Lenco Marine Drive 164 Trolling Systems

- The system utilizes two 82 lb. thrust trolling motors mounted to thetransom, and incorporates a digital, infinite variable speed foot pedal to operate both motors in unison, for a total of 164 pounds of forward and reverse thrust.
- The motors are extremely corrosion resistant, and mounted in 7-gauge electropolished stainless steel housings.
- There are no shafts, no "mounts" and no extra parts required to make the system "heavy duty," it already is.
- Only 4 inches of width and 13 inches of height (per side) are required to mount the motors, and everything you need (excluding batteries) is included with the kit.
- An anticavitation feature is also included, to help maintain silence in rough or shallow waters.
- The Lenco Drive 164 gives new meaning to the word convenience.
- At the touch of a button, both motors are fully deployed or retracted in less than 5 seconds using Lenco's proven extreme duty actuators.
- The foot pedal control gives you the power of TWO trolling motors at the same time, from virtually any location on the boat.
- Just plug in the pedal, and you're ready to go.
- Each kit is pre-assembled and contains two (2) extreme duty 2-1/2" stroke actuators, two (2) 24 volt digital trolling motors with prop's, digital control box, foot pedal, anti-cavitation plates, all mounting hardware and complete instructions.

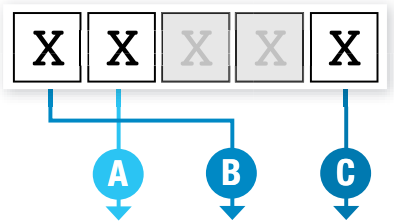
REPLACEMENT ACTUATORS
FOR SKI BOATS & TOW BOATS

REPLACEMENT LENCO ACTUATORS 12-Volt

Follow these simple steps to find your 12 Volt Replacement Actuator



A Find the code on face of the actuator below the Lenco label. The second digit from the left identifies the Actuator Type. Follow the arrow from step A on the chart below.

B The first digit to the left represents either 3 or 5 lobes in the motor.
1-4 from code = 3 Lobes
5-8 from code = 5 Lobes
Follow the arrow from step B on the chart below.

C The last digit to the far right of the code identifies the hole size(s) for mounting. Follow the arrow from step C on the chart below.

All actuators include 6' wire leads & Deutsch connectors.

Bennett Marine Self-Leveling Tabs

- Good things come in small packages.
- Now you can have the durability of a Bennett trim tab system with a quick and easy installation.
- There is nothing to do inside the boat only the mounting of two actuators and two tabs at the transom.
- It's an affordable, simple solution for small boats from 10 to 18 feet.
- The SLT uses some of the same high-quality, proven materials and superior design used in Bennett standard systems for more than 50 years.
- Your SLT kit includes: Two 14-gauge stainless steel trim tab assemblies with Bennett's exclusive interlocking hinge, two strong and durable actuators, and all stainless steel hardware no plastic! Plus Bennett's no-hassle 5-year warranty on All Components.
- With the SLT, you can plane at lower speeds, improve your hole shot, reduce engine laboring, improve fuel efficiency and eliminate porpoising.
- The SLT reacts instantly to boat speed and water pressure by adding trim when it's needed.
- You get a better ride while the SLT does all the work.

Bennett Hydraulic Power Unit

- A compact powerhouse that creates hydraulic pressure to lower and raise the trim tabs.
- It employs two solenoid valves to direct the flow of fluid to the actuators.
- The solenoid valves lock tightly to secure the tabs in place.
- Lexan cover protects electrohydraulic unit from occasional wash down and translucent reservoir allows fluid check at a glance.
- Measures 4" x 7-1/2" x 5-1/2".
- Includes: Pump, solenoid valves, reservoir and cover.
- 12 volt.

Bennett Auto Tab Retractor

- 12 volt.
- Automatically retracts tabs when boat's ignition is turned off.
- Trailered or dry storage boats have added defense from trim tab damage with them "full-up" during hauling, trailering and storage.
- Ensures trim tabs are all the way up every time boat is started if boat is not equipped with trim tab indicators.
- Easily installed under the instrument panel, the ATR connects to the trim tab control and engine ignition switch.

Bennett Standard Trim Tabs without Controls

- Bennett trim tabs are two independent, stainless steel adjustable afterplanes attached to the bottom edge of the transom.
- The action is gentle, making it easy to adjust a boats trim precisely & safely.
- Maximum efficiency is obtained by using the longest span tabs possible.
- Measure transom from centerline to chine or turn of the bilge allowing 3-4" leeway.
- Outdrive or outboard applications require minimum 8" clearance from lower unit to tabs.
- All our kits are supplied with transom mount hinges for convex, concave or lifting strake bottom designs as well as any other style.
- All kits are standard 12 volt with thru-transom actuators.
- 5 year limited warranty.
- Note: Control switch not included. See next page for control switch selection.

Bennett Actuator Assemblies

- Bennett actuators are strong but flexible nylon/fiberglass hydraulic cylinders.
- The piston-like arms push tabs into position.
- Fluid flows through a concealed hole in the upper hinge at the top of the actuator - thus eliminating external hoses subject to damage.

Doel-Fin Hydrofoil Stabilizer

- DOEL-FIN is the original hydrofoil developed by an aeronautical engineer to improve overall performance on any boat with an outboard motor or outdrive unit.
- Use Doel-Fin on ALL boats, from small dinghies to large ocean cruisers!
- Doel-Fin was designed to produce maximum lift while minimizing drag.
- Creating lift in the stern compensates for motor weight for smoother turns, better gas mileage and less stern drag.
- Molded in 2 pieces of guaranteed unbreakable, high-strength plastic, each foil is designed to flex independently to absorb shock.
- The positive effects include greater stability, consistent planing at lower RPM, faster out-of-the-hole performance, steadier turns, higher top-end speeds and lower bow rise at all speeds.
- Doel-Fin improves overall performance, even on boats with well-designed hulls.
- Save up to 30% on fuel consumption.
- Faster out-of-the-hole means happier water skiers.
- Maintain lower planing speeds without constant throttle adjustments for wakeboarding, tubing or beginning skiers.
- Less bow rise improves visibility and increases safety.
- Simple 15-minute installation; hardware included.
- Doel-Fin is designed for use with small motors, big motors, and inflatable dinghies.
- Boats with small motors no longer "porpoise" with the bow-up when the throttle is applied and achieve planing at lower engine speeds.
- Big motors benefit from less stern suction, faster planing times and steadier turns.
- The Doel-Fin stabilizer is sold in sets of left and right fins.
- Black.

Centek Vernatube

- It is a resin-impregnated glass filament wound tubing wound exclusively with a fire retardant resin formulated for high temperature applications.
- Used to fabricate many of the basic components used to manufacture our wet marine exhaust systems.
- The smooth, resin-rich I.D. assures minimal restriction to exhaust gases and cooling water flowing through the tubing.
- Precise control of the outside diameter ensures ease of connecting mating ports with marine exhaust hose.
- Warning: Vernatube should never be installed in an exhaust system where structural loads from the boat/vessel might be transferred to the tube producing stress.
- Such stress could result in damage or failure of the tube or other components of the system.
- Sold in 10' lengths, pricing is per foot.

Attwood Portable Fuel Tanks

- Automotive Grade multi-layer Co-extruded HDPE/EVOP tank material prevents the evaporation of gasoline saving gas and money
- Compatible with 1/4" NPT fuel fittings
- Exclusive no-joint injection molded tank interfaces ensure leak free performance in severe conditions
- Ratcheting cap with tether ensures proper tank closure and prevents accidental cap loss.
- Cap includes automatic vacuum valve that eliminates the traditional manual thumb screw and prevents water from leaking into tank.
- Cap includes industry leading high-flow automatic vacuum valve with ultra-low fuel restriction (less than 1kpa restriction at 50 liters/hour) ensuring proper fuel flow and reducing fuel pump stress.
- True liquid fuel capacity
- Additional tank capacity for 1:16 2 cycle oil blend (.75 gallons) plus 5% vapor space for fuel thermal expansion.
- UV and ozone resistant.
- EPA and CARB Certified.
- Built and tested to ABYC H25, ASTM F852 and USCG Standards.
- Compatible with Ethanol blended fuels.
- 2 year warranty.
- 100% leak tested prior to delivery.

- **Includes impact resistant, high visibility UV protected fuel gauge.**

7-6959	Universal Electric Fuel Sender Gasket	$9.98 G

Moeller Electric Sending Units

- Swingarm Electric Sending Units gather fuel level information the same way as the mechanical sending units. It does, however, connect to a dash mounted gauge without a conversion capsule. They are also a DIY product, letting the consumer measure their tank depth and make the swingarm the correct length.
- Internal components will not rust or corrode.
- Float rotates easily in 90 degree increments for tanks wall and baffle clearance.

Moeller Swingarm Mechanical Switch Sending Units

- With a direct site gauge or with the conversion capsule gathers fuel level information with the float.
- While accurate, the gauge will fluctuates as the fuel in the tank "slosh" around the tank when boating because of the moving parts - the float.
- Calibrated to 33 to 240 Ohm's.

Attwood Fuel Demand Valve

- Attwood's exclusive Fuel Demand Valve ensures pressurized fuel does not reach the engine preventing engine flooding and fuel spillage.
- New EPA portable fuel tanks are required to remain sealed up to a minimum of 5 psi.
- The valve provides fuel to the engine only when demanded by the engine during start up or engine operation.
- Designed in partnership with OEM engine manufacturers the Attwood Fuel Demand Valve is compatible with all OEM Engine brands and helps to ensure proper engine start up and function.
- Prevents fuel spray down stream from the Fuel Demand Valve. Use the Attwood Universal Sprayless Connector to prevent spraying at the fuel tank (8838US6).
- Made of high-strength composite material designed to withstand harsh abuse of marine environment.
- Compatible with 3/8" and 5/16" fuel hose.
- Installs between the fuel tank and the primer bulb.
- Low vacuum restriction helps ensure proper engine function during startup and engine operation (less than 2 kPa at 125 liters/hour) 20 psi max. nominal input pressure. Protected for 40 psi pressure spike.
- Built-in manual override.
- Compatible with Ethanol blended fuels
- Compatible with all OEM brand engines (1 HP - 350 HP).
- OEM quality and performance at a fraction of the price.
- 2 Year Warranty.

Attwood Universal Sprayless Connector

- The Universal Sprayless Connector is a safe way to eliminate the spraying of fuel when connecting and disconnecting pressurized fuel hoses during fueling or maintenance. Includes male and female connectors for use with all standard marine fuel tanks in (6.4 mm) NPT fittings. (Always use threaded sealant.)
- Replaces traditional tank fittings and eliminates spray when connecting or disconnecting fuel fittings.
- Includes both Male Tank and Female Hose Connectors
- High strength body engineered to withstand abuse in harsh marine environment.
- Female hose fitting compatible with 3/8" and 5/16" fuel lines.
- Male tank fitting compatible with standard 1/4" NPT fuel tank output. Use thread sealant.
- Male and female connectors include check valves that automatically close upon disconnecting.
- High fuel flow fitting (less than .25 kpa restriction at 50 liters/hour)
- Connectors designed to automatically seal if accidentally ripped apart.
- Compatible with Ethanol blended fuels
- All Attwood portable fuel components are designed to exceed OEM engine fuel flow requirements.
- Compatible with all OEM brand engines (1 HP - 350 HP).
- Meets all EPA and CARB requirements.
- 2 Year Warranty.

Marpac Premier Primer Bulbs are specifically designed for use with E10 and E85 fuel blends. The materials used to produce also make the bulbs more resistant to heat and chemicals improving the tear strength but still allow the bulb to stay pliable in cold weather environments. The Viton check balls are more resistant to Ethanol and the stainless steel springs and dual big bore check valves allows the bulb to prime more rapidly.

Marpac Premier Uniflow Primer Bulbs

- Meets EPA Low Permeation Mandates and the Stringent Requirements of SAE J1527 B1-15 and ISO 8469.
- Specifically designed for use with ethanol E10 and E85 fuel blends.
- Works with both gasoline or diesel fuels.
- Rapid prime with dual big bore check valves.
- Viton® balls and stainless steel springs for greater longevity and better prime every time.
- Stainless steel clamps.
- Specially formulated blue material stays pliable, even in cold weather.

Racor Heat Sensors

- Work in conjunction with the Master Control to protect the engine from abnormally high coolant, transmission oil or crankcase oil temperature.
- Temperature actuation settings of 180° to 260° F (82° F to 127° C) can be specified as required for engine coolant and lubricating oil, transmissions, driven compressors, and more.
- The heat sensor must be monitoring moving fluid.

Order No.	Mfg. No. / Description	Price
314754	(H-218) 218° Fahrenheit, 1/2" NPT	$201.98 F
314760	(HA-212) 212° Fahrenheit, 3/8" NPT	$212.98 G

Racor Coolant Pressure Valve

- Monitors coolant system pressure to prevent expensive diesel engines from over heating by sudden loss of coolant.
- Allows smoother activation and the CPV will not cycle when the pilot pressure is low.
- Because unnecessary open-and-close cycling causes wear to the Master Control quad rings, this new operation feature means additional service life for Master Controls and a more positive shutdown.
- Made of fiberglass-filed nylon with an aluminum base.
- These corrosion resistant materials are particularly important in underground, marine and hazardous environment applications.

Racor Versatile RVFS Series

- Racor RVFS Series filter vessel applications include removing liquid and solid contaminants from diesel fuel, gasoline, kerosene, aviation gas, jet fuel and other lubricating or hydraulic oils.
- RVFS vessels utilize proven filter design technology and can be used as coalescers, pre-filters or separators by changing internal components, flow direction or by selecting optional filter cartridges when ordering.
- The vessels are fabricated from carbon steel with an exterior primer coating of Gavlon suede gray and the interior is epoxy coated to meet MIL-C-4556E.
- Element choices include coalescers, separators, particulate, clay bags, pre-filters or water absorbing cartridges.
- Completely dressed factory filter vessels can be specified with differential pressure gauges, water sight glasses, air eliminators, and manual or automatic drains.
- Wall mount units can be special ordered.
- Consult factory for other options.
- Fuel ports: 2. Maximum flow rate 50 GPM. Maximum working pressure: Jet A, AV Gas Flow Rates.
- Clear pressure drop: 50 GPM.
- Temperature rating: Diesel Fuel Flow Rates, 25 GPM.
- Design pressure: 245 PSI.
- Design temperature: 250 F.
- Replacement elements: RK 22610.

