 Cable

105° C Tinned Multi-Conductor UL Listed 1426 Cable

Ancor Marine Grade™ Primary Wire

- UL 1426 Tinned Boat Cable
- Ancor Marine Grade™ wire is manufactured from tinned copper stranding for maximum protection against corrosion and electrolysis.
- Ultra flexible (Type 3) stranding resists fatigue due to vibration and flexing.
- Ancor's proprietary premium vinyl insulation stays flexible even in extreme cold and resists salt water, battery acid, oil, gasoline and ultra-violet radiation.
- Exclusive insulation is rated at 600 volts, 105° C dry and 75° C wet, and is resistant to heat and abrasion.
- Exceeds all UL 1426, US Coast Guard Charterboat (CFR Title 46) and ABYC standards.

Newmar Galvanic Isolator

- Sacrificial zincs corrode away as they protect metal thru hulls, shafts and props from damaging electrolysis.
- Stray, low voltage current flowing between the AC safety ground and DC bonding system is a principal cause of this "galvanic" action.
- Installing the Galvanic Isolator between the AC safety ground and DC bonding system, blocks a majority of the low voltage currents and corrosive action on the zincs is significantly reduced (while the integrity of the critical safety ground path is maintained.)
- This means a significant savings in boat haul-out fees and zinc replacement costs.
- For additional safety, all units feature a large capacitor, providing a secondary low impedance path for sending AC current to ground.

- Generator/AC System Monitor, Model #VAAHF large high LED digits in high visibility green 4 functions, all display simultaneously on one screen: Volts, Amps, Frequency Hourmeter displays when generator is off.
- Easy function and alarm programming via 4 button key pad, with on screen menu settings.
- 4 level adjustable LCD brightness settings.
- Programmable alarms: HIGH/LOW for volts and frequency and HIGH alarm for amps (2 lines).
- Alarm modes: Red warning color visual indication, plus built in 85 db audible, with output signal for external alarm relay.
- User programmable service hour interval settings and notification (password protected).
- 150 amp current transformers (2X) provided.
- DC powered 9-33 VDC, with low power consumption sleep mode (<20 ma) to conserve batteries.
- Waterproof instrument face.
- Power supply: 9.5 to 33 VDC, 100 mA.
- Operating temperature: 32° to 122° F (0° to 50° C).
- Accuracy: Volts: 1% +/- 1 Digit, Amps: 2% +/- 1 Digit.
- Hz and hours: .5%.
- Volts range: 90-300 VAC.
- Amps range: 0-150 amps.
- Frequency range: 30 to 100 Hz.
- Hour meter range: 99,999.99 Hours.
- Alarms: High/low voltage, high & low frequency, high amps.
- Supplied transducers: Voltage (1 each) and current transformers (2 each).
- Weight: 1 lb.
- Warranty: 3 years.
- This color LED display instrument provides simultaneous read out of generator output data: AC Voltage, Frequency, Amperage of two legs up to 36 Kw total. Programmable alarm settings on each function produces 85 db audio alert as well as visual red blinking display. It logs cumulative generator operation hours with programmable service interval hour settings and notification. This is ideal for monitoring generator sets.

702145	(ATC-6W) 6 Way fuse holder screw terminals w-cover & link	$41.98 Q

BEP Digital Voltage Sensing Relay (DVSR)

- Safely charge two or more independent battery banks from one charge source (alternator, battery charger).
- Charges engine starting batteries before combining auxiliary bank for charging.
- Protects start batteries from becoming flattened by domestic loads.
- Isolates electronics from harmful electrical surges from starter and winch motors.
- Simple to install 3 wire connection, leaves alternator wiring intact.
- No volt drop vs. diode isolators.
- Ignition protected.
- Surface or panel mountable.

Order No.	Mfg. No. / Description	Price
702075	(710-140A)	$112.98 Q

BEP Marine Twin Engines Two Battery Banks

- Designed for systems with twin engine and 2 batteries.
- House loads can be switched between port and starboard batteries.
- Selector switch can be used to parallel batteries when in both position.

700167	(BI-24100) 24 VDC 100 AMP	$210.98 E

BEP Battery Distribution Clusters

- This system ensures you will always have a fully charged reserve battery.
- When the switch is in position one, it becomes the sensing battery for the VSR.
- Battery two, which is in isolation, will be charged via the VSR when the engine is running ensuring it is always fully charged.
- When the switch is in battery two position, this becomes the sensing battery and battery one is charged via the VSR.
- Please note: With the 714-140A-DVSR the electronic loads are run off the same battery as the engine starting battery.
- With the successful release of the BEP battery distribution system, BEP saw the need for ready assembled clusters for different applications to make the installation within the battery area even easier.
- Following is the range as outlined in each diagram, which are overviews only.
- All clusters are completely bused and pre-wired internally and are supplied with mounting fastenings along with easy to follow instructions.
- These include All connecting points clearly marked with ABC labels as shown in All illustrations.