Z = HPDI series					B = 2003	
					C = 2004	
					D = 2005	

Starting in April 2005 (2006 Model Year and newer) Yamaha no longer designated model years at the end of the model number identification. Beginning at this time any subsequent "new model" will have a letter designation between the Horsepower and the Control / Tilt Method.

Example:
VZ300TLRD = 2005 VZ300TLR = New model after April 2005. VZ300BTLR = Newest Model and direct replacement for previous models.

Example:
SX150TLRY - Saltwater EFI, 150 HP, Trim & Tilt w/electric start, 20", Remote control, 2000 model

WARRANTY, REPAIRS and REPLACEMENTS

LEHR prides itself in good customer service. Each and every outboard engine is run tested at the factory and receives a final QC inspection by one or more of LEHR's quality control staff. If however, a fault should be found with a LEHR unit, please call LEHR customer service FIRST. (1-866-941-5347). This applies to ALL situations, including new not yet used units as well as those that have already been sold and used by the customer. We have found that most issues can be easily solved over the phone. For this reason, all sales persons should also make the customer aware that if they have any questions, or encounter any problems, there is a LEHR representative ready to help them by calling the toll free number on the tiller arm decal 7 days per week 8 a.m. to 8 p.m. Pacific Standard Time.

AUTHENTIC GM MARINE ENGINES
MARINE POWER®
THE FORCE BEHIND THE FUN.™

Fully built replacement engine with multiple option possibilities to match most Mercruiser, Volvo and OMC stern drive applications. Ideal replacement upgrade for old engines with outdated technology and weak horsepower. Offered with Delphi fuel injections, fresh water cooling, and power steering from the 3.0 Liter to 7.4 Liter engines.

Complete inboard engine configured for use with ZF and Velvet Drive marine transmissions. Perfect for repowering the weekend cruiser or wake and ski boats. Offered with Delphi fuel injection and fresh water cooling from the 3.0 Liter to 7.4 Liter engines. Includes dual remote oil filters for added filtration and service convenience plus top mount starters for better serviceability.*

*4.3l/262ci model does not include top mount starter or remote oil system.

New and complete GM long block engine from oil pan through valve covers; easily configurable for replacement of stern drive or inboard engines.

Save valuable rebuild and setup time with this ideal power-packed replacement for older pre-Vortec engines. Includes complete service base engine, carburetor, fuel line, electric fuel pump, aluminum intake manifold, electronic distributor, high-performance coil and ignition wire set.

Where Speed Begins

Lexor
Stainless Steel Propellers

- All around performance.
- Large diameter and blade area for big boat loads.
- Great high speed performance without sacrificing mid-range speeds.

HR Titan 3
Stainless Steel Propellers

- Performance stainless steel propeller for high speed planning hulls.
- Heavy cup design increases bite and reduces slip.

HR Titan 4
Stainless Steel Propellers

- Performance stainless steel propeller for high speed planning hulls.
- Heavy cup design increases bite and reduces slip.

Saturn
Stainless Steel Propellers

- General purpose stainless steel propeller.

New Saturn
Stainless Steel Propellers

- All around performance stainless steel propeller with good acceleration.
- Large ear design is ideal for pontoons, commercial hulls and heavy loads.

Amita 3
Aluminum Propellers

- Outstanding acceleration and top speed.

Amita 4
Aluminum Propellers

- 4 Blade Aluminum.
- Increased static thrust for heavy loads and manueverability.
- Great stern lift and mid-range performance.

Amita 3-C Plus & 3-E Plus
Aluminum Propellers

Better thrust. Suitable for heavy boats. Traditional rubber hub. Larger blade design.

Michigan Wheel Marine

Michigan Match propellers are high quality, performance propellers that typically cost less than the OEM propeller you're replacing. Each Michigan Match propeller features a NAVAL brass spindle with a rubber cushioned hub, designed to absorb impact and the stress caused by shifting gears. The rubber bushing is designed to spin free under significant impact, reducing the potential for lower unit damage. Michigan Match propellers are great primary propellers, priced as a weekend-saving spare!

Stainless Steel

Aluminum

Michigan Wheel's Xchangeable Hub System absorbs impact and stress caused by shifting gears and is designed to spin under significant impact to protect your lower end unit. XHS™ is also designed to be interchangeable with Mercury's Flo-Torq™ II hub system, potentially saving you money when replacing or upgrading your propeller. Note: Must order propeller and hub kit seperately!

OMC SYSTEMATCHED™

SX3

Stainless Steel Propellers

- General Purpose and Durability.
- Fast planing 3 blade versatile prop.
- Cupped blades provide superior performance.
- Ideal upgrade from aluminum.
- Note: If a customer has an aluminum propeller, a "direct pitch" replacement (same and diameter) is recommended when upgrading.

VX3

Stainless Steel Propellers

- Runabouts and General Recreation.
- Excellent on any recreational boat, from runabouts and cruisers to deck boats.
- Versatile 3 blade performance.
- Custom high luster finish.
- Balance of speed and durability.

CX4

Stainless Steel Propellers

- 4 Blade Offshore Cruising and Runabouts.
- Designed for heavier and twin-engine boats as well as runabouts.
- Stays on plane with minimum RPM.
- Tracks true in all water conditions.
- Less vibrations and improved fuel economy.

Aluminum Series

Aluminum Propellers

- Precision casting provides greater strength and longer life.
- Baked-on corrosion resistant paint gives added protection.
- Engineered to match the power curve of your outboard for superior performance.

Stiletto STAINLESS

Advantage I & Advantage II

Stainless Steel Propellers

- One-piece investment cast stainless steel for exceptional strength and safety.
- Progressive design.
- Cupped blades help reduce the chance of cavitation, increasing efficiency and performance.
- Designed to help achieve peak performance at all throttle levels.
- Advantage II: Designed for 135 and Higher H.P.
- Advantage I: Designed for 70-140 H.P.

Triad I & Triad II

Stainless Steel Propellers

- Stainless steel three blade propeller.
- Peak performance at all throttle levels.
- Triad II: Designed for 35-70 H.P.
- Triad I: Designed for 25-35 H.P.

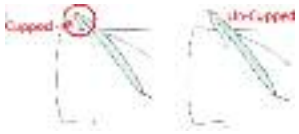
Basic Propeller Information

Propeller Basics:

This information is critical to determining the correct propeller for your application:

1. 3 or 4 Blades?
A 3-blade propeller usually offers top speed performance while a 4-blade propeller provides a maximum thrust and smooth cruising operation.



2. Diameter:
Diameter is the distance across a circle encompassing all of the propeller blades. (See Original Equipment Considerations item 2 below).

3. Pitch:
Pitch is the theoretical distance a propeller will move through the water for each revolution (i.e. a 21" pitch propeller shold move a boat forward 21" for each revolution, assuming there is no slippage).

4. Right Hand or Left Hand Rotation?
In most cases, right hand propellers are used for single engine applications and one left hand propeller is used for twin engine applications to achieve better steering control.

5. Cupped Blades:
This is a technique used to enhance the performance of propellers under certain conditions. A cupped propeller will exhibit very high efficiency at high speeds as well as minimize cavitation under heavy loads.

6. Rake:
Rake is a special design feature. Positive rake benefits from normal bow lift to permit the use of a larger diameter propeller, while negative rake can provide extra blade strength for use in very high speed applications.

Original Equipment Considerations:

1. Determine the year, brand, model and horsepower of your motor.
2. Calculate the diameter of the OEM propeller by measuring from the center of the shaft hole to the tip of a blade x 2 (Example: a measurement of 7-1/4" - a diameter of 14-1/2").
3. Is the type of material aluminum or stainless steel?

Performance Considerations:

1. Type of boat (cruiser, ski, runabout, bass, pontoon)?
2. Prop on boat now (brand, model, diameter, pitch, cupping)?
3. Engine RPM at wide open throttle (WOT)?
4. Speed of boat over water at WOT?
5. Normal operating altitude (motors lose 3% of power per 1000 ft.)?

SOLAS Propeller Accessories Installation Instructions

Mercury Installation

It is very important to refer to your Engine's Owner Manual for important safety precautions when installing the propeller. Use the original propeller hardware thrust washer, spacer, locking tab, nut, and cotter pin depending on engine/drive manufacturer. This is a Mercury installation instruction.

1. Put the **Thrust Washer** on propeller shaft, just as it came off. The taper on the **Thrust Washer** should mate properly with the taper on the propeller shaft.
2. **Grease the propeller shaft.**
3. Slide the propeller assembly onto the propeller shaft.
4. Install **Spacer** if required. Consult your engine/drive manual.
5. Install the **Tab Washer** if required. Consult your engine/drive manual.
6. Make sure the shaft splines are engaged with spines in space.
7. Install the **Shaft Nut**. Consult your engine/drive manual for proper torque.
8. Secure nut by bending tabs on the **Tab Washer** to engage slots in **Spacer**.

Warning: Always shift engine into the neutral position. Remove spark plug leads and ignition coil lead when you are servicing the propeller.

SOLAS® Where Speed Begins

Rubex Stainless Steel Interchangeable Hub Propellers

C4

- Four blade propeller.
- Provides great stern lift and acceleration.
- Exceptional handling and maneuverability.
- Increased speed and fuel efficiencies in the engine mid-range.
- Excellent cruising performance.

NS3

- All-around performance.
- Offers good acceleration.
- Smaller sizes offered in extra large diameter with increased blade area.
- Large ear design is ideal for pontoons, commercial hulls, and heavy loads.

HR4

- Four blade propeller.
- Great stern lift and acceleration.
- Excellent Cruising Characteristics.
- Delivers a very smooth and powerful thrust.
- Increased speed and fuel efficiency in the motor's mid-range.

L3

- All-around performance.
- Large diameter and blade area for big boat loads.
- Great high speed performance without sacrificing mid-range speeds.
- Excellent fuel economy for offshore boats.

L3 Plus

- All-around performance.
- Large diameter and blade area for big boat loads.
- Great high speed performance without sacrificing mid-range speeds.
- Excellent fuel economy for offshore boats.

L4

- All-around performance.
- Four blade propeller
- Large diameter and blade area for big boat loads.
- Great high speed performance without sacrificing mid-range speeds.
- Excellent fuel economy for offshore boats.

S3

- High performance for bass and bay boats.
- High rake design for increased bow lift.
- Extra cupping for great bite in high engine mount positions.
- Cut down blade design reduces drag.
- Incorporates tuned exhaust relief for improved acceleration.

Michigan Wheel Xchangeable Hub System

Michigan Wheel's Xchangeable Hub System absorbs impact and stress caused by shifting gears and is designed to spin under significant impact to protect your lower end unit. XHS™ is also designed to be interchangeable with Mercury's Flo-Torq™ II Hub System, potentially saving you money when replacing or upgrading your propeller.

Must order propeller & hub kit seperately!

- Clutch pumps combine the unique advantages of the self-priming flexible impeller Jabsco pump and a clutch-drive mechanism to engage or disengage the pump as needed.
- They are available with either manual or electric clutches for application versatility.
- Generally they are powered by propulsion engines but may be driven by any adequate source of belt drive power.
- The clutch will "free wheel" with the source of power until the pump is required.
- Then, whenever desired, the clutch can be engaged to throw the pump into operation for emergency of general circulation requirements.
- Constructed with bronze pump bodies and rotary-mechanical face seals.
- They are equipped with replaceable brass cam and wearplate to prolong serviceability.
- The removable end cover allows easy impeller replacement without having to remove plumbing or drive belt.
- They are ideal for bilge pumping, livewell circulation, deck washdown and many commercial or pleasure boat general pumping requirements.

Jabsco Manual Clutch Pumps

417675

417698

- The manual clutch pumps are equipped with a mechanically activated clutch that is engaged with the flip of a lever on the pump body.
- Although they require the operator to go to the location of the pump to put it into service, they do provide security of operation in the event of an electrical power failure.
- The 51000-Series clutch pumps are capable of operating in either rotational direction.
- The 6590-0005 must rotate in a clockwise direction looking at the end cover.
- 417675 and 417687 has a 6" diameter pulley.
- 417698 has a 7" diameter pulley.

Groco U-Lube Oil Change Systems

GROCO

- At the heart of GROCO's U-Lube systems is a powerful gear pump that delivers an honest 3-plus GPM.
- All models have dry-run protection, touchpad control, a plumbing schematic to tell you what hose goes where, and a handy maintenance log.
- G-3 is covered (except for the valves), for a clean engine room appearance, and offers a compact mount footprint. Touch-pad control and over-current protection are cover-mounted.
- G-6 is covered (except for the valves), and offer a slim mount footprint. Touch-pad control and over-current protection are cover-mounted.

Jabsco Vane Pumps

JABSCO

- Self-priming rotary vane pumps are a positive displacement type design with an off-center eccentric rotor whose vanes slide inward and outward, as they move from the top to the bottom of the bore; this action creates a vacuum to pull liquid into the pump.
- Diesel fuel transfer and engine oil changing.
- Intermittent duty - 30 minutes maximum.
- Port Type: 1/2" NPT female and 1" hose barb.
- Note: Do not pump gasoline or other explosive liquids.

417053	(18680-1000) 6 GPM, 12 volt, Reversible	$382.98 G

Groco Gear Pumps

GROCO

- Self-priming, are instantly reversible, and are capable of operation in either direction.
- Relatively low flow (less than vane pumps) makes them suitable for duties such as deck-wash, fuel transfer, ballast transfer, and oil change.
- All models have an ignition protected motor and #316 stainless steel shaft, and are available in models that provide reversing (R), remote reversing (RR),and reversing with touchpad (RT) control options.
- 3/8" NPT.
- Note: Do not pump gasoline or other explosive liquids.

Jabsco Pneumatic Accumulator Tank

- Pre-pressurized to 20 PSI.
- Diameter 8", height 12-5/8".
- This pneumatic accumulator tank will smooth flow from faucets and shower, reducing pump cycling and eliminating pulsations and water hammer.
- Water is totally separated from air chamber by a diaphragm and polypropylene tank liner.
- Volume of tank is 2 gallons with a working water volume of about 1 gallon.
- Mounts horizontally or vertically, even upside down.
- Port is 3/4" NPT (male). Includes brackets and band clamps.
- May be fine tuned to cut-in pressure of pump.
- Maximum working pressure 100 PSI.

Groco Pressure Storage Tanks

- A pneumatic pressure charge, matched to the pump cut-on pressure prevents waterlogging by separating the air charge from system water pressure with a rubber bladder.
- The result is smooth pressure delivery, even temperature mix in showers, and reduced pump cycling.
- Tanks may be mounted in any position and anywhere in the cold water plumbing after the pump.
- PST tanks may be used for fresh or salt water.
- Mount hardware is included.
- Pipe connection 3/4".

* Drawdown is measured with 20 PSI air charge and with 40 PSI system water pressure.

March Seal-Less Magnetic Drive Pumps

- For use submerged or in damp environments.
- Magnetic drive - no shaft seal to wear, leak, or replace.
- Extremely low energy consumption.
- March epoxy encapsulated circulating pumps with seal-less magnetic drive offer the ultimate in reliability.
- These versatile pumps are widely used on commercial and pleasure craft for recirculating sea water and for air conditioning and refrigeration.
- All models can be run in open air or submerged except model AC-5C-MD, which must be in a dry environment.
- All centrifugal pumps require a flooded inlet (suction side of pump).

Corrosion Technologies CorrosionX

- RECENTLY NAMED ONE OF THE TOP 10 BOAT CARE PRODUCTS EVER, CorrosionX is the most advanced and effective corrosion prevention compound, lubricant and penetrant in the world!
- Although it may look like an ordinary oil-based anti-corrosion spray, CorrosionX utilizes a revolutionary technology called Polar Bonding that does far more than merely slow down the corrosion process; CorrosionX actually kills existing rust and corrosion (keeping it from spreading) and provides long-term protection against rust and corrosion on any metal surface.
- Because CorrosionX bonds to metal, it doesn't wash off, so it lubricates metal wear surfaces longer and more effectively (virtually eliminating wear) than any other product.
- It also penetrates quicker than products specifically designed for that purpose.
- CorrosionX contains less than 1/10 the Volatile Organic Content (VOCs) as most other spray lubes (so it's safe on the environment), and it's also excellent for restoring and preventing corrosion on electronics.

Corrosion Technologies CorrosionX Heavy Duty

- NAMED "BEST OF THE BEST" by Field and Stream magazine, CorrosionX Heavy Duty is for super long-term protection against serious rust and corrosion assault.
- There is no other product like it on the market today.
- Heavy Duty is a high performance, thick-film version of CorrosionX.
- It was developed specifically to provide maximum protection against moisture intrusion and resulting rust and corrosion.
- Highly recommended for use on boat trailers.
- CorrosionX Heavy Duty forms a dripless, dynamic, non-hardening, self-healing film that stubbornly resists erosion by splash or spray - including complete submersion in saltwater.
- It will slowly penetrate existing rust and corrosion, remove moisture and stop electrolysis.
- Unlike wax coatings, it will not dry out, stiffen or crack under stress.
- It will remain for hours on outdrives, even while underway!

Taylor Made D-Icer

- It is a powerful submersible motor-driven water circulation unit that prevents ice formation during winter months by continuously propelling warmer subsurface water up to the surface.
- It's ideal for use around a boat or dock.
- The unique one-piece design of the shroud prevents large debris from being sucked through and damaging the propeller, a major cause of failure in other ice prevention devices.
- Optional thermostat control is available, as well as an optional flotation collar to hold the D-Icer near the surface for aerating.
- Oil-Free design is more energy efficient than the typical Oil-Filled units.
- 2 Year Warranty.

Duramax® Ultra-X™ Packing

- Dissipates frictional heat, over 5 times more thermally conductive than flax and PTFE.
- Grease-free installation.
- Virtually eliminates shaft scoring-stays pliable, never hardens or becomes abrasive.
- Leakage practically eliminated.
- Lasts over 5 times longer than other packing.

PSS Shaft Seals

- The PSS Shaft Seal is a mechanical seal that uses a self-aligning carbon-graphite stator to ensure a 100% watertight seal with proven reliability.
- This seal will eliminate shaft wear and minimize corrosion.
- A mechanical seal is created by the contact of a turning surface against a stationary surface.
- In the case of the PSS Shaft Seal, the stationary surface is a carbon flange held in contact against a stainless steel rotor which turns with the shaft.
- The carbon flange is attached to the boat by a nitrile bellow which, with the help of water pressure, produces a constant contact between the carbon and the stainless steel ring.
- These type of seals are unaffected by engine motion or vibrations.
- The result is a 100% watertight and totally maintenance-free seal.

Gore Tex Packing

- For marine use is virtually maintenance-free and hardly ever drips.
- It keeps bilges clean and helps to meet current environmental requirements.
- Runs cool, even at high shaft speeds, because it dissipates frictional heat.
- It is over four times more thermally conductive than flax.
- With only minimal thermal expansion, GFO fiber packing easily handles high shaft speeds without being consumed or destroyed.

Key Features:

- Runs cool at high shaft speeds.
- Grease-free.
- Minimum leakage, hardly drips.

Key Benefits:

- Virtually Maintenance-Free.
- Eliminates costly equipment damage.
- Chemically inert.
- Does not cause galvanic corrosion.

R.E. Thomas Piranha Dual Line Cutter

- The PIRANHA line cutter features dual serrated cutting edges for unmatched performance, machined from high quality stainless steel.
- Dual serrated edge designed allows for a cleaner more efficient cutting surface.
- Reduce the worry of entanglement when navigating in low visibility conditions.
- Simple & stabile precision split design eliminates the need to remove your propeller.
- The design allows for the cutter to be re-sharpened.

Duramax® Flanged Bearings

DURAMAX MARINE

- Johnson Cutless Flanged Bearings are centrifugally cast naval brass with an integral range for bolting to stern tube or strut housing to retain bearing and prevent rotation in housing.
- Specially formulated oil and chemical resistant nitrile rubber is securely bonded to the shell.
- Shells are heavy walled providing structural strength and can be step turned if desired.
- Flanges are furnished UN-DRILLED unless specified.
- For Split and Stepped Styles see page 6.
- PRECAUTION: When shrink fitting of the bearing is required, chilling must be achieved by gradual cooling to not more than minus 20F(-28C) using freezer or regular ice (DO NOT DRY ICE).
- NOTE: Pounding or shocking the bearing while in the chilled state could cause the rubber to separate from the shell.
- Approved Bearings: Johnson Cutless Naval Brass Flanged Bearings meet military specification MIL-B-17901 (Ships) Class II Full-Molded type and have full type approval from The American Bureau of Shipping.

Newmar Galvanic Isolator

- Sacrificial zincs corrode away as they protect metal thru hulls, shafts and props from damaging electrolysis.
- Stray, low voltage current flowing between the AC safety ground and DC bonding system is a principal cause of this "galvanic" action.
- Installing the Galvanic Isolator between the AC safety ground and DC bonding system, blocks a majority of the low voltage currents and corrosive action on the zincs is significantly reduced (while the integrity of the critical safety ground path is maintained.)
- This means a significant savings in boat haul-out fees and zinc replacement costs.
- For additional safety, all units feature a large capacitor, providing a secondary low impedance path for sending AC current to ground.

Boero Altura Extra 619

Boero SuperNavi Altura Extra 619 is a hard, protective antifouling paint formulated for use in the highest fouling areas. While 619 works exceptionally well on boats frequently sitting at a dock, it is also extremely effective on vessels requiring a harder coating for high-speed usage of demanding operating conditions. Ever-Clean antifouling technology combines a high load of cuprous oxide and the organic biocide Irgarol, which results in unprecedented resistance to fight barnacles, slime and algae and will perform for extended periods of service. Its hard matrix surface is abrasion resistant and can be scrubbed if desired. It has excellent adhesion when applied over most hard antifouling coatings that are clean and well adhered to the hull. Altura Extra 619 can be applied over most hard antifouling paints. Old soft or ablative antifouling paints should be removed or painted with Mistral Extra Advanced Self-Polishing Ablative 633 for best results. Altura 619 is formulated to be used on vessels of all sizes traveling at 4 to 50 knots, in fresh or salt water. Altura 619 Advanced Hard Matrix meets EPA guidelines for safe to use raw materials, and have passed the most stringent water quality tests required by EPA. If you are looking for a hard, strongest, long life bottom paint Altura 619 is your best choice.

- Highest level of biocides to fight severe fouling conditions.
- EVER-CLEAN Technology fights slime like no other.
- Its dual biocide formulation insures long life protection.
- Hard surface can be polished, burnished or scrubbed.
- Its clean bottom saves fuel and reduces carbon footprint.
- Made in the USA.

Boero SuperNavi Mistral Extra 633

Boero SuperNavi Mistral Extra 633 Advanced Self-Polishing Ablative antifouling paint is the longest lasting multi-seasonal, long-life formulation designed to provide maximum fouling resistance even in the most severe fouling areas. It is formulated to wash away at a highly controlled rate constantly releasing enough slime-fighting ingredients to prevent fouling each day. In fact, Mistral Extra 633 actually becomes smoother with age, eliminating surface roughness like other, less sophisticated ablative paints. Ever-Clean antifouling technology combines the controlled release of biocide with a high load of cuprous oxide and the organic biocide Irgarol to fight barnacles, slime and algae. As a result, this product will stay clean; get smoother with use and save fuel. It is formulated to meet the needs of boats of all sizes from small to superyachts, traveling from 4 to 45 knots, in fresh or salt water. Regardless of whether you haul your boat for winter storage or repairs, Boero Mistral Extra 633 can remain out of the water and re-launched without repainting. It is compatible with any well adhered and sanded bottom paint (except those containing Teflon®). Mistral Extra Advanced Self-Polishing Ablative 633 meets EPA guidelines for safe to use raw materials and have passed the most stringent water quality tests required by EPA. If you are looking for a long life antifouling paint to polish away with time, doesn't build up on your hull, yet improves fuel efficiency, Mistral Extra 633 is for you.

- True Multi-Year Protection.
- EVER-CLEAN Technology fights slime like no other Highest Copper level ablative to fight aggressive fouling.
- Haul and relaunch without repainting.

Boero Sunglass High Gloss Varnish 667

Boero Sunglass High Gloss Varnish 667 has a rich gloss level to enhance the color and grain of the wood. Its clear color highlights the wood grain like no other. Sungloss is also formulated with a unique blend of phenol-modified alkyd resin with Tall oil and Linseed oil to deliver a protective coating that moves or flexes with the wood as the boat moves through the water. This flexibility prevents Sungloss from cracking, which will cause damage to the wood and shorten the life of the varnish system. It is also highly abrasion resistant on the surface making it well suited for decks, toerails and other abrasion areas. It combines UV absorbers and light stabilizers to protect the wood and extend the life of the varnish. Beautiful gloss, flexibility, abrasion resistance and grain enhancement are the reasons 667 Sungloss is preferred by the most demanding professional varnish applicators.

- A Clear color to highlight the wood grain.
- Flexes with the movement of the hull.
- Excellent resistance to abrasion.
- Fast dry, two coats in one day at 70.

Boero Polywood Wood Sealer Two Component Clear Sealer 671

Boero Polywood Wood Sealer two Component Clear Sealer 671 is formulated to fill the porosity of wood quickly to reduce the total number of coats in a complete varnish system. It can seal teak, mahogany, and spruce, marine plywood, MDF and other woods used on boats. This two component product will fill wood grain, as well as, eliminating pin holes in the varnish film to complete the full varnish system. It accomplishes this by penetrating and sealing the wood surface and is fast and easy to sand prior to the application of varnishes. Either one or two coats are typically required. It can be over-coated by all one or two part component varnishes and clears. If an applicator is interested in stabilizing a new wood surface and expediting the application of a full clear system, the application of 671 Polywood Wood Sealer is the answer.

- A Two-component wood sealer to seal wood fibers and porosity in bare wood to yield the ideal primer.
- Extends the life of two-component and one component clear systems.
- Polywood dries very quickly and will allow two coats to be applied in one day.

It can be used to fill, fair or shape areas above and below water. Boero Epoxy Filler 260 is designed to fill holes and scratches in gelcoat, fiberglass and on keels, as well as, aluminum, steel and wood surfaces. This filler is solvent free and will not shrink when drying. It is the ideal filler to be used as part of a gelcoat blistering repair system such as the Defender Underwater Epoxy Primer 613. At 68°F Boero Epoxy Filler is very fast drying and can be sanded in 3-4 hours after application. It is the fastest drying 100% solids epoxy filler allowing the job to be finished sooner. It is particularly easy to sand if done before curing for 72 hours. It can be applied to 5/8" without sagging and can be applied to greater thicknesses when filling a hole or void without cracking. If you are looking for an easy to use, fast drying, highly water resistant epoxy filler for use above and below water Boero Epoxy Filler 260 is your best choice.

- An easy to use 1 to 1 mix.
- Faster dry times to sanding or overcoating than competitive epoxy resin fillers to improve productivity.
- Highly water and solvent resistant to prevent blistering.
- Well suited for above and below water use.
- Should be used as part of a fiberglass blister repair.
- Effective to fix and shape boat keels while resisting water.

Boero 200 Boero Fiberglass No-Sand Primer

Boero Fiberglass No-sand Primer 200 is formulated to eliminate the need to sand a new or bare fiberglass hull before the application of antifouling paint. 200 No-sand Primer is an adhesion primer to be applied between the antifouling paint and the fiberglass hull to improve the attachment of the bottom paint. Best results will be achieved after cleaning the fiberglass hulls with 680 Boero Dewaxer and Solvent Wash. Ideal for use on vinyl ester gelcoats, where sanding may void the hull warrantee. It may also be used on epoxy primer to improve adhesion of the antifouling paint. Unlike other brands of no-sand primers, 200 No-sand Primer can be overcoated up to 7 days after application.