702090	(717-140ADVSR) Twin Engine, Three Battery Banks	$385.98 Q

BEP Marine Dual Sense Voltage Sensitive Relay

- Allows two batteries to be charged at the same time.
- Eliminates the possibility of draining the start battery and protects sensitive electronic equipment powered from the house battery from harmful engine start up spikes.
- No need to bypass existing alternator wiring.
- 125 amps continuous.

Order No.	Mfg. No. / Description	Price
700150	(710-125A)	$106.98 G

Newmar Start Guard

- StartGuard The abrupt DC system voltage drop that accompanies engine starting can cause micro processor-driven communication and navigation electronics to dump programmed memory.
- StartGuard solves this problem by providing supplemental voltage to sensitive electronics while the engine is cranked.
- It contains a sealed rechargeable battery which is switched on-line to electronics when the starter switch or solenoid is engaged.
- When the engine is running StartGuard automatically goes off-line and the internal battery is recharged by the alternator.

BEP Easyfit™ Battery Switch

- Following customer feedback about installations where switches need to be recessed through varying thicknesses of panels, we developed the 700 Easyfit switch.
- It achieves this through an easily removable threaded ring allowing for panel thicknesses up to 3/4".
- It uses the same features as the 701 with the removable key 45 past the off position, labelled handle and a removable back cover covering exposed terminals to meet ABYC specifications.
- The switch can also be surface mounted offering a unique style compared to other switches available on the market.
- The 700 Easyfit switch can easily be retro - fitted in place of most European post and lever type switches.

Order No.	Mfg. No. / Description	Price
702045	(700) Easyfit Battery Switch	$36.98 Q

BEP Battery Selector Switch

- The 701S is the most compact selector switch available on the market.
- Housed in the same dimensions as the 701, and includes the same removable side plates and back cover.
- While BEP recommends isolated battery systems as outlined with our distribution clusters, the 701S offers a simple economical way of separating two batteries.
- Please note selector switches will not separate electronics from harmful engine starting spikes.

Order No.	Mfg. No. / Description	Price
702070	(701S) Battery Selector Switch	$42.98 Q

BEP Heavy Duty Battery Switch

- The 720 Heavy duty Battery Switch fits into the same contour lock system as used on the battery distribution system.
- Rated at 600A continuous and 2500A cranking.
- It is well suited to larger vessels.
- As with the 701, the 720 can be recessed or surface mounted.
- The 720 uses the same style of self cleaning sliding contact as used in the 701 and uses the same label sheet.

Order No.	Mfg. No. / Description	Price
702055	(720) Heavy Duty Battery Switch	$94.98 Q

BEP Battery Selector Switch

- The 721 Battery Selector Switch is our heavy duty selector switch.
- Housed in the same module as the 720, it includes the same removable plates and back cover.
- While BEP recommends isolated battery systems as outlined with our distribution clusters, the 721 offers a simple economical way of separating two batteries.
- Please note selector switches will not separate electronics from harmful engine starting spikes.

BEP Contour Battery Master Switch

- The 701 Contour Battery Master Switch offers a number of unique features, the highlight being the patented Contour Locking System, allowing it to be a stand alone unit, or locked together with other switches.
- Features a control knob which cannot be removed while in the ON or OFF position, however, can be removed by switching to an counter-clockwise 45 position. The control knob also features an interchangeable labeling system allowing a full range of applications (Part number 713 or 715: 136).
- Removable side plates on 4 sides for access of up to 1/0 cables plus a rear cover insulating the rear terminals against any short circuits. This ensures the switch meets ABYC requirements.
- Can be either surface or recess mounted by cutting a 2.1" hole.

702050	(701) Battery Master Switch	$31.98 Q

BEP Remote Operated Battery Switch

- Remote operation.
- Battery switch can be mounted along side battery, reducing cable lengths and cable sizes to starter motor. (Large cost saving in copper cables) Reduced installation labor, due to shorter battery cable runs. Manual override option to meet CE requirements.
- Power Draw: Switch off: 12mA. Switch on: 15mA, switch operating 120mA for 3 seconds @ 12V nominal.
- LED status identification for remote control switch.
- Same capacities/specifications and mounting options as standard BEP battery switches.
- Uses same interchangeable labeling system as BEP battery switches.

702065	(701-MD) Remote Operated Battery Switch	$196.98 Q

BEP Remote Operated Battery Switch

- Remote operation.
- Can be used to switch in positive or negative lines.
- Low stand by current draw (7mA) (zero if aux control switch used. See instruction sheet).
- Main contacts isolated from control circuit allowing operation via another battery source.
- Battery switch can be mounted alongside battery, reducing cable lengths and cable sizes to starter motor. (Large cost saving in copper cables).
- Reduced installation labor, due to shorter battery cable runs.
- Manual override option to meet CE requirements.
- Power Draw: Switch off: 12mA. Switch on: 15mA, switch operating 120mA for 3 seconds @ 12V nominal.
- LED status identification for remote control switch.
- Same capacities/specifications and mounting options as standard BEP battery switches.