- Eliminates the need to sand new and bare fiberglass.
- An adhesion primer between bottom paint and hull or epoxy primer.
- Ideal over vinyl ester gelcoat if sanding is not recommended.
- Has longer overcoating time to provide convenience.
- Made in the USA.

Boero Epomar Fine Filler 604

Mix 2.6 liter can of 604 Epomar with a 1.4 liter can of 604C Component B Epomar hardener

Boero Epomar Fine Filler 604 is ultra fine two-component epoxy trowelable filler especially developed to fill minor imperfections on the vessel surface. It is ideal as a fine filler to remove porosity and sanding scratches. It can be used to create a perfect profile on surfaces above and below the waterline. This filler is solvent free and does not shrink when drying. It is easy to mix and apply to large and small areas. This product is commonly used on surfaces treated with high build epoxy filler such as 620 Epolight Plus or 656 Epolight Win. It is formulated to be mixed with 620 Epolight Plus or 656 Epolight Epoxy fillers if desired, to provide applicators with additional options to meet their fairing needs.

- A two component fine filler for above and below water.
- Used to fill minor imperfections such as porosity, pin holes and sanding scratched.
- Solvent free and highly solvent resistant.
- A 2:1 mix ratio.
- Can be used above or below water.

Boero EpoProfile Filler 605

Boero EpoProfile Filler component B hardener for 605 is a two-component epoxy 1:1mix light weight filler which can be mixed by hand or by an appropriate filler mixing machine calibrated for a 1:1 mix filler. Epoprofile can be easily applied with a trowel or spatula and provides remarkable build capabilities in a single coat. Epoprofile is easy to apply, shape and is resistant to sags. Epoprofile unique technology makes it very easy for the applicator to sand the product. It can be used in all cases where it is necessary to even out an imperfect surface. It provides the additional benefit of not adding unnecessary weight to the vessel. It is particularly suitable for steel and aluminum hulls which require significant amounts of fairing compound material to form the shape of the hull and super structure. Epoprofile 605 can be used above and below the water when used according to directions.

- New Two-Component epoxy light weight 1:1 mix filler.
- Formulated to be mixed by machine for large applications or by hand.
- Remarkable film build capabilities in a single coat.
- Easy to apply and sculpture to complex shape on large and small areas.

Boero 612 Epospray HB

612 Epospray HB is a sprayable high-build filler developed to be applied over epoxy fillers like 620 EPOLIGHT or 604 EPOMAR fillers to reduce both filling and finishing time. It is preferred by many applicators on both new construction, as well as, refit projects. Epospray HB Epoxy Sprayable Filler has excellent adhesion characteristics and has good sanding properties. It will minimize paint system distortion, print through, tension lines and the halo effect around spot repairs. 612 Epospray HB will serve as a very good filler to eliminate FRP print through. This sprayable filler can be used on GRP/fiberglass hulls as finishing filler to fair surface imperfections to deliver a smooth profile. It is formulated to be an ideal foundation to be over coated with epoxy primers and polyurethane undercoats.

- Maximum build spray filler used over Epoprofile, Epolight, Epomar.
- Enables reduced time for fairing and finishing.

Boero 680 Boero Dewaxer and Solvent Wash

680 Boero Dewaxer and Solvent Wash Boero Dewaxer and Solvent Wash 680 is a blend of solvents formulated to remove various forms of surface contaminants on fiberglass or metal surfaces to prepare the surface for painting. A clean surface will improve the adhesion of the paint system. It is particular well suited for bare surfaces to remove fiberglass mold release wax used in the construction of hulls. It is also effective at degreasing metal surfaces prior to painting. To be effective, the wax or grease must be completely removed from the hull. Care must be taken to not simply moving the contaminates from one area of the hull to another area. This can best be done by using clean rags and rotating the rag frequently, as well as, replacing the clean wiping rag often. 680 Dewaxer and Solvent Wash should only be applied outside or in very well ventilated areas. Wear solvent resistant gloves and eye protection. Apply the 680 Dewaxer and Solvent Wash liberally with a clean solvent saturated rag by working in a small area measuring three feet by three feet.

- Removes Fiberglass Mold Release wax on bare gelcoat before painting.
- Can be used as part of a no-sand system on fiberglass surfaces.
- Effective metal surface degreaser prior to painting.
- Used as an effective multi-purpose parts cleaner before painting.

PETTIT MARINE PAINT

PRODUCT GUIDE

HYDROCOAT eco

The Hydrocoat name has long been synonymous with ground breaking water-based marine technology. First with the award-winning Hydrocoat Ablative Antifouling paint - The benchmark for clean, easy to use antifoulings. The line was expanded last year with the development of revolutionary Hydrocoat SR - the world's first dual-biocide, water-based, ablative bottom paint. Dual-biocides that provide outstanding multi-season protection. And now, introducing Hydrocoat Eco - the third in the line-up - again shattering the perceptions of what an antifouling paint can be.

Hydrocoat ECO incorporates Pettit's exclusive self-polishing, water-based ablative technology with organic Econea™ biocide. Hydrocoat Eco utilizes the highest level of new metal-free Econea biocide available combined with a slime fighting inhibitor for unprecedented multi-season protection. Innovative technology is used to replace the harsh solvents found in most bottom paints with water, providing an easier application and clean up, with low VOC's and no heavy solvent smell. Its self-polishing, paint film wears away with use, eliminating paint build up and the need for sanding. This copper-free formula is compatible over almost all bottom paints and is safe for use on all substrates including aluminum. Hydrocoat Eco will not lose effectiveness when removed from the water.

EZ Poxy² 2-PART POLYURETHANE

With 150 years of experience in marine coatings, Pettit has earned a reputation for high quality marine enamels that hold up to the rigors and challenges of even the toughest environments. Our new EZ-Poxy² provides truly superior gloss retention and scratch resistance in a two-part polyurethane enamel that is so easy to use, we couldn't have named it anything else.

EZ-Poxy² is a high-performance, two-part polyurethane marine paint without all of the costs and hassles associated with two-part enamels. EZ-Poxy² combines the added gloss, wear resistance, and durability boaters are looking for in a two-part polyurethane enamel with the ease of application of a single part product. This revolutionary formula reduces the effects of brush strokes and is so forgiving; it's practically foolproof. In fact, EZ-Poxy² is so innovative that it makes exact mixing ratios a thing of the past. Its added UV protection and gloss retention will keep your boat looking shiny and new for years to come. It is more economical, requires less effort, and is more forgiving than the competition.

FRESHWATER ANTIFOULING

SR-21 is an ultra-thin, super slick, low friction film for boat bottoms. It is an ideal racing finish for fresh water or cold saltwater boats. Its dual biocides combine the power of copper and Irgarol to produce an effective, thin film antifouling. It contains the slicking agents PTFE and Molybdenum Disulfide to reduce surface friction, allowing the hull to slide through the water. SR-21 is easy to apply and dries in 15 minutes. Color changes upon immersion.

BLUE - 1221 | ORIGINAL - 1921

Unepoxy® Plus is a durable, hard modified epoxy antifoulant that offers more protection for your dollar. It dries to a hard finish that is able to withstand trailering, beaching, and season-long use. Unepoxy® Plus has excellent adhesion and can be applied over most previously applied bottom paints in good condition. With a high copper load, Unepoxy® Plus offers more protection than standard hard epoxy paints.

BLUE - 1218 | GREEN - 1318 | RED - 1618 | BLACK - 1818

The Protector® has earned its solid reputation by providing excellent long lasting protection. A very high copper load makes it a good choice for tropical and other warm waters where extreme fouling exists. When left in the water, it provides dependable protection for up to two years of service. Its hard modified epoxy base provides a durable, abrasion resistant finish ideal for powerboat or sailboat use. Compatible with most finishes. (Available on the West Coast Only)

EPOXY PRIMERS

Pettit Protect® High-Build Epoxy Primers – **GRAY 4700/4701** is a heavy duty, two component, epoxy coating for use where maximum resistance to fresh or salt water is required. It reduces water absorption making it an excellent choice for osmotic blister prevention and repair. Its high-solids formula allows for quicker and easier application with fewer coats necessary for effective protection. It also offers dependable corrosion protection on all underwater metals.

Pettit Protect® White 4100/4101 offers all the benefits of Gray Pettit Protect® High Build Epoxy Primer in a white color that will not bleed into other primers, enamels or antifouling paints. Specifically designed for use below white and light colored Vivid® bottom paints. Its use reduces the number of finish coats needed to achieve full color. Pettit Protect® White has excellent durability in exterior exposures although, like most epoxies, it will chalk if not top coated.

CLEAN-CORE TECHNOLOGY

Pettit's new **CLEAN CORE TECHNOLOGY** is an enhanced paint film that contains fewer heavy metals, and allows a more consistent release of biocides. The result is more effective antifoulants that release up to 50% less heavy metals into the environment.

How Much Bottom Paint Do I Need?

1. Calculate the square footage of the hull to be painted – multiply the length of the hull by the beam then multiply that total by .85

Length x Beam x .85 = Square Feet of Hull

2. Divide that number (your square foot total) by the amount of coverage the selected bottom paint offers. This will give you a one-coat total.

TOPSIDE

Easypoxy is a modern polyurethane topside and deck enamel improved by the addition of silicone for brilliant shine and easy brushability. It has ultraviolet filters which enhance the already superior gloss retention and durability of polyurethane. The result is a topside finish that's exceptionally easy to apply, producing a lasting gelcoat-like brilliance with a minimum of effort. For a semi-gloss finish for decks and interiors use 3106 Easypoxy Semi-Gloss White or simply add 9080 Easypoxy Satin Additive to any Easypoxy color for a custom satin look. Be sure to use **EZ-Prime 6149** as a base primer prior to application - see the product description below for more information.

New!

EZ-Prime is a multipurpose primer designed for use as a base coat whenever the surface to be painted is aged, cracked, checked, pitted or in any way less than smooth. It can be applied to fiberglass, wood, properly etched metal and previously painted surfaces. EZ-Prime fills imperfections fast, dries quickly and is easy to sand.

White - 6149 | Gray - 6150

EZ-CabinCoat is a high-performance, water-based paint specially formulated for areas such as cabins, that are prone to moisture. A super-tough finish provides a moisture resistant, mold & mildew proof surface that will stay good-looking for years. EZ-CabinCoat provides excellent adhesion to most glossy and hard to paint surfaces without the need for sanding. Easy application, with soap & water cleanup.

White - 3121 | Off White - 3122 | Platinum Gray 3123

EZ-Decks is a super tough polyurethane non-skid performance deck finish containing a polypropylene grit that produces a slip-resistant finish on all decks and cabin soles. The durable weather resistant finish resists long term abrasion and abuse. It's loaded with ultraviolet filters to fight against fading while offering superior color retention that will stay vibrant for years without peeling or cracking.

White - 3127 | Off White - 3128 | Platinum Gray 3129

EZ-Bilge is a durable high-performance alkyd finish specially formulated to withstand the abuses associated with boat bilges. Its tough resilient surface will stand up to years of engine fluids, abrasion and wear. EZ-Bilge is easy to apply by brush, roller or spray and provides excellent coverage.

White - 3124 | Bilge Gray - 3125

VARNISHES, STAINS & SEALERS

Captain's Varnish 1015 is highly regarded for its ease of application, outstanding gloss retention and tough yet flexible durability. A combination of phenolic and alkyd resins blended with tung and linseed oils provides excellent performance. Its warm, light amber hue will enhance the rich, classic brightwork appearance.

Captain's Satin Sheen Varnish V-975 is specifically designed to enhance the beauty of interior woodwork with its soft, satin finish. Its pale, durable, long lasting polyurethane coat is water and alcohol-resistant. Satin Sheen is easy to apply and is intended for interior use only.

New!

EZ-Wood Sealer 2018 is a phenolic resin-based sealer used for sealing all types of raw wood prior to painting. The sealer acts as a moisture barrier layer to prevent peeling and excessive absorption of vehicle from topside primers, paints, or varnishes by the new wood. This sealer uniformly seals and satisfies the absorbency of all woods including Teak.

Flagship Varnish 2015 offers the best protection against the sun's damaging rays. With 6 times more UV inhibitors, this blend of phenolic and alkyd resins combined with tung and linseed oils offers excellent performance and a warm, deep amber hue. This high-build formula offers excellent abrasion resistance and a high gloss finish.

Captain's Ultra Clear Varnish 2067 is a premium urethane varnish with strong UV inhibitors. It features outstanding gloss retention along with an unparalleled resistance to foot traffic, chipping and scratching. This high-build formula offers ease of application, exceptional brushability, and excellent leveling characteristics.

High Build Varnish 2056 boasts the highest build and film depth per coat. Strong UV inhibitors are added to a blend of phenolic and alkyd resins combined with tung and linseed oils for easy application, high UV protection, excellent gloss, and a warm, deep amber hue. A good varnish for building up multiple coats quickly.

Paste Wood Filler Stains fill the grain and stains the wood to enhance it's natural beauty. The fillers can be intermixed and shaded with color in oil or universal colorants to achieve custom colors. The use of wood filler stains reduce the number of varnish coats required.

UNDERWATER METALS

Metal Primer 6455/044 is a two-part, self-etching wash primer for use above or below the waterline on all bare metals. Offers excellent adhesion to metal hulls, keels, centerboards, and underwater running gear. Overcoat with epoxy primer, tie-coat primer, topside enamels, or antifouling paint.

Underwater Metal Kit 6456 combines convenient sized containers of both our Metal Primer and Tie Coat Primer in one easy package. This kit is specifically designed for the painting of underwater metal running gear including shafts, struts, props, thru-hulls, and trim tabs.

Prop Coat Barnacle Barrier 1792 provides aerosol spray protection to bare metals above or below the waterline. Its smooth, hard surface will self-clean in service and inhibits corrosion on steel, stainless, cast iron, copper, bronze, galvanized and lead.

Tie Coat Primer 6627 is a general purpose chlorinated rubber primer for use above and below the waterline on metal surfaces or as a tie coat between different types of coatings. When used over Pettit 6455/044 Metal Primer it forms an excellent, easy-to-use system for use on all underwater running gear.