Newmar DC Energy Monitor

- Displays volts, amps, energy used and remaining for 12 or 24 volt systems up to 500 amps and up to 3,000 amp-hour capacity.
- Makes DC energy management a breeze.
- Monitor voltage on up to three separate banks.
- House bank (or battery bank of choice) may be also be programmed for the following functions: 1) Monitor charge/discharge amperage. 2) Total energy monitor can be set for amp-hours or percent of-charge. 3) High/low voltage alarm, plus alarm set-point for low amp-hours remaining.
- 500 amp shunt included.
- NMEA 0183 compatible output for data logging.
- Available in 2-1/2" or 4-1/4" square face.

Newmar AC Selector Switches

- The switch eliminates the safety hazard and/or damage that can occur if two AC sources are applied to the same circuit simultaneously.
- These switches are fitted with a compact escutcheon plate with engraved switch position nomenclature.
- The switches carry UL and CSA approval, are CE marked, and feature heavy duty contacts and a positive step cam mechanism for precise contact closure.
- May be installed in panel with thickness up to 1/4".
- 115/230 VAC.

700670	(ACE) AC Energy Monitor	$505.98 D

Newmar DCV: DC Voltmeter

- For three battery banks, 12 and/or 24 volt systems.
- Reads to the nearest 1/10 volt.
- Features a programmable high/low voltage alarm circuit for each bank.
- NMEA 0183 compatible for PC interface.

Order No.	Mfg. No. / Description	Price
700681	(DCV) DC Voltmeter	$277.98 E

Newmar Temperature Gauge with Sensor

- Provides an accurate digital display of temperature for up to three different areas such as mobile air fill stations/medical supply compartments.
- Degrees F or C can be displayed.
- You can set Low and High temperature alarms for each sensor independently and the TG-3 continuously monitors the temperature of each sensor at all times.
- Operating temperature: 32 to 122° F.
- 2-1/2" Diameter.

Cole Hersee Master Disconnect Switches

- Brass case with chrome plated lever.
- Designed to prevent electrical fires, tampering, theft and battery drain when equipment is unattended.
- Brass mounting stem 3/4" diameter x 1-13/32" long.
- Fits panels up through 15/16" thick.
- For 6 - 36 volt DC.

- Single pole, two positions: Off-On.
- Disconnect battery circuit only.
- 175 amps continuous, 800 amps intermittent, 15 seconds ON, 5 minutes OFF.

Newmar Bus Bar

- Ideal as a DC ground tie point or positive bus, these heavy duty, 500 amp rated bus bar assemblies feature 5/16 studs on 1 centers in 1/4 thick copper bar for common connection/distribution of large wire gauges and accommodate 5/16 ring terminals.
- One combination model features two 5/16 studs and eight #8 screws, accommodating multiple size wire terminals.
- All bus material is nickel-plated copper.
- A clear insulating protective cover is provided to prevent short circuits and provide visibility of lugs.
- The mounting bases are keyed for interlocking and may be mated with the terminal strips (described above).
- Conductive parts are captured and recessed away from the mounting surface.
- Use #8 or #10 screws for mounting.

Minn Kota Digital On-Board Battery Chargers

476829

476869

- Digitally-controlled microprocessor design protects your batteries so you can stay on the water longer.
- Up to 2X faster charging in high temperatures.
- Enhanced status codes provide comprehensive feedback on charge stage, maintenance mode status, error notification and full charge.
- Convenient on-board mounting eliminates the hassle of traditional portable charges.
- Fully automatic multi-stage charging so you can get a full charge every time.
- Automatic temperature compensation.
- Waterproof, shock- and vibration-resistant aluminum construction.
- Short circuit, reverse polarity and ignition protected.
- Saltwater tested and fully resistant to corrosion.
- For use with 12 volt system with 12V/6-cell batteries that are flooded/wet cell, maintenance free or starved electrolyte (AGM) only.
- Includes: One pre-wired on-board marine battery charger with one 6' fused output cable and one 6' AC power cord.
- FCC Compliant and UL listed to Marine Standard 1236.