AlumaProtect 4400/4401 is a two-part epoxy primer for use on sand-blasted aluminum where maximum corrosion resistance to fresh and salt water is required. Usually over coated with PettitProtect High Build Epoxy 4700/4701 when used on bare aluminum, pontoon hulls and outdrives.

Alumaspray® Plus is an aerosol antifouling paint specifically designed for use on aluminum outdrives and outboard motors without the need for a barrier coat. Alumaspray Plus offers superior resistance to all types of fouling.

CLEANERS / DEWAXERS

Bio-Blue Hull Surface Prep 92 de-waxes, cleans, and prepares bare fiberglass for painting. Easily removes unwanted contaminants and mold release agents prior to painting. When used with 6998 Skip Sand and antifouling paint, it is part of an easy 1-2-3 system.

Bottom Prep D-95 Fiberglass Dewaxer is a special blend of solvents, formulated specifically to cut through and remove mold release, grease, and previously applied wax from the gelcoat.

FIBERGLASS PRIMER

Skip Sand Primer 6998 eliminates the need to sand before applying antifouling paint providing a system of excellent overall adhesion. It may also be used between two-part epoxy primers and antifouling paints. 6998 has an extended overcoating window of a few hours up to 7 days to apply bottom paint.

Follow this simple guide to eliminate the need for sanding bare gelcoat.

STEEL PRIMERS

Rustlok Steel Primer 6980 is an easy to apply, moisture and corrosion proof primer for use on all cast iron and steel surfaces, including galvanized and stainless. Its water impervious barrier offers excellent adhesion and corrosion protection even over rusted surfaces.

Trailercoat 6981 is an easy to apply, bright silver, moisture and corrosion proof top coat for use on all cast iron and steel surfaces, including galvanized and stainless. Its water impervious barrier offers excellent adhesion and corrosion protection even over rusted surfaces.

SPECIALTY EPOXY PRODUCTS

EZ-Fair 7050 Epoxy Fairing Compound - Lightweight, two-part epoxy putty designed for filling and smoothing surface imperfections above and below the waterline. The special resins used in EZ-Fair impart a high degree of water and chemical resistance to the product, making it an integral part of the Pettit Gelcoat Blister Repair System. In addition, EZ-Fair is the product of choice for fairing metal keels or any underwater surface. Available in can kits or a unique self measuring, self mixing cartridge dispenser.

Flexpoxy 7076 Two-part epoxy resin that does not sag, run, or shrink. Its thick formula allows it to fill large cavities in a single application. When cured, it remains flexible making it ideal for environments that require flex such as keel joint repairs. Flexpoxy creates a superior bond to all epoxies, polyester resins, metals and wood. Comes in a unique self measuring, self mixing cartridge dispenser.

A-788 Splash Zone – Extremely hard, abrasion and impact resistant, two-part epoxy patching compound. It applies like putty to seal, fill, patch or rebuild aluminum, wood, concrete, fiberglass, and steel. It can be applied in or out of water to repair boat hulls, buoys, seawalls, docks, bridge abutments, and more. Splash Zone provides excellent protection against corrosion of metals and erosion and deterioration of concrete or wood. Splash Zone's rock-hard surface can be drilled, tapped, or machined.

Interlux Wood Solutions

Cetol® Marine

Cetol Marine with Next Wave™ UV-absorbing technology is a durable translucent protective wood finish for use above the waterline on interior and exterior woods. Next Wave technology is a unique UV package of advanced Ultra Violet absorbers that provide greater protection, durability and longevity. Cetol Marine has excellent weathering properties and allows for the natural expansion and contraction of wood which prevents Cetol Marine from cracking. Cetol Marine is also micro-porous, allowing moisture to escape from the wood which will prevent blistering and flaking of the finish. Cetol Marine is an easy to apply, low maintenance alternative to wood oils and other wood treatments.

- **Cetol Marine** produces an attractive dark amber appearance on wood.
- **Cetol Marine Light** produces a lighter amber appearance on wood.
- **Cetol Marine Natural Teak** has a rich golden color on wood.
- **Cetol Marine Gloss** provides a high-gloss, hard-wearing, UV protection and is developed as a topcoat for Cetol Marine, Cetol Marine Light and Cetol Marine Natural Teak.

Perfection® Plus

A high performance, two-part clear polyurethane, Perfection Plus delivers the ultimate in performance longevity resistance. The chemical cure urethane formulation combines with a best-in-class UV and HALS package to offer outstanding chemical and abrasion resistance and superb gloss and gloss retention that lasts four times longer than conventional one-part varnishes.

Schooner® Gold

This product offers a higher film build per coat that allows both professional applicator and boat owners to achieve great results faster and in fewer coats. This 'thicker' varnish will require thinning, in most conditions, to achieve optimum flow. Schooner Gold has shown to out-perform other leading brands and will offer superb longevity and durability.

Schooner® 96

Combines the very best of classic varnish craftsmanship with the newest technology. Schooner Varnish contains ultra-violet filters to screen the sun's damaging rays for remarkable durability, excellent water resistance and silky application. Superior self-leveling property and a bright, clear, high-gloss finish with the traditional golden color.

Compass® Clear

Compass Clear is a highly durable one-part polyurethane gloss varnish that contains a unique combination of ultra-violet additives, HALS, surface stabilizers and antioxidants to ensure long-term gloss and clarity. Polyurethane resin adds incredible abrasion, chemical and water resistance. Superior leveling properties along with silky application allows you to achieve a professional, long lasting finish. Compass Clear is suitable for all internal and external woods, and can be applied directly to oily timber, such as teak.

Goldspar® Satin 60

A modified polyurethane, low luster varnish designed for application to interior wood surfaces. It produces a warm, rich satin sheen finish that resists scratches and stains and applies easily enough to yield truly professional results by either brush or spray. Goldspar Satin Varnish 60 is ideal anywhere a low luster finish is desired, such as cabin soles, cabinets, counters and tables.

Premium Teak Restorer

Cleans, restores and brings back the natural color of teak and other hardwoods. Gentle formula, does not bleach or damage surrounding fiberglass, wood, metals and painted surfaces. Contains Tenside cleaners, which are excellent at removing oil and dirt.

Premium Teak Oil

Traditional Scandinavian formula providing ultimate protection against the elements. Formulated with a rust inhibitors, protecting metal from rusting. Easy to apply, fast drying, warm golden color for exterior and interior use. Can be applied to damp or dry wood, for best results apply to dry wood.

Topside Finishes

Perfection®

A high-gloss, high-performance two-part polyurethane that combines a long lasting abrasion and chemical resistant finish with superb protection from the detrimental effects of UV rays. Its abrasion resistance makes it ideal for application to decks and gunwales. Perfection can be used anywhere above the true waterline on properly prepared fiberglass, wood, aluminum, steel and epoxy. The superb high-gloss characteristics, long-lasting color retention and durability makes Perfection the finest coating available. **Professional quality results are made easy with Perfection.**

Fiberglass Bottomkote® NT

The Fiberglass Bottomkote NT Advantage:

- NT (New Technology) – Optimizes the benefits of hard and ablative paints through a unique Dual Resin Approach
- Durable Coating – Prevents premature wear-through yet a slow polishing action minimizes unnecessary paint build-up
- Fast-Dry – So fast you can paint and launch in the same day!
- Universal – A cost effective choice for all power and sail boats and in all waters
- Not for use on aluminum.

Red YBB349 | Black YBB379 | Blue YBB389 | Green YBB359

Fiberglass Bottomkote® Aqua

A great performing, waterbased, low V.O.C. formulation.

- Easy clean up with soap and water
- Low VOC - reduces solvent emissions
- Provides an exceptionally smooth finish - reduces drag and coefficient of friction
- Thinner film for less paint build-up
- Clean colorfast formula for excellent color stability

Red YBA549 | Black YBA579 | Blue YBA589 | Green YBA559

Note: All new Sea Ray, Meriden and Bayliner boats are delivered with Fiberglass Bottomkote Aqua.

Ultra™ with Biolux®

Durable, premium performance, low VOC formulation for medium to high fouling conditions.

- High solids, high performance, hard antifouling for durable finish
- Biolux® slime blocking technology reduces slime and increases antifouling performance
- Fast-drying formula - paint and launch in the same day
- Not for use on aluminum

Mascoat Marine-DTM

- Mascoat Marine-DTM insulating coating is a water-based, one-part coating comprised of air filled ceramic and silica beads held in suspension by an acrylic binder.
- It applies like paint and is maintenance-free, providing thermal insulating and anti-condensation capabilities for shipboard construction.
- Currently, Mascoat Marine-DTM insulating coating is in use on over 2000 marine vessels from Alaska to Antarctica.
- This coating can replaced most blanket and foam insulation products, resulting in substantial reduction of weight and keeping the vessel within the new stringent marine codes and classifications.
- The coating employs the best water-based coating technology and contains no harmful elements.
- Unlike other insulation methods, Mascoat Marine-DTM bonds directly to the substrate or primer, leaving no room for corrosion to take hold.
- Direct bonding gives the coating the ability to insulate your vessel without degradation of the substrate for many years to come.
- By using Mascoat Marine-DTM coating system, you can rest assured that your vessel is protected and that the interior accommodations will be comfortable.
- Users of Mascoat Marine-DTM insulation coating have found that the coating replaces most conventional insulation methods.
- While yielding the same insulation capabilities, installing costing drastically less.
- Many vessel owners have saved up to 50% on total installed costs over conventional insulation.
- Best of all, the coating is extremely lightweight.
- This allows easy application around difficult areas such as stiffeners and other tight areas without adding excess weight.

Mascoat Delta Sound Control-dB

- Mascoat Sound Control products are easily applied with a sprayer, roller or brush - even in hard to reach places.
- In addition, Sound Control coatings cure quickly and can be applied while equipment is functioning, so there's no lost production time or wasted manpower.
- Mascoat's engineered products protect workers from heat and chemical exposure while reducing vibration and noise in a variety of industrial and marine situations.

ABOVE THE WATERLINE

All substrates:

6	TOPCOAT	**Awlgrip** or **Awlcraft 2000**
5	FINISH PRIMER	**545 Epoxy Primer**
4	EPOXY SURFACER	**High Build**
3	EPOXY FAIRING COMPOUND	**Awlfair LW**
2	SUBSTRATE SEALER	**Hullgard Extra**
1	SUBSTRATE PREPARATION	Clean, sand, grind or blast (as necessary)

The above is a typical example of a full Awlgrip system. Alternative systems are available and may not consist of as many layers as above. For a system tailored to your needs please contact your local Technical Sales Representative.

ALTERNATIVE OPTIONS

Step 2 — Non-Anodized Aluminum and Steel

Apply **Max Cor CF** before **Hullgard Extra** for the ultimate anti-corrosive system. **Max Cor CF** is a VOC compliant, high solids, chromate-free, anti-corrosive epoxy primer. This two-component product provides excellent adhesion to Aluminum and Steel.

Step 2 — Anodized Aluminum and Stainless Steel

Apply **Wash Primer** before applying **Hullgard Extra**. **Wash Primer** has been specially designed to promote adhesion by uniformly etching the anodized aluminum and stainless steel substrates.

Step 3 — Epoxy Fairing Compounds

If full fairing is not required, **Awlfair LW** can be replaced with **Ultra Build**, **High Build** or **Epoxy Sprayable Fairing Compound**. These products will fill and cover scratches, dings, pinholes, light crazing and other relatively minor physical defects on a surface which otherwise would have a true or fair line. **Epoxy Sprayable Fairing Compound** should not be used as a spot filler.

Step 4 — Epoxy Surfacers

High Build can be replaced with **Ultra Build**. **Ultra Build** has excellent sag resistance and film build capability. If only minor surfacing is required, **Awlquik** can be used as an alternative to high build products.

Step 5 — Finish Primers

For regions where VOC restrictions are in force: **345 HS Primer** can be used as an alternative to **545 Epoxy Primer**. **345 HS Primer** is a new high solids epoxy finish primer which has been formulated on a modern resin technology to provide a low VOC coating – less than 340g/lt applied. It requires fewer coats for the same DFT.

Step 6 — Topcoats

For regions where VOC restrictions are in force: **Awlgrip HS** can be used as an alternative to **Awlgrip** and **Awlcraft 2000** topcoats. **Awlgrip HS** is a high solids, low VOC polyurethane coating designed to provide premium gloss and distinctness of image. For more information please consult your local Technical Sales Representative.

BRIGHTWORK & VARNISH (EXTERIORS)

System I – Traditional Varnish System

AWLSPAR CLASSIC SPAR VARNISH

Awlspar varnish is a traditional phenolic, tung oil varnish modified with state of the art UV inhibitors and absorbers and is available in standard and high solids formulas.

Awlspar is a fast-dry material. Two, and sometimes three, coats can be applied in a single day allowing you to quickly apply a full system.

Awlspar is the perfect product for the traditionalist who wants an easy to apply, easy to repair product, and doesn't object to regular maintenance coats.

2	VARNISH	**Awlspar** or **Awlspar HS** (multiple coats)
1	SUBSTRATE PREPARATION	Clean and sand (multiple coats)
	WOOD	

System II – The Ultimate Brightwork System

AWLSPAR VARNISH OVERCOATED WITH AWLBRITE CLEAR

This system combines the color highlights of the **Awlspar** varnish to provide a traditional look, with the durability of the **Awlbrite Clear** in a fast recoat, relatively easy to repair combination of varnish and urethane coatings.

Awlbrite Clear contains a unique combination of light fast resins, UV inhibitors and absorbers, allowing the system to be sealed and protected by a tough, durable two-pack urethane.

3	FINISH	**Awlbrite Clear** (multiple coats)
2	VARNISH	**Awlspar** (multiple coats)

(INTERIORS)

System I – The Interior Varnish System:

AWLBRITE QUIK-FIL CLEAR OVERCOATED WITH EITHER AWLBRITE CLEAR, AWLBRITE SEMI-GLOSS, AWLSPAR OR AWLSPAR HS

Awlbrite Quik-Fil Clear is the foundation of the system. It is applied to the wood for a rapid build-up of grain filling coats.