Minn Kota Precision On-Board Chargers

- A comprehensive LED display to select the battery type by bank, and monitor each bank's connection status, power status, state of charge and selected battery type.
- Half the weight and more compact than traditional chargers.
- A rugged, marine-grade aluminum housing and fully corrosion-resistant design.
- A full, precise charge creates longer run times and longer battery life.
- Designed to sense outside temperature fluctuations and adjust charging accordingly, providing a fast, accurate charge.
- Automatically cleans and conditions your battery to extend run time and battery life.
- Multi-Stage Charging controls the voltage and current the battery gets throughout the charging cycle, ensuring a fast, safe and precise charge.
- AC Plug Holder keeps plugs dry, safe and easily accessible.
- Three year warranty.

Newmar Battery Charger - Phase Three Modular

- ABS Type Approved both as a battery charger and a redundant power supply for essential services.
- Case accommodates three 550 watt charger modules.
- Increase output power by adding modules.
- Redundant, independent, charger modules increase reliability a malfunction of one does not disable the charging system; remaining modules continue to operate.
- Three stage smart charging; bulk, absorption, float.
- Battery type selector switch; gel-cell, lead-acid, AGM.
- Temperature compensated output option.
- Numerous diagnostic and system status indicators.
- 12 Volt; 33-100 amps or 24 Volt; 22-67 amps.
- Universal input of 90-264 VAC, 50-60 Hz. can be used anywhere in the world.
- Powder coated stainless steel case.

Newmar Battery Chargers - ABC Series

- Utilizes time tested SCR charging circuitry, individually sensing and regulating each of 2 isolated battery banks, allowing the user to leave the charger operating indefinitely, even under no-load conditions without fear of overcharging.
- Housed in a rugged, black anodized aluminum, heat-sink case.
- Features: A total output ammeter, on-off power switch, power on indicator light, 115/230 VAC input voltage selector switch, factory installed AC power cord with molded plug and shock-resistant rubber mounting grommets.
- 2 banks, 12 volt.

- ABS Type Approved
- Smart circuitry provides three stage chargingbulk, absorption, float.
- Gel-Cell/Flooded Lead-acid/AGM battery type switch selects optimum charge/float voltages.
- Multiple isolated output banks; ammeter indicates total output current.
- Current limiting-prevents damage from overloading.
- Charger status clearly displayed with L.E.D. and/or audible indicators.
- Use as a power supply; can power loads without a battery in line.
- Built to last rugged stainless steel case with a durable white powder coat finish with an optional drip shield and marinized internal circuitry.
- Numerous Safety and EMC Compliances.
- Two year parts and labor warranty.

Newmar Remote Monitor Panel

- Remote Indicator Panel, LED's indicate charger output stage.
- Button allows manual reinitialization of three stage charge cycle.
- Supplied with 25' cable and plug-in connector.
- Panel dimensions: 3" H x 4.75" W (Not available for all models - refer to Specification Matrix above)
- The Phase Three series represents a new dimension in charger design and performance, employing smart switching circuitry which puts batteries through the optimum three-step charge process, adapts for gel-cell or lead-acid batteries, features precise voltage compensation for varying battery temperature, is rated for continuous duty and is housed in a rugged stainless steel case.
- Phase Three Chargers interact with batteries by regulating both voltage and amperage through each phase of the charging process, depending on battery state of charge, temperature, impedance, duration at high rate, system demand and battery type.
- Multi-battery output, charges 3 banks on demand.

Newmar Waterproof Battery Charger

- Water resistant battery charger for rugged marine installations.
- Designed for installation in exposed locations aboard marine vessels.
- Its 100% sealed case offers installation locations not available to traditional on-board chargers, thus freeing compartment space where non-weatherproof chargers must be mounted.
- A remote battery meter displays the charge level via color coded bar graph, allowing quick check of battery bank condition from a distance.
- Input: 115 VAC, 60 Hz, 5 amps.
- Output: 12 VDC nominal, two stage, float voltage 13.4.
- 35 amps for one hour from cold start, 17 amps continuous duty.

Newmar DC-DC Converter

- Standard Series.
- For powering communication/navigation equipment, on negative ground systems.
- Excellent regulation.
- Heat generated by semi-conductors is extracted and dissipated by large heat sink fins that maximize air contact for coolest operation and long life of components.
- Polyurethane conformal coating on PC boards and corrosion resistant anodized aluminum case with heavy duty shock mounts assures survival in hostile environments.
- Numerous converter and load protection circuits: Current limiting, automatic thermal shutdown, short circuit proof, reverse polarity and overvoltage protection.
- Input: 20-50 VDC.
- Output: 13.6 VDC.

Newmar Inverter

- The PS Series inverters produce high efficient, pure sine wave output from 12 volt battery input with high surge power for motor start making it ideal for marine applications.
- A power saving mode, with user friendly adjustable set points, conserves batteries when not in use.
- A remote control/display panel and front panel indicator lights allows for easy analysis and control.
- Features 1,000, 1,500, 2,000W Models.
- Pure sine wave 115V output 12V input.
- High efficency ~ 90%.
- Power saving mode conserves battery when not in use, adjustable set points.
- AC duplex outlet on front panel.
- Status indicators lights on front panel: Input voltage.
- Output power level.
- Power Mode Fault Status.
- Remote control/display included.
- Protection: Low input voltage overload short circuit overtemp.
- Meets UL458.
- Rugged compact case, ideal for marine applications.

Newmar Stabilizing Converters

- Feed sensitive electronics with proper voltage regardless of battery condition.
- These stabilizing converters provide continuous, precisely regulated output over the entire range of a battery's usable voltage.
- This prevents subjecting loads to fluctuating input voltage which can cause shutdown, diminish performance and possibly damage sensitive circuitry.
- Application Benefits Include:
- Operate electronics at optimal input voltage, even from nearly drained batteries
- Boost voltage to compensate for voltage drops in long wire runs from batteries
- Eliminate voltage drops during momentary high current drain from batteries, as during engine start
- Eliminate voltage fluctuation from charge sources
- Eliminate voltage overshoot due to sudden removal of high current load

- 12 Volt, Input Voltage: 10-16 Output Voltage: 13.6

Newmar High Power DC-AC Inverters with Built-in Battery Charger

- High Power DC-AC Inverters with Built-in Battery Chargers.
- Called the Perfect Wave Series, these inverter-chargers deliver pure, quasi-sine wave AC for flawless operation of all appliances and sensitive electronics.
- They are ideal for entertainment systems and micro-processor-based equipment such as computers which are intolerant to AC wave distortion.
- Built-in high output charger for rapid battery bank replenishment - all models feature three stage, temperature compensated charger with output programmable for gel-cell, flooded lead-acid or AGM battery type, and amp-hour capacity selector for proper charging in various applications.
- Large DC input terminal blocks and front panel GFCI protected outlet receptacles. AC output from the inverter may also be hard-wired.
- Automatic low voltage shutdown circuit prevents damage to batteries due to over-discharge when using inverter function.
- Heavy duty powder coated aluminum construction and polyurethane coated internal circuitry-build to last in the harsh marine environment.

Newmar NAV-PAC®

- Marine communication/navigation electronics such as programmable data transceivers, GPS and other micro processor-controlled devices require clean and steady DC input power.
- Their sensitive circuitry is highly vulnerable to voltage drop from engine start, noise and line spikes from alternators and motors, and conducted noise from various other electronic devices.
- NAV-PAC prevents these conditions from affecting electronics.
- Prevents voltage "drop-out" to electronics during engine start.
- Absorbs line "spikes".
- Filters out electrical interference.
- Provides supplemental voltage/battery back-up for up to 15 min.
- Remote monitor panel included.

Newmar DC-DC Converters - Standard Series

- Convert 20-50V DC to 13.6V DC output for powering communication/ navigation equipment, on negative ground systems.
- Excellent regulation.
- Heat generated by semi-conductors is extracted and dissipated by large heat sink fins that maximize air contact for coolest operation and long life of components.
- Polyurethane conformal coating on PC boards & corrosion resistant anodized aluminum case with heavy duty shock mounts assures survival in hostile environments.
- Numerous converter and load protection circuits: Current limiting, automatic thermal shutdown, short circuit proof, reverse polarity and overvoltage protection.

Newmar Isolated DC-DC Converters - Isolated Series

- Same features as Standard Series, but with the additional capability of permitting connection of negative ground gear to positive or floating ground battery systems, or vice-versa.
- Many models may also be used as 12 or 24 volt stabilizers for highly input voltage sensitive equipment (see below)
- Input range:10-56 VDC; positive, negative or floating ground.
- Output: 13.6 VDC.

Newmar Automatic Power Selector

- Solid state device which enables installation of a seamless, redundant power system for critical electronic loads.
- Selects the higher voltage of two isolated DC power sources and routes power to the load. Should one source falter or fail, the other will automatically supply the load with no transfer delay, operation continues uninterrupted.
- Easy installation, two independent power sources are wired to the APS and routed in a single output to the vital load.
- Rugged, rust-proof anodized aluminum case.

Marpac Gas Spring Hatch Lifts

- Stainless steel.
- The ideal solution for lifting, lowering and counterbalancing weight.
- The gas spring is a self-contained, nitrogen-driven counterbalance product which provides uniform handle forces, non-catastrophic failure, and many years of service.
- Because energy is provided through gas pressure, our gas springs give you repeatable, unvarying performance which is superior to mechanical, spring or damper type products.

The PowerView

- For modern electronic engines and equipment applications using the SAW J1939 Controller Area Network.
- Displays over 30 standard SAW J1939 paraments broadcast by engine and transmission Electronic Control Units (ECU's).
- Graphical display features wide operating temperature range for viewing (-40 to 167° F/75° C).
- Displays active and ECU-Stored faults with text description for diagnosing equipment malfunctions.
- Simple connection to optional components.