Awlbrite Quik-Fil Clear boasts excellent grain filling properties and the speed of the cure makes it ideal for builders and yards where a fast project turnaround is required. It can be sanded in just 3 hours at 75ºF (25ºC) and is touch dry after 30 minutes.

Awlbrite Quik-Fil Clear can be overcoated with **Awlbrite Clear**, **Awlbrite Semi-Gloss**, **Awlspar** or **Awlspar HS**; or can be finished off in full color with **Awlgrip** or **Awlcraft 2000** topcoats for a lacquer finish effect.

3	FINISH	**Awlbrite Clear or Awlbrite Semi-Gloss or Awlspar or Awlspar HS**

AWLGRIP® AWLMIX® Color Matching System

- 2000 topcoat colors, including special requests for custom colors.
- We request any new formulation from Awlgrip on your behalf and we are able to mix and match most existing formulations.
- By using the Awlmix software provided by Awlgrip, you can be assured we will always have the most current formulations with an extensive choice of colors created by world-wide demand from builders and boat owners.
- The number of formulations in this database grows every month and the input from Awlgrip color chemists is crucial, as each formulation entered is thoroughly reviewed and quality controlled to provide the formulation with the greatest consistency for our day to day operation.
- We can access this information 24/7, all in order to speed up delivery to you.

What will Awlmix do for you?

- Improved service through an added choice of color selection.
- Greater ability to meet increasing customer demand of custom made colors, especially for the OEM or multi-production market.
- Capability to match 48 colors on the Awlcraft 2000 metallic color card.
- Opportunity to provide the color that your customer needs.
- Awlgrip continues to be the premium choice of topsides finishes world-wide.
- Using the Awlmix system to blend Awlgrip and Awlcraft 2000 topcoat colors on site shortens the lead time. Color access is now far beyond the traditional yacht and aerospace paint supplier.
- All colors will be shipped from our Clearwater or Norwich facilities with the corresponding shipping times and fees.
- Please supply color code from chart when ordering.

Awlgrip Max Cor CF Primer

AWLGRIP

- Max Cor CF is a high solids two component anti-corrosive, chromate-free epoxy primer for aluminum and steel with excellent chemical and solvent resistance.
- Max Cor CF is based on 'Controlled Fusion' (CF) technology, a unique chemical system that allows extended re-coat times, removes the need for sanding prior to applying the next coat and also gives excellent substrate adhesion.
- This technology eliminates the requirement for high hazard chemicals and ensures a tightly fused intercoat layer between the CF-based coating and the next applied coat.
- For above the waterline only.

High Build Epoxy Primer

AWLGRIP

- D9002 has slightly better anti-corrosive characteristics than D8002.
- It sands well, but has a very hard film.
- Excellent as the first product applied over a base primer in fairing projects.
- It's hard film prevents sand troughs eliminating the need to re-primer or re-prep in those areas.
- Slow drying, but can be recoated with itself in four hours.
- Spray application only - requires pressure feed equipment.
- For use above waterline only.
- Mix ratio 1:1.

3M PPS™ Paint Preparation System

3M

- A unique, closed paint system which eliminates the need for traditional mixing cups and paint strainers.
- Now, paint can be mixed and sprayed out of the same PPS liner with a lid and built-in filter.
- Designed adapters allow painters to use the PPS system with virtually any spray gun.
- A key advantage of this closed system is that it enables a painter's spray gun to function at any angle, even upside down!
- The liner, lid and built-in filter are all disposable, leaving only the adapter and spray gun to be cleaned.
- The PPS system is therefore a cleaner, faster system, safe from outside contamination and offers considerable time and solvent savings in regards to gun cleaning.

3M Accuspray™ Spray Gun Model HG18

- The HG09 Accuspray primer gun has been reworked, improved and renamed - it is now the HG18.
- The HG18 trigger is wider so it is more comfortable.
- We have shortened the reach to make the pull easier.
- An improved air valve gives users more precise control. Plus, we've added a reinforcing washer to the air fitting to prevent over tightening from damaging the gun body. And speaking of the gun body, there is now more internal reinforcement - so it can survive accidental abuse. We've even added a gray body panel, so technicians can easily spot their primer gun.

Greenfield SKYWinch

- The revolutionary SKYWinch is the opposite of traditional winches and eliminates the hassles and dangers of trailering.
- Simply leave a bow-line attached to the boat and walk it to the trailer without wading in. Then just place rope into SKYWinch, pull tight, and start cranking.
- The Patented wheel grips the rope and easily pulls most lighter-weight boats under 18'.
- The crank arm will not spin backwards until released with trigger for controlled payout.
- Accepts ropes to 1/2" diameter and fits most standard trailers with included mounting bracket and hardware.
- For best results, use with 1/2" solid-braid rope with break-strength rating that exceeds boat weight.

Bearing Buddy® Bras

- Keeps grease off trailer wheels.
- Trailer owners sometimes overfill axle hubs with grease.
- The Bearing Buddy's automatic pressure relief feature will allow the excess grease to escape.
- While trailering, this grease can be thrown onto wheels.
- This product fits over the Bearing Buddy to eliminate this condition.

Bearing Buddy® with Auto Check - Stainless Steel - 1980A-SS

- Works like the regular Bearing Buddy, but has new exclusive Auto Check visual lubricant level and pressure indicator.
- When the hub is full of grease, the blue Auto Check ring rests about 1/8" outward from the steel retaining ring.
- A spring loaded piston behind the Auto Check ring pushes against the grease which generates pressure inside the hub to keep water out, thus offering the bearing protection.

Tie Down Galvanized 10" Disc Brake Assembly

- Bi-metal Piston: Combines a stainless steel outer piston with an aluminum inner sleeve to shed braking heat fast. The stainless steel outer piston will not rust or corrode.
- Oversize Rubber Boot: 50% thicker by design to provide a positive and faster piston withdrawal.
- Rotating Swivel Connector: Swivel brake line connector allows for convenient brake line placement.
- Stainless Steel Caliper Pins with Oil Impregnated Bronze Bushings: Allows caliper to float freely and ensures proper alignment during installation and will not rust or corrode.
- Vented Caliper Housing: Improves heat dissipation and decreases pad wear.
- One Piece Stainless Steel Bleeder Valve with Teflon Coating: Will not corrode and allows for easier bleeding of the brake system.
- Square O-ring with Slant Edge: Helps retract pistons away from the rotor when fluid pressure is released. Provides better protection from contamination of brake fluid.

Tie Down 10" Galvanized Drum Brake Kit

- Absolutely, Positively the MOST Corrosion Resistant Drum Brake PERIOD!
- The GalvX system is composed of inorganic polymers which bond metallic zinc flakes to the metal surface.
- Aluminum wheel cylinder.
- Stainless steel springs.
- Brake pads are bonded and riveted with bronze rivets to backing plate.
- Superior saltwater performance over standard drum brakes.

Order No.	Mfg. No. / Description	Price
657320	(81097) 10" Galvanized Drum Brake Kit	$228.98 G

Tie Down Flexible Brake Line Kit

- Two 1/8" x 24" flexible 3,000 psi. brake lines are ideal for disc brake installation requirements.
- Connects from brake caliper to female end of brake line or can be connected to existing steel lines with adapters included in the kit.
- Flexible line connection required on G4 disc brakes.

Order No.	Mfg. No. / Description	Price
657227	(81099) Flexible Brake Line Kit	$72.98 G

Tie Down Disc Brake Actuators

- No longer will you be required to "pump" the dampener first before bleeding the brakes. All TDE actuators now have a pre-loaded dampener.
- The coupler in the closed (tow) latch position will auto-latch onto the hitch ball when set on top of the hitch ball, with minimal weight. Incorrect latching and/or forgetting to properly close the latch mechanism is the #1 reason for trailer separation from the tow vehicle.
- Solenoid Plumbing Built Into The Master Cylinder- eliminates: removal of entire solenoid for servicing, detachment of brake hose, detachment of the actuator cover, detachment of actuator unit from trailer tongue.
- Larger Fill Cap On Master Cylinder-Common filler cap easier to maintain spare parts. Easy to remove, easier to add brake fluid.
- Standard Length Actuator Cover-covers the solenoid (when used) similar to the previous "3/4 extended" model.
- Cast steel ball clamp.
- Safety pin that locks the ball clamp, not the latch handle.
- Aluminum master cylinder.
- Coiled E-stop cable, PVC coated.
- Grease fittings on roller pins.

Order No.	Mfg. No. / Description	Price
657300	(82400) Model 660 Disc Brake Actuator, 6,600 lb. Capacity	$254.98 G

657304	(86165) Model 66 Brake Actuator	$179.98 G

Tie Down Reverse Lock Out Solenoid

- Unlike drum brakes, disc brakes generate full braking power in reverse.
- If your actuator does not have a reverse lock out lever or switch, a reverse lockout solenoid should be installed at the actuator before installation of disc brakes.
- Can be used on drum brakes as well.

Order No.	Mfg. No. / Description	Price
657203	(81103) Reverse Lock Out Solenoid	$88.98 G

Penray Non-Chlorinated Brake Cleaner

- Low V.O.C. formula.
- Quickly and effectively dissolves and removes grease, oil, brake fluid and other contaminants from brakes, C.V. joints and clutch components.
- Degreases instantly, leaves no residue.
- Helps stop brake squealing and can improve braking performance.

Davis Instruments Vantage Vue Weather Station

- The Vantage Vue® weather station combines legendary Davis accuracy and rugged durability into a compact station that's easy to set up and use. Vantage Vue includes a sleek but tough outdoor sensor array and distinctive LCD console. Its unique Weather Center function provides additional information on each weather variable. Multiple features affordably priced. The Vantage Vue's compact outdoor sensor array measures current weather conditions, including inside/outside temperature, humidity, barometric pressure, wind speed and direction, dew point, and rainfall. Sets up in minutes and starts sending data wirelessly to the indoor console. You'll also get weather forecast icons, moon phase, sunrise/sunset times, graphing of weather trends, alarms and more. The innovative Weather Center button displays additional data for today and over the last 25 days. The fully-integrated, corrosion-proof sensor suite was subjected to cyclic corrosion tests simulating extreme marine weather environments. Sealed electronics provide protection against the elements. Vantage Vue withstands freezing winters, high winds, and blistering sun. Vantage Vue is perfect for marinas, vacation homes, gardens, schools, universities, businesses, firefighting and emergency response teams.

Imperial Immersion Suits

- Donovan offers a full service station to pressure test and inspect suits. Suits must be in serviceable condition at all times. The pressure test can reveal leaks that can not be seen with the naked eye. A well maintained suit increases your chance of survival, lasts longer and saves you time and money. An experienced service technician can find seemingly minor defects that can cause major problems.
- The High Rider Ring. It is made of neoprene and attached by zippers making it easy for you to replace yourself. Most other suits have air bladders (high rider rings) that must be brought into a certified station to be replaced.
- Features: Three Fingered Mitt to Keep Your Fingers Warmer, Two Zipper Tab Pulls On Zipper, Wide Legs to Allow Quick Donning, Toe Valves That Purge Water Very Fast, Face Seal is Soft and Flexible, Back Straps Keep the Ring in Place, Suits Are True to Size, Sturdy Carrying Bag with Two Handles.

PFM. PALFINGER MARINE
HEAVY DUTY FOLDABLE
KNUCKLE BOOM CRANES.
Lifts extremely heavy loads up to 330.0 mt.
The heavy duty foldable knuckle boom range, PFM, was developed for the highly complex lifting of great loads from 7000 to 21800 kg. Their fields of application are large marine vessels i.e. work boats, navy or research ships. A combination of a telescopic boom and knuckle system makes this giant more flexible compared to common cranes in this field.

Bulb & Socket Information for Perko 800 Series Solar-Ray® Searchlights

- Bulbs are not included in lights.
- To give good results, the bulb and reflector must be perfectly compatible; therefore be sure to specify the stock number of the bulb desired.
- Peak candlepower is exceedingly sensitive to many factors, (i.e. a light source out of focus by 1/32 inch, under-voltage of only 4% or differences between bulb manufactures) which can cause reduction of range of up to 20%.

The Carlisle & Finch Co. 500 Watt Xenon Arc Searchlights

Manual Control.

- Drum-size nominal 15".
- 45 Million beam candlepower.
- Nominal 1 degree beam collimation.
- Remote electric beam-size focus (1 to 15 degrees).
- External manual beam-size focus knob (provides back-up if focus motor fails).
- Precision electroformed deep-dish reflector made of bullet-resistant nickel with polished rhodium finish.
- Rugged marine aluminum and stainless steel construction. (Optional brass with sparkling chrome finish for yachts).
- Voltages: 115VAC.
- Aiming: Remote levergear or local handle.
- Safety power cut-off switches on searchlight door and power supply.
- Scratch-resistant and salt-resistant powder coat finish.
- Long-life warranted xenon lamp.
- Sealed weatherproof drum.
- Exceeds 385 degree horizontal rotation (with unique sliding stop design).

Remote Electric Control units have all the features listed above and also the following.

- "Proportional-Speed" joystick provides aiming and speed control with single-hand.
- Motorized rugged cast base with horizontal and vertical clutch assemblies and ball bearings contained in stainless steel races.
- Exceeds 385 degrees horizontal rotation (with unique sliding stop design).
- Fast speed searches at 30 degrees per second.
- Single station or multiple stations.
- Indoor and outdoor weatherproof control stations.
- Optional anti-icing heater circuitry in base, rack and trunnions.