The PowerView Gauges

- Display SAE J1939 parameters broadcast by the PowerView System.
- Feature cutting-edge, stepper motor technology and robust functionality.
- Microprocessor-driven for high accuracy.
- Simple installation and wiring design.

Frank W. Murphy 2" Temperature Swichgage®

- A combination liquid level gauge and low limit switch; each unit includes a chamber with pivotal float, an indicating dial with pointer and a low level contact.
- When properly installed and maintained, the float operates the pointer which, in turn, both indicates level during normal operation, and closes a switching circuit if the level falls to the low-limit set point.
- Die cast aluminum, poly-urethane coated case with polycarbonate lens.
- Brass float.
- Built for low pressure systems with max of 25 psi
- Snap-switch: SPDT rated 10 amps @ 125V AC.

Frank W. Murphy Lube Level Swichgage® Instruments

772381

772379

- A combination lube level indicating gauge and adjustable low and high limit switches.
- It provides protection against low oil level or high level caused by overfill or fuel or water seepage into the crankcase.
- A 6-3/4" deep sight gauge allows you check the condition and level of your oil without shutting down the equipment.
- Fingertip adjustable limit contacts, thru 4-7/8" range, make it simple to set high and low limit contacts.
- If the float touches the high or low limit contact, a normally open circuit will be completed which can activate alarms and/or shutdown the equipment.
- Use on engines, pumps and compressors.
- Designed for grounded, low voltage electrical systems.
- It features a one-wire-to-ground electrical circuit.

Order No.	Mfg. No. / Description	Price
772379	(15700104-L129)	$157.98 H

Davis Illuminated Hand Bearing Compass

- This precision marine Hand Bearing Compass lets you easily obtain quick magnetic bearings on shore or floating objects.
- Simply align front and rear sights on an object and read off bearing.
- Use to take a quick bearing or position set, determine angular gain or loss on the competition while racing, check distance offshore, establish lee-bow set while cruising or racing in currents, determine drift vector, and plot a line of position.
- Made of high impact, grey plastic housing.
- The stable, liquid-damped compass card is graduated in 5° segments.
- Bold graduations every 15° for easy reading.
- Large, contoured handle designed for sure, steady grip and angled forward for added control.
- Lightweight design for easier bearing.
- Lanyard and instructions included.
- Solid-state LED illumination system floods the compass capsule and sight vane with soft light.
- The LED will last for the lifetime of the compass.
- Batteries, which are included, will last up to 10 times longer than with regular bulbs.
- Average LED “half-life” is approximately 10 years if operated continuously.
- Positive “push-on” switching action, with vinyl boot water protection.
- Battery housing has high watertight integrity.
- Named "BEST BUY" by PRACTICAL SAILOR (August, 2002): "Both simple and absolutely foolproof, especially when you need an accurate bearing in a hurry." "Proven, simple, cheap, accurate…what a bargain!"

SeaStar Hydraulic Steering Packages

- SeaStar hydraulic steering systems use oil to transmit force from the steering wheel to the outboard motor or rudder.
- Instead of the push-pull cable of a mechanical system, the SeaStar system uses a "liquid cable" which is many times more efficient.
- Hydraulic steering is the most comfortable and efficient approach to steering a boat.
- It is available in several outboard, configurations to fit most boats.
- The helm pump is the heart of a hydraulic steering system.
- The ultimate in efficiency, safety and reliability, yet it is easy to install and maintain.
- SeaStar helms feature maximum steering comfort engineered into a compact, stylish design incorporating easy-access filling.

SeaStar Front Mount O/B Hydraulic Steering Packages

- Provides easier and smoother steering than any other competitive systems.
- Standard 3/4" tapered steering wheel shaft.
- Precision built and easy to install.
- Suitable for most major outboard engine brands.
- Single engine, threaded tilt tube 300 HP maximum.
- Dual engines, threaded tilt tube 450 HP maximum combined. (Order tie bar separately.)
- Consist of: Helm (HH-5271), Front Mount Cylinder (HC-5345), Hose Kit, (2) Hydraulic Fluid (HA-5430) and fittings for most applications.

Uflex Power Steering System

- Just like in your car, the MasterDrive 12 volt power assist steering system delivers effortless steering with fingertip control regardless of speed or torque conditions.
- It completely eliminates torque at the steering wheel, while providing the safety of functional manual hydraulic steering in the event of a loss of power.
- Patented features include 3 selectable levels of power to give the desired feeling at the wheel.
- The ignition protected, high-efficiency, low amp draw motor automatically reverts to manual mode in case of power loss and is equipped with an on/off safety switch.
- Fully compatible with autopilot and dual station steering installations.
- Includes: Helm, power unit with 15' wiring harness, and user interface.
- Note: Tie bars (A90 or A94) for dual engine installations, Kit-OBSVSxx hydraulic hoses (helm to cylinder) or (helm to power unit), & Kit-OB-DBR-SVSxx hose kit (for dual cylinder installations) must be ordered separately.

SeaStar Capilano Variable Turns Hydraulic Steering System

- The helm pump features variable displacement enabling the helmsman to adjust the steering wheel turns to suit various maneuvering and weather conditions.
- Meets ABS, Lloyd and Det Norske Veritas specifications.
- Systems are not air-pressurized; no air leaks or pressure drops.
- Each helm is its own reservoir; separate reservoir not needed.
- For most inboard powered boats with single or twin engines from 30 to 55 feet in length.
- This application guide should be used with discretion.
- It is the final responsibility of the boat designer-builder to specify maximum expected steering loads.

SeaStar Helm Pumps

- A unique variable displacement feature allows the number of steering wheel turns to be adjusted by the helmsman within a predetermined range.
- Shaft is 3/4" standard taper with 5/8 NF threads.
- Protected by built-in 1000 PSI pressure relief valves.

Hynautic Hy-Trac Outboard Hydraulic Steering Systems

Hynautic

- System includes all necessary hardware and 50 ft. of hose with attached helm fittings and cylinder fittings so you can custom cut the hose at the cylinder end to the exact length you need.
- Ultra sleek cylinder design requires less space around the engine and improves the appearance of your boat.
- Cylinder remains stationary eliminating the chafing and wear of hoses associated with other systems.
- Accepts port or starboard hose connections.
- Helm mounts in front of or behind dash and is powder coated for extra corrosion resistance and longer life.
- Stainless steel helm shaft.
- Unique no-mess purge kit. Bypass tube easily connects to cylinder, fill-tube connects to helm, then just rotate wheel to purge.
- Neatly mounts to most V4 and V6 engines without using the tilt tube.
- Eliminates torque feedback from the engine for effortless steering.
- Package includes: "Glide-free" HH-5273 smooth-action helm, ultra-sleek, low-profile K-6 cylinder, all mounting hardware for helm and cylinder, hose fittings kit, half gallon of hydraulic fluid, complete purging kit and installation and owner's manual.

Jastram Jog Lever

677746

- Jog "non follow-up" power steering lever offers an economical and effective means of steering your vessel with minimal effort.
- Just by moving the handle you send an electric signal to the directional valve on the hydraulic power unit.
- This, in turn, sends fluid to your steering cylinder, causing the vessel to turn to port or starboard as desired.
- Jog levers, unlike full follow-up loevers, have a spring loaded handle that always returns to center when released.
- For replacement of old style Wagner Job Switch, 677746 adapter plate is required.

SeaStar i6300 Electronic Control Systems

Dual Station Dual Engine | Single Station Single Engine | Single Station Triple Engine

Control Head Styling:

- The i6300 control heads are ergonomically designed for maximum comfort and control.
- Available with or without trim switches, they each also include easily adjustable drag and detent to suit the operators preference.
- The new i6300 delivers precise control of a boat's shift and throttle functions, thanks to Teleflex's responsive and robust Shift and Throttle Actuators.
- Available in 12 or 24 volt versions, these actuators are linked to the control head with a single 1/4" CANbus cable - for easy routing and installation.
- With a single small cable connecting all control stations to the smart actuators, there is no longer a need for heavy, complex wiring harnesses associated with other electronic control systems.

Applications:

- Suitable for all engines with mechanical shift and mechanical throttle.
- Single, Twin, Triple and Quad engine combinations.
- Inboards, OI's and Outboards. One or two station set-ups.

Features:

- Multiple control head options/styles.
- Optional trim switch(es) on TE control heads.
- Drag adjustment standard on TE control heads.
- 12 and 24 volt versions available.
- Up to four engine capability.
- Light coded diagnostic information.
- Utilizes standard 33c type control cables - TFXtreme type recommended.
- Full power train synchronization standard on multi-engine applications.
- Built-in start in-gear protection.
- Neutral warm-up.
- Mechanical override “get home” feature.
- Meets or exceeds all applicable standards.

Information Required to Spec a System:

- Number of Engines (1, 2, 3 or 4)
- Number of Stations
- Voltage (12 or 24 volt)
- Choice of Control Head Type (TE or KE)
- Choice of Control Head Color
- Trim Switch Required (yes or no) - not available on KE type
- Maximum distance from Actuators to Control Heads (in feet).

Select Appropriate Harness and Cable Lengths in feet for each Station and Engine (See diagrams):

455243

455226

455239

455231

- Cost competitive with hydraulic systems and the price is lower than pneumatic systems.