How to Order Searchlights

- Specify size searchlight, type control, type base, type drum, type finish, type lampholder, and give code word or catalog number.
- Give ordering code and volts of lamp.
- Specify length of control (measured from bottom of base to centerline of lever or upper wheel) if other than the standard dimensions shown on the dimension drawings.
- Specify pedestal height (measured from bottom of base to centerline of drum) if different from the standard 48 inches.
- Example: 12" searchlights, lever control, standard base, vented drum, enamel finish, medium prefocus lampholder, code RECITE-E2. Special length control 22" base to centerline lever. Two lamps code 54889-0 120 volts.
- To designate the specific lampholder desired add one of the following suffixes to the code word or catalog number:
- Medium Screw Lampholder –1
- Medium Prefocus Lampholder –2
- Mogul Screw Lampholder –3
- Mogul Bipost Lampholder –4
- 2-Pin Prefocus Lampholder –5

The Carlisle & Finch Co. 1.0kw and 2.5kw Xenon Arc Searchlights

- Rugged drive unit is housed in watertight corrosion resistant marine aluminum or brass base as specified.
- Slip clutches allow manual override at all times, a convenience when relamping.
- A small heater on drive unit keeps temperature in base housing above ambient to minimize condensation on and in motors.
- Powerful motors in weatherproof base direct the penetrating beam with finger-tip ease from any distance.
- Automatic brakes provide instant start and instant stop with no overtravel.
- Complete flexibility in mounting.
- Searchlight can be controlled from many separate locations.
- Motors operate on 110-125 volts, 50-60 hz (cycles).
- Drum, door, and yoke, etc., constructed of solid brass.
- Base is brass.
- Drum/door and yoke is white enamel.
- Rugged joystick switch controls both motions.
- No limit to distance between searchlight and joystick.
- Second, third, fourth, or more joysticks can be added at any time.
- Just five control conductors and a ground conductor required between searchlight and joystick.
- Either way, one standard unit is used.
- No interlocks required.
- Corrosion resistant and oiltight, the joystick can be mounted almost anywhere.
- Uses medium prefocus lampholder.
- Vented.

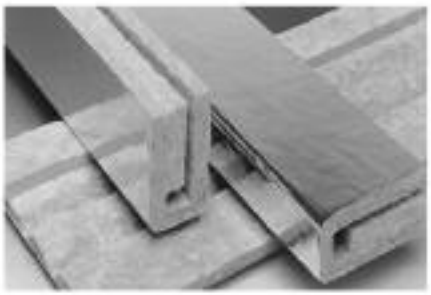
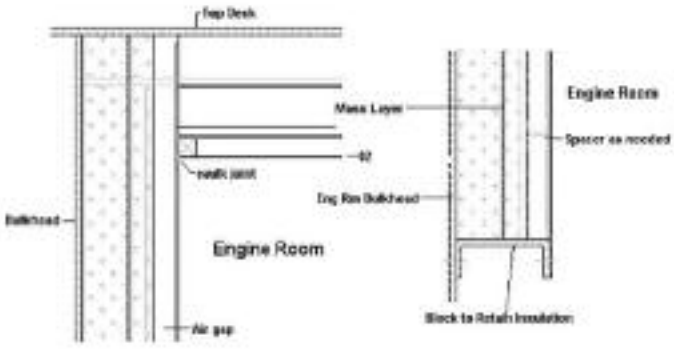
THERMAL- ACOUSTIC-VIBRATION CONTROL

NVT– FIBERGLASS HULLBOARD

Description



Shipboard Thermal/Acoustic Insulation to meet MIL-I-742 or USCG 164.109 (Non Combustible). Various facings and composite configurations fabricated from fiberglass hullboard are used for Shipboard hulls, bulkheads, overheads, stiffeners, beams, and ductwork where non-combustible and cost effective solution is required



Key Selling Points

- Fiberglass Hullboard-Plain per MIL-I-742, Ty. II, ASTM C 1139 (replaces. MIL -I-22023D) and USCG No. 164.109/46/0.
- Fiberglass Hullboard faced with fiberglass cloth per MIL-C-20079, Ty. I, Cl. 2. Finished product meets MIL-I-742, Ty. I and USCG 164.112
- Fiberglass Hullboard with 2-mil aluminum foil facing. Meets USCG 164.109 and 164.112/061/0
- Fiberglass Hullboard , grooved/ slotted and faced with perforated fiberglass cloth per MIL-C-20079, Ty. I, Cl. 2.
- Fiberglass Hullboard laminated to high-density waffle board, faced with perforated fiberglass cloth per MIL-C-20079, Ty. I, Cl. 2. Finished product meets MIL-A-23054.
- Fiberglass Hullboard faced with White Reinforced Mylar. Finished product meets MIL-I-22023, Ty. III and USCG 164.109 and 164.112

POLYIMIDE FOAM

Description

POLYIMIDE FOAM Thermal Acoustic insulation provides shipbuilders lower installed cost, and vessel owners lower life cycle costs due to the ease of installation and proven long life span in service.

POLYIMIDE FOAM is inherently fire resistant, halogen free and produces virtually no toxic products of combustion when exposed to open flames.

Installing POLYIMIDE FOAM increases productivity and is more cost effective than conventional insulations. It is easily cut and handled and there are fewer mechanical fasteners required than with fibrous materials.

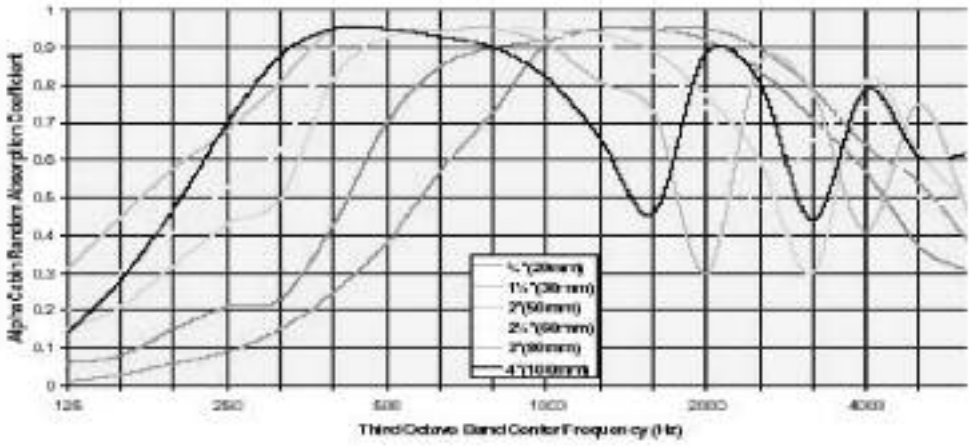
Millennium Metal - Micro-perforated Metal Lining Sheet

Description



Millennium Metal is a micro perforated aluminum sheet that provides ideal airflow resistance to optimally absorb sound. Low Frequency Absorption can be "Tuned" by increasing the trapped air space behind it.

Absorption is further enhanced by adding **NoViTec** Melamine Foam into the air cavity which resists the coupled volume resonances common in the low frequency region

Millennium Metal , in combination with a honeycomb core and **NoVi-Comp** composite panel outer skin creates a superior lightweight rigid acoustical panel which can be used to make unframed acoustical enclosures with excellent absorption and sound transmission properties

NH/Armaflex®

Engineered for New and Existing Pipework in Shipboard Use

Description

NH/Armaflex is a non-halogen flexible elastomeric thermal insulation, gray in color, supplied as tubing in nominal wall thicknesses of 1/2", 3/4", and 1" in sizes from 3/8" through 8" IPS. Sheets are supplied 36"x 48" in thicknesses of 1/2", 3/4", 1", and 1-1/2" (special order).

NH/Armaflex was specially developed by Armacell to minimize the density of smoke and eliminate corrosive acid gases from combustion. NH/Armaflex will not carry a progressive flame, and is formulated without chlorine, bromines, or PVC.

Features	Benefits
• Nonhalogen formulation	• No measurable chlorines, bromines, or PVC in smoke to harm personnel or sensitive electronic equipment • Eliminates corrosive gases from smoke • Excellent solution for austenitic, stainless steel and other systems
• Closed-cell structure	• Excellent protection against water intrusion • No supplemental vapor retarder required
• Installs in same manner as AP Armaflex insulations (MIL-P-15280J)	• Easy to apply; no lagging required. Preferred in shipyards around the USA
• Flexible at low temperatures	• Durability
• Gray color	• Carbon black-free • Mercury-free • Can be used with all approved Naval laggings and coatings • Color consistent with maritime applications

Specification Approvals

Armacell technical personnel are proud to have worked in conjunction with the US Navy and Electric Boat Corp. to develop the EB 4013 specification and to ensure dependable performance.

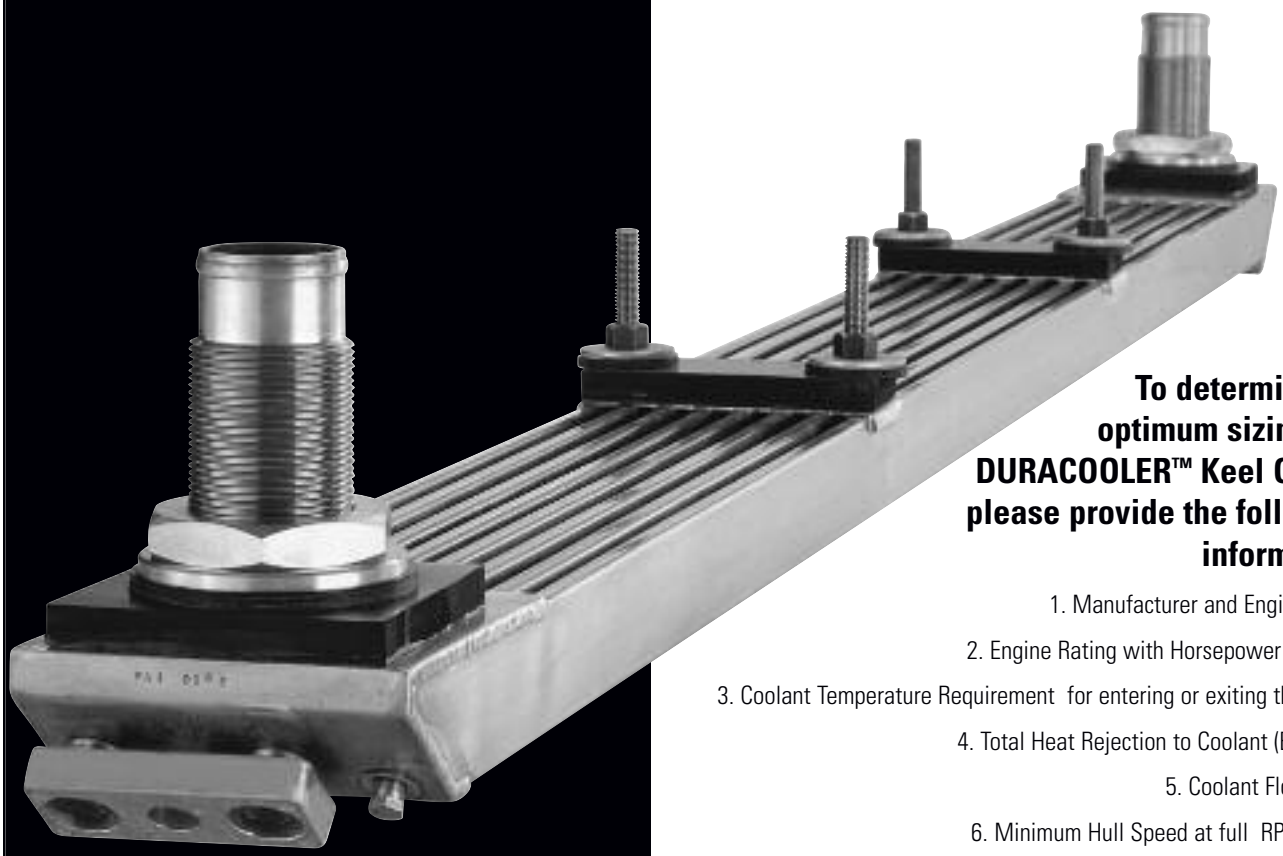
- Electric Boat Corporation Specification EB 4013 Antisweat and Refrigerant Insulation Systems (Sheets and Tubes)
- International Maritime Organization (IMO) SOLAS Requirements
- United States Coast Guard Requirements*
- NH Armaflex is currently specified for use on US Navy vessels.
- UL-V-O and HF-1 File Number E55796
- ASTM C534 Type 1 (Tubular) Grade 3, Type II (Sheet) Grade 3
- ASTM C795
- Nuclear Regulatory Commission Regulatory Guide 1.36

Duracooler™

by DURAMAX® MARINE

Quality 90/10 Cupro-Nickel.

Rectangular tubing, resistant to salt, water corrosion and sea growth.



Superior heat transfer. Compact, one piece.

Through-hull type fittings.

Available in a wide range of models and different tubing sizes.

Engineered for fast, economical, simplified installation.

Custom sized to your engine specifications and operational requirements.

To determine the optimum sizing of a DURACOOLER™ Keel Cooler, please provide the following information:

1. Manufacturer and Engine Model
2. Engine Rating with Horsepower and RPM
3. Coolant Temperature Requirement for entering or exiting the engine
4. Total Heat Rejection to Coolant (BTU/min.)
5. Coolant Flow (GPM)
6. Minimum Hull Speed at full RPM (knots)
7. Maximum Ambient Seawater Temperature
8. Will Anti-Freeze Be Used
9. Dry or Wet Manifolds

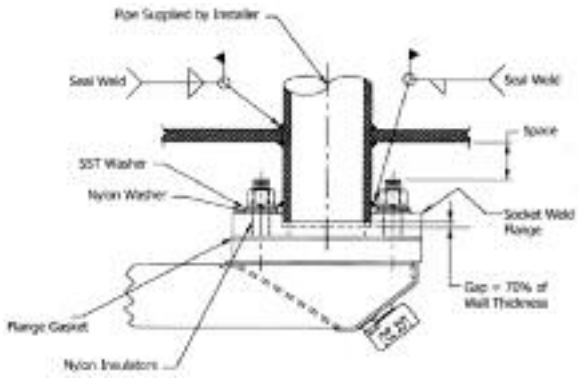
DuraCooler - New Flanged- Mount Design

Looks like other keel coolers - look closer!

In the commercial marine industry you need every competitive advantage you can get. That's why we've developed the DuraCooler - one of the most innovative keel coolers on the market today. Sure DuraCooler looks like other keel coolers, but look a little closer. DuraCooler's unique streamlined header design enhances internal coolant and external seawater flow while reducing system pressure drop. the new design also provides optimum heat transfer efficiency in a smooth tube design, resulting in smaller keel cooler units and a reduction in cooling system costs. Onrepower, replacement or retrofits, this increased cooling capacity within the same installation footprint provides the vessel owner an additional cooling safety factor.