Controls any engine:
- Gas or diesel inboards, I/O's or outboards.
- Dual control available for twin engine boats.
- Easy to install or retrofit.
- Step-by-step instructions are available.
- Each system consist of: One actuator per engine, one single or dual control lever per station, one multiconductor cable per station, per engine, one power unit: 12 VDC 10 amp circuit per shaft and standard 33C push-pull cable and brackets for throttle and clutch connections.

Multi-station control:
- One to five stations can be installed per actuator and stations can be added at any time.

Easy station transfer:
- Only one station is active at a time.
- However, you can move from station to station & take control simply by pushing a transfer button.
- Each station has one.

Control indicator lights:
- When the light is on, it indicates that particular station has control.
- The light at all other stations will be off.

High and low idle settings:
- Low is ideal for slow trolling.
- High, which is adjustable to as much as 10% of the full speed range, enhances starting and warming up the engine or docking and maneuverability in tight quarters.

Built-in detents:
- These indicate "Neutral", "Ahead" and "Astern" lever positions.
- They are spring loaded, rolling detents that last a lifetime and provide a firm, smooth feel.

Double interlocked controls:
- To start the engine, operator must have controls in "on" mode, lever must be in neutral and it can be moved thru the ahead speed range to start and warm-up engine without engaging the clutch.
- Fast reversals are sequenced to protect the drive train and engine.

Engine room actuator:
- The actuator is located in the engine area, is water resistant against water spray and can be mounted in any attitude.
- It houses the electronics and two servo motors, one for throttle and one for shift.
- It is connected to the engine throttle and shift levers by short 33C type cables.
- It is connected to the controls by an 8-conductor shielded electric cable.

ZF Mathers CruiseCommander

- CruiseCommand is a revolutionary control system for vessels with electronic engines and solenoid gears.
- CruiseCommand offers single lever control, four station capability and easy station transfer, station-in-command indicators, speed/shift sequence protection, neutral start interlock, high and low idle speed and audible and visual indicators.
- CruiseCommand features plug-in connections and an external keypad setup.
- The watertight enclosure never needs opening, making this a maintenance-free system.
- Built-in features include an LED troubleshooting display, synchronization and troll.
- Pluggable connections make installation nearly effortless.
- Determine cable length, engine and gear requirements, then plug in the system.
- Customized kits are provided to meet specific needs for production builders.
- An external keypad setup on the CruiseCommand enclosure makes configuring the controls easier then ever.
- Punch in a code and the processor makes the correct adjustments.
- Configurations can be changed at any time to meet new specifications.
- CruiseCommand's self-diagnostic software operates a multifunction LED display located on the front panel of each processor.
- This display allows for uncomplicated checking of battery voltage and clutch status for each engine, lever positions on each control head and multi-station transfer button status.
- CruiseCommand packs a lot of features into a small processor, including built-in troll and engine synchronization

Note: Multi Engine applications, consult factory for specific needs and requirements.

Contact Your Salesman or Donovan Marine for Your Specific Needs.

- A single-lever electronic control system designed for precise, instant control of mechanical engines and gears on yachts and commercial vessels.
- Designed for vessels utilizing mechanical and electronic throttle and shift combinations.
- Standard features on both products include an LED display which utilizes self diagnostic software.
- The LED display codes for setup or system status.
- All system functions are incorporated on one circuit board, allowing easy customization of features.
- Increased vessel efficiency is achieved with engine synchronization, standard on every 9000 Series processor.
- One lever synchronization is programmed into all processors and allows multi-engine control with one lever.
- The circuit board is conformal coated to protect against humidity, contamination, dust and dirt.
- Meets EMC, CE and current environmental standards as well as UL 1500 with built in ignition protection.
- IP rating 44.

- Mathers ShaftBrakes are designed to provide maximum drive train protection and faster, more precise maneuvering and control.
- Masters ShaftBrakes are recommended for use with any marine propulsion system using engines over 500 horsepower with reduction ratios of 4:1 or greater.

Consider these benefits:

- Reduces vessel maneuvering time. A vessel's forward velocity will slow faster with a stopped propeller.
- Added life for reduction gears and clutches. ShaftBrakes stop the propeller shaft with every change of direction, automatically. ShaftBrakes absorb the load which would normally be transmitted to the engaging clutch, thus extending clutch life.
- When used with Mathers propulsion controls, will help prevent engine stall. Certain types of marine engines tend to stall during high speed maneuvers or emergency reversals. Mathers ShaftBrakes and Mathers Controls can prevent that from happening.
- Superior to drum type brakes. Both installation and servicing are easier and calipers can be relined for considerably less cost than can drum brake components. Also, calipers do not have boots, which are costly to replace on drum brakes.
- Mathers propeller ShaftBrakes use hydraulic actuated calipers which are self-adjusting and spring retracting to alleviate unnecessary pad wear.
- A complete ShaftBrake package consists of the disc, caliper holder(s), caliper(s), and control kit.