No more through hulls for keel cooler installations

Now the streamlined DuraCooler design is available in a flanged-mount connection design. The new flanged-mounted connection is obtained by means of a cupronickel flange afixed to the top of the DuraCooler header and a mild ASTM steel flange, supplied with the cooler. Weld a schedule 80 steel pipe to the steel flange supplied with the DuraCooler unit, and bolt the cupronickel flange to the steel flange using the supplied hardware. Extend the pipe through the hull and fillet weld the pipe to the hull on both sides. Rest easy knowing that you no longer have a through hull penetration with this design.



No more special tools

With the standard nozzle and nut keel cooler attachment method, it can be difficult to access the nut inside the hull. Additionally, with this design you do not have to fabricate a special mounting nut wrench. It is not longer necessary. All standard flanged-mount hardware is located outside the vessel where it is easier to access. Use tools found in a typical toolbox.

Perfect for double hull designs

So you are designing or building a vessel with a double hull. Standard through hull keel cooler nozzles may not be long enough to penetrate both hulls. The flanged-mount design is ideal.

Features/Benefits

- **No through-hull connections** - If a flanged mounted DuraCooler is knocked off the vessel, you won't need to worry about flooding the vessel.
- **No need to fabricate special tools for installation** which will save time and money on installation costs.
- **Space savings inside hull** - If the area inside the hull is tight or equipment makes the internal nut on the through hull fitting inaccessible, the flanged-mount design is ideal
- **Eliminates the need for a cofferdam or seachest** which will save time and money on installation costs.
- **Keel cooler research and development program** - We test actual DuraCoolers and competitive keel coolers under various operating conditions. This data is used to create more accurate recommendations.
- **Simplified Installation** when mounting hardware cannot be easily accessed from the interior of the vessel or for double hull installations.
- **Streamlined header design** allows for less internal pressure drop of coolant flowing through the keel cooler. External water travels more quickly to tubes increasing the heat transfer efficiency to the cooler.

Duramax Marine Keel Coolers

- 90/10 cupro-nickel tubing is resistant to waterflow erosion and serves as an antifoulant.
- Compact, one-piece design makes installation simple.
- Streamlined header design reduces pressure drop in water flowing through the cooler.
- External water travels more quickly to tubes increasing the heat transfer efficiency of the cooler.
- Custom-sized for your engine specifications and operational requirements.
- Available with through-hull type fittings or non-through-hull flanges.
- PATENT PENDING.

W.W. Patterson - Our Completely Redesigned Line Means Safer, More Efficient, OSHA – Compliant Winches

PATTERSON

Series – 50B Features:

1. Full-size rope guard surrounds gearing; prevents fouling wire rope.
2. Complete operating instructions on gear shroud.
3. "Second to none" rope-securement method lays first coil snugly against drum flange; promotes better spooling.
4. Pull-up ratchet and extension bar provide ultrahigh tension.
5. All new brake-lock design keeps our famous safety-release feature, but now friction-disc replacement is fast and simple.
6. Hinged gear should protects gearing, yet allows easy access for lubrication.
7. Ratchet lock and cam assembly makes release under high tension easiest an safest of all.
8. High gear ratio makes tightening easier.
9. Lubrication is simplified with grease fittings at all friction points.
10. Dished handwheel with spinner speeds slack take-up.
11. Angle foot-mounts with bolt-down holes available.

Manual Operations

Pull-up
With ratchet eccentric lever **A** in vertical position, pull up load with handwheel. Ratchet dog **B** will override, holding load at all points. When load is tight, lock clutch-type brake **C**.

Release
Pull ratchet eccentric lever **A** out to horizontal position. This drops dog out of engagement while load is held by brake. Lift out dog **B**, then control release with vise handle **D**.

Baier Hatches

Hinged Hatches with Built-in T-handle

Round Lift-Out Hatch

- All Baier Hatches use the patented strongback system of securing the hatch cover to the deck.
- It is superior to other more complicated hatch closure systems because it is simple (only three moving parts), it is stronger, it is more reliably watertight, and it is more easily serviced (parts are readily available and replaced in the field).
- Each hatch has an underside escape turning bar for safety.
- An underside turning wheel is optional.
- The deck ring is available in galvanized mild steel (for welding into steel decks), or cast aluminum (for welding into aluminum decks or bolting to fiberglass or wood decks).

Baier Round Lift-Out Hatch.

- This is available in 14", 16", 18", 20" and 24" clear opening.
- Available in cast aluminum or galvanized steel (Model BFHR).

Special Handling May Apply

- These are the finest high-load carrying, free-rolling roller buttons that have ever been designed and are manufactured in sizes to suit the needs of boats, seagoing tugs and ships.
- Precision machined parts have working parts coated with an extremely hard coating – 70 Rockwell C-Scale – which is corrosion resistant.
- The buttons will not freeze up as most do, because they are closed at the top.
- The air pocket formed on the inside, makes it practically impossible for water to enter the working parts.
- Before shipment, the roller buttons are completely lubricated and should need only occasional attention after installation and use.

Tru-Pitch™ Commercial Propeller

- This style is the finest and best known of all-purpose propellers.
- Efficiency and smoothness is assured by Federal's exclusive Tru-Pitch process.
- This style incorporates semielliptical shape, constant pitch and ogival blade sections in the design…a result of years of experience.
- Available in Federal-B and Nibral alloys, left and right hand rotation, in 8" to 96" diameters.
- Stainless Steel available 8" to 40" diameters.
- H-D Heavy Duty, is similar in design to T-P, but its considerably heavier blade edges are engineered to meet more severe conditions.
- Heavy, round edges resist abrasion and blade fracture.
- Durable…extremely rugged. In the same metals and sizes as T-P.
- Three-blade only – right or left hand.

Equi-Quad® Commercial Propeller

- Four blades for exceptional smoothness.
- Designed for: Any normal cruiser where three-blade propellers have been used.
- Number of Blades: 4.
- Owners of pleasure cruisers who have never experienced the exceptional smoothness and fine performance of Equi-Quad will often be amazed.
- The four-blade design gives extreme smoothness, plus the speed and "dig" of a three-blade prop.
- Maneuverability is superb. Equi-Quad is available in most pitch requirements from 17" thru 44" diameter.
- It is offered as standard in our Federal-B alloy and is optional in Nibral or Stainless Steel.
- It comes with the special offset and rake pitch originally incorporated in our Equi-Poise and with a tapered hub for improved hydrodynamic performance.
- It is strongly constructed and then balanced for reduced vibration.
- Order in the same diameter as the correct three-blade size, but allow for 1" less pitch to maintain same engine loading.
- Our engineers will assist on receipt of hull and engine details.

Equi-Poise® Commercial Propeller

- Our most popular prop.
- Designed for: Inboard cruise boats of average power. Runabouts of average power.
- Number of Blades: 3.
- For outstanding speed and brilliant performance, choose Federal Equi-Poise.
- Designed by Federal's naval architects, Equi-Poise is a standard of the worldwide propeller industry and is still built to original patent specifications.
- Choose from two alloys: Our well-recognized Federal-B alloy for good strength or Nibral (a combination of nickel, bronze and aluminum) for additional strength.

Hawboldt Industries Hi-Trail: 4 Blade Propellers

- It is used for both pleasure and commerical vessels, combining blade area, moderate skew and blade thickness distribution.
- This design has produced a smooth, quiet propeller that is one of the most popular models today.
- The propellers are finished to Hawboldt standard thickness with anti-singing edge or to customer's special requests.
- Diameters available up to 44 inches in 3, 4 and 5 blade.

Wesmar Bow Thrusters

Special Order **POR**

Single Prop/Dual Prop Counter Roating.
Wesmar Performance - Turn 360 Degrees in Place.

- Wesmar Bow Thrusters make close quarters maneuvering a simple task.
- You can turn you boat a full 360 degrees in its own length, control the hazards of crowded harbors, tight docking slips, and extreme weather knowing your Wesmar bow thrusters will allow you to maneuver skillfully and quickly, avoiding damaged hulls, mangled ladders, and crumpled docks.

28 Thruster Models.

- Hydraulic and Electric Models.
- Double Thrust Counter Rotating.
- Single Prop.
- For Pleasure Boat Applications.
- For Commercial Applications.
- For Boats 38 to 200 feet.

Wesmar Stabilizers

Special Order **POR**

Electronic Gyro Delivers.
Lightning Speed Reaction for Exceptional Performance.

- The Wesmar stabilization system uses an easily mounted electronic gyro sensor that sends information about roll velocity and acceleration directly to Wesmar's proportional hydraulic system, which reacts instantaneously to rotate the fins.
- When a desired lift is achieved to counteract the rolling force of a wave, Wesmar's closed proportional hydraulic system instantly interacts with the gyro to correct the rolling.
- The airfoil fin design constantly adjusts vessel motion.
- One fin is angled to induce upward force while the other creates downward force.
- This coordinated response stabilizes the vessel.

Advantages of the Wesmar Electronic Gyro System Over a Hydraulic Gyro:

- No hydraulic hoses to the gyro compared to as many as 6 additional hoses on competitive hydraulic gyros.
- No Moving Parts.
- No Adjustments.
- No Maintenance.
- No Service.
- No Horizon Adjustment.
- Easy to Install.
- No Haul-Our Required.

Better Products, Larger Inventory, and More Brands to Choose from. with Better Prices, Expert Product Support, and Great Versatility.

All Systems are Custom Made to Your Specifications. Please Call for Quote!

Steering Systems
- Electro-hydraulic, orbitrol, manual, mechanical over hydraulic (The Skipper Original).
- Built to ABS and USCG specifications, DP interface available.

Manual Steering
- Compact systems for pleasure & work boats with patented helm units & corrosion resistant cylinders.

Hydraulic Powerpaks
- For bowthrusters, deck machinery, and auxiliary equipment.

Engine Alarm and Monitoring Systems
- PLC based, custom designed for your application, conversions and or new construction.

Component Sales
- Expansive inventory of steering and hydraulic components and rudder instrumentation, coupled with a nation-wide supplier network.

Custom Designs and Projects
- The Skipper Team offers hydraulic, electrical, and mechanical engineering, certified marine electricians, skilled machinists, & a naval architect.
- All of our system drawings are in Autocad format.

Field Service
- Full service for field repair, start-ups, warranty work, installations and retro-fits of your steering, hydraulic or electrical system, old and new.

Engine Control Systems
- Mathers and Rexroth electronic, ABS and DP interface approved designs.

Bowthrusters
- Wesmar, custom designed hydraulic or Baldor electric drives.

Anchor Windlasses
- Custom design and retro-fit conversions, electric, and hydraulic.

Capstans
- Electric/Hydraulic drives, custom units and conversions.

Deck Winches
- Hydraulic/Electric conversions for your brand and model.

Nav Light Panels
- J-Box custom design.

Fire Alarm Systems
- Fire-Lite brand or integrated into our Skipper engine alarm system.

General Alarm Systems
- Pre-packaged, ready to install.

Conversions-Retrofits
- Contact Skipper for updates and conversions to your existing steering and deck machinery

Electro-Hydraulic Power Unit

- C-Face electric motors for easy alignment and convenient service access.
- Quiet, efficient Vickers vane pumps.
- Soft shift directional valves - featuring new, longer life "Wet Armature" solenoids
- Fabricated steel reservoir, baffled for system integrity, sized for maximum fluid cooling.
- Easy access reservoir service covers.
- Low level alarm sensors.

Engine Alarm and Monitoring Systems

- Programmable logic control (PLC) based.
- "Fair-Safe" normal closed circuits (AS standard)
- Charger and battery back-up power supply, 24V DC.
- Flush mount or enclosed fully annunciated panels.
- Full remote and summary panels.
- Murphy Swichgage, Telcor, Nason and Fenwall brand sensors.
- High quality engine room sirens and strobe and lights.
- Pre-wired system junction boxes.

Mechanical/Hydraulic Control Valve Assembly

- Ideal for pushboats.
- Full follow up control - low maintenance, long life.
- Back pressure rated hydraulic directional control valve, to enable in-series steering and flanking - no "power beyond" required
- Smooth, easy metering characteristics.

Workboat Style Wheelhouse Hardware

- Dual stacked steering levers: 12"L, 18"L & 24"L
- Compatible with mechanical or electro-hydraulic steering systems.
- Appealing appearance, durable stainless construction with comfortable mahogany grips.
- Black, anodized aluminum dural escutcheon plates with integral roller bearings

Rudder Angle Indicator

- Suitable for console mounting: completely watertight.
- Furnished with supply voltage regulator and Skipper power supply.
- Offers easy series parallel hook-up for multiple stations.

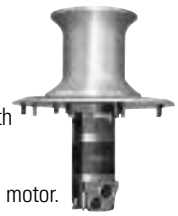
Feedback Unit

- Heavy duty marine construction, watertight for above deck mounting.
- Dual potentionmeters for integral back-up or mulitple function capability.
- Dual limit switches for independant system integrity

Hydraulic Steering Cylinders

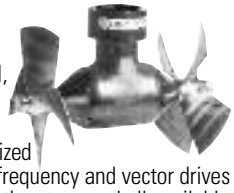
- Stainless steel chrome plated piston rods for long, corrosion resistant service.
- Skipper's unique 'Sure-Lock' rodeye, clamps to cylinder rod and features corrosion resistant bronze pin bushings.
- Skipper unique locking heel pin-fabricated from marine grade stainless steel.

Amplifier



- Adjustable gain control - eliminates hunting, affords maximum sensitivity.
- All solid state construction.
- Integral AC-DC voltage rectifier.

Skipper Control Panel



- Fully illuminated, suitable for console mounting.
- Mechanically switched and mode selectors.
- Low level, overload and power failure alarms-all audio-visual.
- Pre-wired terminal strip for easy installation and service.

Vertical Capstans

- Custom designed for use with various hydraulic systems.
- Profiled aluminum cathead with direct, plug-in hydraulic motor.
- Aluminum deck mounting fing.

Bowthrusters

- Full line Wesmar distributor.
- Wesmar's unique dual, counter rotationg 4 blade props.
- Available with customized hydrostatic or Baldor frequency and vector drives - for all brands of bowthrusters, and all available with DP interface.
